Title 2.2 Conditions for admission

Chapter 1 – Shares

Article 2.2.1 (Requirements for the shares)

1. For the purposes of admission to trading, of shares, Borsa Italiana assesses the existence of conditions that will ensure that the shares may be traded in a fair, orderly and efficient fashion.
2. In support of this assessment, the shares must satisfy the following requirements:
 - a) a foreseeable market capitalisation of at least 40 million euros; Borsa Italiana may admit shares with a smaller market capitalisation where it deems an adequate market for such shares will develop. In the case of companies that have already been admitted to trading on another regulated market or multilateral trading system, the requirement of 40 million euros is calculated on the basis of the average market capitalisation of the last three months prior to the decision to admit to trading. To this end, the average market capitalisation is calculated on the basis of the average of the official prices of the reference period.
 - b) adequate distribution, which shall be presumed to exist where shares representing at least 25% of the capital represented by shares of the same class are distributed among professional as well as non-professional investors;

The minimum free float for shares to obtain STAR status shall be 35%. For this purpose alone, only the shares earmarked for the greenshoe option may be included in the calculation of the free float up to 10% of the value of the offering.

- 1) account shall not be taken of controlling shareholdings or of shareholdings bound by shareholders' agreements or of shareholdings subject to restrictions on the transferability of shares (lock-up agreements) with a duration of more than 6 months;
- 2) account shall not be taken of shareholdings exceeding equal to or greater than 5%;
- 3) account shall be taken of the shares held by institutional investors except for controlling shareholdings of more than 10%, controlling shareholdings, or of shareholdings bound

by shareholders' agreements or of shareholdings subject to restrictions on the transferability of shares (lock-up agreements) with a duration of more than 6 months. Accounts shall be taken of the shareholdings held by the special purpose asset fund established in accordance with Article 27 of Legislative Decree 34/2020, unless these shareholdings are controlling shareholdings or shareholdings bound by shareholders' agreements or shareholdings subject to restrictions on the transferability of shares (lock-up agreements) with a duration of more than 6 months.

For the purposes of calculating the shareholding, including for obtaining STAR status at the same time as admission, the number of shares in the category for which admission is requested is considered. Should it be impossible to calculate the shareholding in this way, the calculation will be based on criteria which take account of the information available with regard to the ownership structure in accordance with the applicable legislation.

Borsa Italiana, without prejudice to the general objective indicated in paragraph 1, may, at its own discretion, derogate from the requirements set forth above, according to non-discriminatory procedures and based on methods defined in general term.

3. In the case of newly issued shares of the same class and with the same features, apart from dividend entitlement, as those already listed, the provisions of the preceding paragraph 1 shall not apply. Borsa Italiana may decide their admission to trading on a separate line, having regard to the quantity and distribution of the shares and to the expected duration of the separate line.
4. Except for the shares of *banche popolari* and cooperative companies authorised to engage in insurance, classes of shares without the right to vote in ordinary shareholders' meetings may not be admitted to listing unless shares with such right are already traded or are the subject of a simultaneous application for admission to trading.
5. The provisions of paragraph 2(b) shall not apply to savings shares, for which adequate distribution must be such as ensures the regular operation of the market.
6. Borsa Italiana may admit to Stock Exchange listing financial instruments that within a short interval are to be the subject of a public offer on the Stock Exchange and for which it is reasonable to presume that the offer will result in their adequate distribution among the investors specified in the relevant articles.

Article 2.2.2
(Requirements for issuers of shares)

1. Shares may be admitted to listing where they represent the capital of issuers who have published and filed, in compliance with national law, the solo or consolidated annual accounts for the last three financial years, of which at least the latest must be accompanied by an opinion expressed by a statutory or a statutory auditing company registered in the register held by the Ministry of Economy and Finance, pursuant to Legislative decree no. 39 of 27 January 2010 or the corresponding applicable provisions of foreign law. Admission to listing may not be granted where statutory auditor or the statutory auditing company has rendered an adverse opinion or a disclaimer.
2. Companies resulting from extraordinary corporate actions or whose assets and liabilities underwent material changes in the financial year preceding that of the submission of the application or subsequently must produce, in addition to what is provided for in paragraph 1:
 - a pro forma income statement for at least one financial year ended prior to the date of submission of the application;
 - a pro forma balance sheet referring to the closing date of the financial year preceding the application where the extraordinary corporate actions or the material changes occurred after that date;
 - the other pro forma interim documents specified in the Instructions.

Where it emerges during the preparation of the pro forma documents referred to in this paragraph that the accounting data they contain are objectively unreliable, Borsa Italiana may accept different historical accounting reconstructions upon receiving a reasoned request from the issuer.

3. The accounting documents referred to in paragraph 2 must be accompanied by the report of a statutory auditor or a statutory auditing company containing a statement drafted in application of the best international reference standards.

A similar statement must be issued by the statutory auditor or the statutory the auditing company on historical accounting reconstructions different from pro forma data; the reasons must be given for any limitations or impediments to rendering the opinion.

The annual financial statements on a solo and a consolidated basis and the annual accounting documents that provide the basis for the pro forma documents referred to in paragraph 2 must be fully audited to a preponderant extent. Where this is objectively impossible, Borsa Italiana may accept that only the bulk of the data are fully audited

upon receiving a reasoned request from the issuer.

5. In exceptional circumstances, by way of derogation from paragraph 1, a smaller number of annual accounts may be accepted, possibly supplemented by the documentation referred to in paragraph 2 accompanied by that provided for in paragraphs 3 and 4, or where issuers have never published and filed an annual report, the documentation referred to in paragraphs 2, 3 and 4. Such derogation must be in the interests of the issuer and of investors and the latter must have all the information needed to evaluate the issuer and the instruments whose admission to listing is being applied for.

To this end the issuer shall use the conformity checks carried out by a statutory auditor or a statutory auditing company or by some other qualified person that satisfies the requirements of professionalism, independence and experience with respect to services related to the management control system for listed companies. In this regard, the issuer shall issue a specific statement to Borsa Italiana.

7. The issuer must adopt a multi-annual business plan which expressly sets out the forecasts of revenues and margins by business area and:

For the budgets, the issuer will use the assistance of an auditing company, which will certify to the listing agent that the budget data relating to the financial year under way and the first six months of the following year, if the documentation has been completed after 15 September,

have been prepared by the issuer after careful and thorough examination of the forecasts for the profits and losses and financial situation of the company and of the group it heads, or it will issue, with regard to the same data, a specific certification prepared in accordance with the best applicable international standards. The business plan does not need to be provided to Borsa Italiana as it is not relevant for the purposes of the assessments identified in Article 2.1.2, paragraph 1.

8. The provisions at paragraphs 6 and 7 of this Article shall not apply in the case of admission to listing of shares representing the capital of an issuer that has approved a merger of a listed company into an unlisted company in which the latter does not have significant assets apart from the equity interest in the former and does not have financial debt. The provisions of this paragraph shall not apply where the listed company, for the purpose or as a result of the merger is the subject of guarantees, commitments or contractual constraints capable or potentially capable of materially affecting its financial structure.
9. The provisions of paragraphs 6 and 7 of this Article shall not apply in the case of an application for admission to listing of shares deriving from a merger of listed companies.
10. The provisions of paragraph 6 of this Article shall not apply in the case of admission to listing of shares representing the capital of an issuer which has approved a merger a listed company into an unlisted company, if the latter has no other significant assets besides its holding in the listed company and no financial debt.
11. The issuer must carry on, directly or through its subsidiaries and in conditions of management autonomy, an activity capable of generating revenues.

Borsa Italiana in assessing the existence of conditions of management autonomy, shall verify that there are no impediments to the maximisation of the issuer's economic and financial objectives. Where Borsa Italiana finds circumstances potentially able to impede the achievement of management autonomy, it shall require the public to be adequately informed at the time of admission to listing and on a continuous basis where appropriate.

Companies subject to direction and coordination by another company must not fall into the conditions that forbid the admission to listing pursuant to Article 16 of the Consob Markets Regulation.

3. The efficacy of the admission to listing decision shall expire after six months and shall be subject to:
 - a) filing of the listing prospectus (which might consist of different documents) with Consob or of the publication in Italy of the prospectus approved by the competent authority of another EU member state in accordance with the applicable provisions of Consob Issuer's Regulation. Article 2.4.3
(Procedure for admission to listing in the case of a rights offering pursuant to Article 2441 of the Civil Code)

1. Applications for admission to listing may be submitted before a public offering aimed at the distribution of the financial instruments has been effected. In such cases the following requirements shall apply:
 - a) the issuer or the listing agent must inform Borsa Italiana of the results of the offering by the trading day following the date fixed for the closure, early or otherwise, of the offering;
 - b) the financial instruments must be allotted to those having entitlement by the date fixed for the related payment, to be set not later than the fifth trading day following that of the closure of the offering. For financial instruments referred to in Article 4.1.1, paragraph 1, letter c), upon receiving a reasoned request from the issuer, Borsa Italiana may arrange for the payment day to be a different day.
2. Within two months of the day the documentation to be produced following submission of an application for admission to listing is completed Borsa Italiana after ascertaining satisfaction of the prerequisites for admission to listing, shall resolve and inform the issuer and, if envisaged, the listing agent of the acceptance or rejection thereof and simultaneously notify the decision to Consob. The time limit is of one month if the application is submitted by an Euronext Growth Milan Company or a Certified Company.

3. The time limit referred to in paragraph 2 may be interrupted by means of a notification from Borsa Italiana where it is found necessary to acquire additional information and documents. In this case the time limit referred to in paragraph 2 for the acceptance or rejection of the application shall start again from the date of receipt of the notification in question.
4. The efficacy of the admission to listing decision shall expire after six months and shall be subject to:
 - a) filing of the listing prospectus (which might consist of different documents) and, where applicable, an offering prospectus with Consob or of the publication in Italy of the prospectus approved by the competent authority of another EU member state in accordance with the applicable provisions of Consob Issuer's Regulation. In the case of open-end AIFs, reference is made to the publication of the prospectus containing the information required pursuant to Article 113-bis of the Consolidated Law on Finance and its implementing provisions; and
 - b) in the cases envisaged in Article 2.4.1, paragraph 1, letters a) and b), submission of the application for admission to trading by the deadline indicated in paragraph 5.
5. In the cases envisaged in Article 2.4.1, paragraph 1, letters a) and b), the issuers shall make an application for admission to trading after the approval and notification of admission to listing by Borsa Italiana.

The application for admission to trading has to be submitted as soon as possible and, in any event, no later than one stock market trading day after receipt of the notice mentioned in paragraph 2, under penalty of forfeiture of the admission decision.
6. Borsa Italiana shall authorise the admission to trading of the financial instruments covered by the previous admission to listing. Within two days after the date indicated in paragraph 1, letter a), of this article, and after verifying satisfaction of the prerequisites for admission to trading, Borsa Italiana shall resolve on admission or rejection of the application for admission to trading and set the starting date for trading – which will normally be no later than the payment date indicated in paragraph 1 – and the market segment in which the financial instrument will be traded, while giving notice thereof to Consob at the same time. The decision on admission to trading will also specify the segment in which the financial instrument will be traded and the minimum lot, if envisaged. The admission to listing and trading will be completed with the start of trading

7. As part of the process for admission to listing and trading of financial instruments the issuer may use the market for the distribution of those instruments, unless Borsa Italiana considers that the characteristics of the transaction do not allow the distribution to be carried out through the system. In such case Borsa Italiana, after verifying that the issuer and the financial instruments satisfy the admission requirements provided by the Rules and the accompanying Instructions, shall admit the issuer and the financial instruments to listing and the related contracts will be concluded by matching buying and sell orders. At the end of the distribution phase, if it is successful and subject to compliance with the requirements laid down in these Rules and the accompanying Instructions, Borsa Italiana, having verified satisfaction of the prerequisites for admission to trading, shall decide on whether to accept or reject the application for admission to trading and shall establish the date for the start of trading on the market. The application for admission to trading shall be submitted in accordance with the terms and conditions set out in paragraph 5 or in paragraph 9 of this article.

If the issue of financial instruments does not take place because the admission requirements laid down in these Rules and the accompanying Instructions are not satisfied, the admission to listing decision shall cease to be effective and the contracts concluded shall be null and void.

The procedures for distribution via the market shall be established each time by Borsa Italiana in a Notice. To this end the issuer shall inform Borsa Italiana of the name of the intermediary or intermediaries appointed to display quotes for the sale of the financial instruments that are to be issued if it does not intend to perform this task itself. The issuer shall also inform Borsa Italiana of the days on which the distribution is to take place, the price, the day on which the company will decide whether to proceed with the issue, and the single date set for the settlement of the contracts concluded, which normally coincides with the date set for the issue and payment of the financial instruments.

Entering, management and cancellation of quotes displayed via the electronic trading systems during the distribution phase follow the relevant provisions provided by the Rules and the accompanying Instructions.

8. Borsa Italiana must be promptly informed of any new fact likely to significantly influence the assessment of the financial instruments that occurs in the interval between the date of the admission to listing decision and the date of the start of trading. Borsa Italiana, after evaluating such facts and where necessary for the protection of

investors, may revoke the admission to listing decision and simultaneously notify the decision to the issuer and Consob.

9. Paragraphs 5 and 6 of this article shall apply exclusively in the cases envisaged in Article 2.4.1, paragraph 1, letters a) and b). In the other cases, the application for admission to trading shall be considered included in the application for admission to listing, in accordance with the terms and conditions indicated in the Instructions themselves. Moreover, in its decision for admission to listing, when envisaged, Borsa Italiana shall indicate the segment in which the financial instrument will be traded and the minimum lot.

Upon conclusion of the offering and having verified satisfaction of the prerequisites for admission to trading, Borsa Italiana shall set the starting date for trading – which will normally be no later than the payment date indicated in paragraph 1 – and the market segment in which the financial instrument will be traded while simultaneously giving notice to Consob. The public shall be informed with a Notice by Borsa Italiana. Contracts made before the payment date shall be conditioned on the successful conclusion of the offer on the payment date of the offer itself. The admission to listing and trading will be completed with the start of trading.

simultaneously giving notice to Consob. The admission to listing and trading will be completed with the start of trading.

7. Borsa Italiana may send a notification interrupting the time limits referred to in paragraphs 1 and 5 if it is found necessary to acquire new information and documentation. In such case the time periods provided for shall start to run again from the date of receipt of the documentation.

Where the conditions referred to in Article 111 of the Consolidated Law exist, the securities that are the subject of the legal purchase obligation shall be suspended and/or delisted and withdrawn from trading, taking into account the timetable for the exercise of purchase right. Borsa Italiana shall notify the market the date of the revocation appropriately in advance.
