

This document is a Supplement to the Prospectus dated 21 November 2024 issued by AXA IM ETF ICAV (the “ICAV”). This Supplement forms part of, and should be read in conjunction with, the Prospectus.

The value of Shares may go up or down and you may not get back the amount you invested. Investors’ attention is drawn to the risk warnings contained in the section headed Risk Factors in the Prospectus and, in particular, to the risk warnings contained in the section of this Supplement entitled “Risk Factors”.

Words and expressions defined in the Prospectus, unless the context otherwise requires, have the same meaning when used in this Supplement.

AXA IM ETF ICAV

(an open-ended Irish collective asset management vehicle which is constituted as an umbrella fund with variable capital and segregated liability between its sub-funds and registered in Ireland with registration number C-469468 and authorised by the Central Bank of Ireland as a UCITS)

SUPPLEMENT

Dated 21 November 2024

in respect of

AXA IM US Treasury 25+ Year UCITS ETF

(a sub-fund of the ICAV, the “Fund”)

The Directors of the ICAV, whose names appear in the Directory in the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

THE FUND

Investment Objective

The investment objective of the Fund is to seek to provide investors with the performance of the ICE® US Treasury 25+ Year Bond Index (the "Index"), less the fees and expenses of the Fund, while passively tracking the Index and aiming to minimise the tracking error in between the Fund's Net Asset Value and the Index.

There is no guarantee that the Fund will achieve its investment objective.

Investment Policy

The Fund is passively managed and will seek to achieve its investment objective by investing in sovereign debt publicly issued by the US government in its domestic market and denominated in US dollar. The Fund intends to replicate the constituents of the Index by holding as far as possible and practicable the securities comprising the Index in generally the same proportions as they are held in the Index. Therefore, the Fund may invest up to 100% of its net asset in the securities of the US government provided that it invests in at least 6 issues with no one issue exceeding 30% of net assets. The Fund may also be invested in some securities which cease to be components of the Index until such time as it is possible and practicable in the Investment Manager's view to liquidate the position.

As of the date of this Supplement, the anticipated tracking error of the Fund is expected to be up to 1% in normal market conditions. Divergences between the anticipated and realised tracking error will be explained in the ICAV's annual report. For further information, please see the section of the Prospectus titled "**Tracking Error**".

The Fund may use financial derivative instruments ("**FDI**") including foreign exchange spot, forward contracts and swaps for hedging purposes. To the extent that the Fund uses FDI, there may be a risk that the volatility of the Fund may increase. However, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in "**Investment Techniques and Instruments**" in the Prospectus.

The Fund may engage in securities lending subject to the requirements of the Securities Financing Transactions Regulation, the UCITS Regulations and the Central Bank UCITS Regulations. This is more particularly described in the Prospectus under the heading "**Securities Financing Transaction Regulations Disclosure**". Up to 80% of the Fund's net assets may be subject to securities lending arrangements at any time, however the amount subject to securities lending arrangements is not generally expected to exceed 30% of the Fund's net assets. The Fund will not enter into total return swaps or instruments with similar characteristics neither engage in borrowing of securities or repurchase/reverse agreements within the meaning of the Securities Financing Transactions Regulation.

The Fund is neither an Article 8 fund nor an Article 9 fund for the purpose of SFDR. As the Fund is passively managed and the Investment Manager does not make active investment decisions for the Fund, the Fund does not integrate sustainability risks and so the impacts of sustainability risk on the returns of the Fund are not assessed. Taking into account the investment objective and strategy of the Fund, the Investment Manager does not consider the principal adverse impacts in its investment decisions since it does not intend to promote environmental or social characteristics nor to have a sustainable investment objective. In addition, the principal adverse impacts are not considered as the Fund's strategy consists of tracking the Index.

Currency hedging at Class level

The Manager intends to hedge foreign exchange risk of all Classes that are denominated in a currency other than the Base Currency. The Manager will attempt to mitigate the risk of such fluctuation, by using forward currency contracts and swaps subject to the conditions and within the limits laid down by the Central Bank. The Classes identified in the table set-out in the Appendix of this Supplement have "H"

in their names. For further information, please see the section “Financial Derivative Instruments” and “Currency Hedged Share Classes” of the Prospectus.

The successful execution of a hedging strategy which mitigates exactly this risk cannot be assured. The implementation of the hedging strategy described above may generate additional costs for the Fund and/or the relevant Share Class.

Base Currency

The Base Currency of the Fund is USD.

Taxonomy-related Disclosure

The Fund does not integrate a consideration of environmentally sustainable economic activities (as prescribed in the Taxonomy Regulation) in its management process. Therefore, for the purpose of the Taxonomy Regulation, it should be noted that the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

THE BENCHMARK

The Index is ICE® US Treasury 25+ Year Bond.

The Index tracks the performance of US dollar denominated sovereign debt publicly issued by the US government in its domestic market. Qualifying securities must have greater than or equal to twenty-five years remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and an adjusted amount outstanding of at least \$300 million. The adjusted amount outstanding includes a reduction for amounts held by the Federal Reserve’s SOMA account. Bills, inflation-linked debt, original issue zero coupon securities and STRIPs are excluded from the Index; however, the amounts outstanding of qualifying coupon securities are not reduced by any portions that have been stripped. Agency debt with or without a US Government guarantee and securities issued or marketed primarily to retail investors do not qualify for inclusion in the Index.

Index constituents are market capitalization weighted based on amounts outstanding reduced by amounts held by the Federal Reserve’s SOMA account. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments and redemptions are retained in the Index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index.

The index is rebalanced on the last calendar day of the month. New issues must be auctioned on or before the calendar month end rebalancing date in order to qualify for inclusion in the Index in the next month. No changes are made to constituent holdings other than on month end rebalancing dates.

Further information on the Benchmark can be found at: <https://indices.ice.com>

The information set out above is a summary of the principal features of the Index and does not purport to be an exhaustive description. The Index is provided by ICE® Data Indices, LLC. At the date of the Supplement, ICE® Data Indices, LLC, as administrator of the Index, is not listed on the ESMA register of benchmark administrators and benefits, as a UK entity, from the transitional period which is currently scheduled to end on December 31, 2025.

FEES AND EXPENSES

A TER will be paid out of the assets of each Class to the Manager. The TER for each for each Class is set out under the heading “TER” in the table included in the Appendix hereto.

This section should be read in conjunction with the section headed “**Fees, Costs and Expenses**” in the Prospectus.

RISK FACTORS

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the “**Risk Factors**” section of the Prospectus.

Moreover, the Fund is subject to the additional risks described below:

Interest rate risk: This corresponds to the risk of depreciation in rate-based instruments over either the short or medium term stemming from interest rate variations. For purposes of illustration, the price of a fixed-rate bond tends to decrease as interest rates increase.

The Fund is particularly exposed to bonds; in the event of a rise in interest rates, the value of assets invested at a fixed rate may fall.

Credit risk: In the event of default or deterioration of the quality of bond issuers (for example, a reduction in rating), the value of debt securities in which the Fund is invested may fall. In such case, the Net Asset Value of the Fund may fall.

Extension risk: An increase in interest rates could cause principal payments on a debt security, including perpetual bonds that have no maturity date, to be paid back slower than expected. For a callable security, an increase in interest rates may result that the security is not redeemed on its call date resulting in an extension of the expected maturity (increase of the effective duration), where the security may become more exposed and may face market value decrease.

Concentration risk: The Fund strategy leads the Fund to have a limited capacity to diversify its investments in terms of issuer. Such high issuer concentration of the Fund might have adverse consequences when the securities in which it invests become less valued or less liquid.

Index tracking risk: There is no guarantee that the Fund will achieve perfect tracking and it may potentially be subject to tracking error risk, which is the risk that its returns may not track exactly those of its Index, from time to time.

RISK MANAGEMENT

The ICAV will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund’s total exposure will be limited to 100% of Net Asset Value using the commitment approach.

While it is not the Manager’s intention to leverage the Fund, any leverage resulting from the use of FDIs will be done in accordance with the UCITS Regulations.

Further detail on the calculation of global exposure is set out in the financial derivative instrument risk management process of the Fund (“**RMP**”). The RMP employed enables the Manager to accurately measure, monitor and manage the various risks associated with FDI, including leverage.
