What is this product?

Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank of Ireland as a UCITS.

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The objective of the Fund is to track the performance of the global infrastructure market represented by publicly traded infrastructure related equity and bonds.

The Fund seeks to track the performance of the Morningstar Global Multi-Asset Infrastructure Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

Investment policies The Fund invests primarily in securities included in the Index. These securities include a broadly diversified portfolio of publically traded global equity and global fixed income securities within social and economic infrastructure related industries. As it may be difficult to purchase all securities in the Index efficiently, in seeking to track the performance of the Index, the Fund will use a sampling strategy, for the fixed income assets and an optimisation strategy, for the equity assets to build a representative portfolio. Consequently, the Fund will typically hold only a subset of the securities included in the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund's maximum exposure to securities lending as a percentage of its Net Asset Value will not exceed 70%.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be paid to shareholders in respect of the shares.

The Shares of the USD Class are issued in U.S. Dollar.

Index Source: The Fund is not sponsored, endorsed, sold or promoted by Morningstar. Morningstar makes no representation or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund. Morningstar's only relationship to State Street Investment Management and this Fund is the licensing of: (i) certain trade and service marks and names of Morningstar; and (ii) the Index which is determined, composed and calculated by Morningstar without regard to State Street Investment Management or the Fund. Morningstar has no obligation to take the needs of State Street Investment Management or the Fund into consideration in determining, composing or calculating the Fund. Morningstar is not responsible for and has not participated in the determination of the prices and amount of the Fund or the timing of the issuance or sale of the Fund or in the determination or calculation of the equation by which the Fund is converted into cash. Morningstar has no obligation or liability in connection with the administration, marketing or trading of the Fund. Please see the Prospectus for the full index disclaimer.

Intended retail investor

This Fund is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	41 USD	248 USD
Annual cost impact*	0.4%	0.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 3.5% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00% The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of costs are already included in the price. This includes the costs of distribution of your product.	0 USD
