

Invesco EUR AT1 CoCo Bond UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Invesco EUR AT1 CoCo Bond UCITS ETF (the "**Fund**"), a sub-fund of Invesco Markets IV ICAV (the "**ICAV** ") an open ended Irish collective asset management vehicle established as an umbrella fund, governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**") of New Wapping Street, North Wall Quay, Dublin 1, Ireland.

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the Prospectus of the ICAV dated 10 June 2026, as may be amended, supplemented or modified from time to time, (the "Prospectus")), and must be read in conjunction with, the Prospectus.

THIS DOCUMENT IS IMPORTANT. YOU SHOULD NOT PURCHASE SHARES IN THE FUND DESCRIBED IN THIS SUPPLEMENT UNLESS YOU HAVE ENSURED THAT YOU FULLY UNDERSTAND THE NATURE OF SUCH AN INVESTMENT AND THE RISKS INVOLVED AND ARE SATISFIED THAT THE INVESTMENT IS SUITED TO YOUR CIRCUMSTANCES AND OBJECTIVES, THE RISKS INVOLVED AND YOUR OWN PERSONAL CIRCUMSTANCES. IF YOU ARE IN ANY DOUBT ABOUT THE CONTENTS OF THIS SUPPLEMENT YOU SHOULD TAKE ADVICE FROM AN APPROPRIATELY QUALIFIED ADVISOR.

Capitalised terms used in this Supplement will have the meanings given to them in the Definitions section below or in the Prospectus.

Invesco Markets IV ICAV

An umbrella fund with segregated liability between the sub-funds

Dated 10 June 2026

IMPORTANT INFORMATION

Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section headed "Risk Factors" of the Prospectus and the section headed "Other Information – Risk Factors" of this Supplement for a discussion of certain risks that should be considered by you.

In addition to investing in transferable securities, the ICAV may invest on behalf of the Fund in financial derivative instruments ("FDIs"), where applicable. Certain risks attached to investments in FDIs are set out in the Prospectus under "Risk Factors".

Prospective investors should refer to the annex to this Supplement regarding the Fund's environmental and / or social characteristics.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The ETF Shares purchased on the Secondary Market cannot usually be sold directly back to the Fund. Investors must buy and sell ETF Shares on a Secondary Market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying ETF Shares and may receive less than the current net asset value when selling them.

An investment in the Shares is only suitable for you if you (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

Profile of a typical investor

A typical investor would be one who is a private¹ or institutional investor and is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares.

Responsibility

The Directors accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement when read together with the Prospectus (as complemented, modified or supplemented by this Supplement) is in accordance with the facts as at the date of this Supplement and does not omit anything likely to affect the importance of such information.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the ICAV and provides general information about offers of shares in the ICAV. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety

¹ The negative target market for the Fund is "Basic Investors" as defined in the current European MiFID template (as at the date of this Supplement).

before any investment decision with respect to Shares is made.

As at the date of this document, the Fund has no loan capital (including term loans) outstanding or created but unissued, nor any outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, or guarantees or other contingent liabilities.

Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and the latest annual report and audited accounts of the ICAV and the Fund (other than to prior recipients of the Prospectus) and if published after such report, a copy of the then latest semi-annual report and unaudited accounts. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the ICAV has already complied. If you wish to apply for the opportunity to purchase any Shares, it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

Definitions

Words and expressions defined in the Prospectus will, unless otherwise defined in this Supplement, have the same meaning when used in this Supplement.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective of the Fund

The investment objective of the Fund is to provide exposure to the performance of Euro denominated Additional Tier 1 contingent convertible bonds issued by banks from global developed market countries.

Investment Policy of the Fund

In order to achieve the investment objective, the Fund will seek to replicate the total return performance of the iBoxx EUR Contingent Convertible Liquid Developed Markets AT1 (8% Issuer Cap) Index (the "**Reference Index**") less fees, expenses and transaction costs.

Further information on the components and selection criteria of the Reference Index is set out below under "**General Description of the Reference Index**".

The Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in the sections titled "**Investment Objective and Policies**" and "**Investment Restrictions and Permitted Investments**" in the Prospectus.

There are a number of circumstances where gaining access to the components of the Reference Index may be prohibited by regulation, may not otherwise be in the Shareholders' interests or may not otherwise be possible or practicable.

The Fund may hold ancillary liquid assets (namely, cash and UCITS money market funds) and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management

purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards. Further details on FDIs and how they may be used are set out in the section titled "**Appendix III - Use of Financial Derivative Instruments and Efficient Portfolio Management**" in the Prospectus.

The Fund shall not invest more than 10% of its net assets in other UCITS, open ended CIS or closed ended collective investment funds that meet the requirements of the Central Bank (and, in the case of closed ended collective investment funds, that qualify as transferable securities).

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Further information relevant to the Fund's investment policy is set out in the sections titled "**Investment Objectives & Policies**" and under "**Investment Restrictions and Permitted Investments**".

Transparency of the Promotion of Environmental or Social Characteristics

The Fund is an Article 8 Fund (as defined in the Prospectus).

The Fund promotes social characteristics, namely improving consumer financial protection and reducing the impact of weapons on non-combatants by excluding companies involved in predatory lending and those involved, both directly and through corporate ownership, in controversial weapons. The Fund also promotes environmental characteristics, namely limiting energy-intensive fossil-fuel extraction by excluding companies involved, both directly and through corporate ownership, in oil sands. The Fund achieves this by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics are achieved by applying the Index Provider's exclusion criteria to the eligible securities. Further information on how the environmental and social characteristics promoted by the Fund are achieved is set out under the heading "**General Description of the Reference Index**" below.

The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities as defined in Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the "**Taxonomy Regulation**") and so the "do no significant harm" principle under the Taxonomy Regulation does not apply to the investments underlying the Fund. The Fund does not intend to be aligned with the Taxonomy Regulation and, at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation.

The main strategy of the Fund is to replicate the Reference Index. As the Fund is passively managed, management of the portfolio does not include integration of sustainability risks into the investment process. Sustainability risks were considered in the selection of the Reference Index for use by the Fund and sustainability risks are integrated at the level of the Reference Index as described in the section of this Supplement titled "General Description of the Reference Index". Further consideration of sustainability risks is not relevant to the strategy of the Fund and the likely impact of sustainability risks on returns are not assessed.

Index Tracking Strategy

It is anticipated that the "Tracking Error" of the Fund (being the standard deviation of the difference in returns between the Fund and the Reference Index) will be between 0% and 1.00% under normal market conditions. However, exceptional circumstances may arise which cause the Fund's Tracking Error to exceed 1.00%. Investors should note that the Tracking Error set out in this section is for the Unhedged Share Classes against the Reference Index (which is also unhedged).

Investment Restrictions of the Fund

Investors in particular must note that the general investment restrictions set out under "**Investment Restrictions and Permitted Investments**" in the Prospectus apply to the Fund.

Efficient Portfolio Management

Further information on efficient portfolio management techniques that may be used by the Fund is contained in the "**Securities Financing Transactions**" section below and in the main body of the Prospectus under

the heading "**Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments**".

Securities Financing Transactions

The Fund may use Securities Financing Transactions, namely securities lending. The Fund's use of Securities Financing Transactions will be subject to the requirements of SFTR and in accordance with normal market practice, and the Central Bank Rules. Such Securities Financing Transactions may be entered into for any purpose that is consistent with the investment objective of the Fund, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risks. Securities lending will be for efficient portfolio management purposes only.

The type of assets that may be held by the Fund in accordance with its investment objective and policies and may be subject to such Securities Financing Transactions are bonds. The maximum proportion of the Fund's assets that may be subject to securities lending is 100%, and the expected proportion of the Fund's assets that may be subject to securities lending is between 0% and 30%. Please refer to the Prospectus section "**Securities Financing Transactions**" for further information.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the foreign exchange exposure in any hedged Share Classes (identified by "Hdg" in their names). The purpose of the hedging in the hedged Share Classes is to limit, at a Share Class level, the profit or loss generated from foreign exchange exposure when holding an asset in a currency other than the Base Currency of the Fund. This is achieved by the hedged Share Classes employing 30 day rolling forward FX contracts, which are rolled monthly

All costs and losses arising in relation to such currency hedging transactions will be borne by the hedged Share Class and all gains arising in connection with such hedging transactions will be attributable to the relevant Share Class. Although the Fund may utilise currency hedging transactions in respect of Share Classes, it shall not be obliged to do so and to the extent that it does employ strategies aimed at hedging certain Share Classes, there can be no assurance that such strategies will be effective. The costs and related liabilities/benefits arising from instruments entered into for the purposes of hedging the currency exposure for the benefit of any particular Share Class of the Fund (where the currency of a particular Share Class is different to the Base Currency of the Fund) shall be attributable exclusively to the Share Class. Under exceptional circumstances, such as, but not limited to, where it is reasonably expected that the cost of performing the hedge will be in excess of the benefit derived and therefore detrimental to Shareholders, the ICAV may decide not to hedge the currency exposure of such Share Classes.

Where the Investment Manager seeks to hedge against currency fluctuations, while not intended, this could result in over-hedged or under-hedged positions due to external factors outside the control of the ICAV. However, over-hedged positions will not exceed 105% of the Net Asset Value of the relevant Share Class and hedged positions will be kept under review to ensure that over-hedged positions do not exceed the permitted level and that under-hedged positions do not fall short of 95% of the portion of the Net Asset Value of the relevant Share Class and any under-hedged position will be kept under review to ensure it is not carried forward from month-to-month. This review will also incorporate a procedure to ensure that positions in excess of 100% of Net Asset Value will not be carried forward from month to month.

Further information on currency hedging at Share Class level is set out in the section titled "**Hedged Classes**" in the Prospectus.

Collateral Policy

- (a) **Non-Cash Collateral:** In addition to the requirements for valuation of non-cash collateral in the Prospectus, subject to any agreement on valuation made with the counterparty, collateral posted to a recipient counterparty for the benefit of the Fund will be valued daily at mark-to-market value.
- (b) **Issuer Credit Quality:** In addition to the requirement for Issuer Credit Quality set out in the Prospectus, assets provided by the Fund on a title transfer basis shall no longer belong to the Fund and shall pass outside the custodial network. The counterparty may use those assets at its absolute discretion. Assets provided to a counterparty other than on a title transfer basis shall be held by the Depositary or a duly appointed sub-depositary.

Further information on the criteria which collateral received by the Fund must meet is set out under

the heading "Non-Cash Collateral" in the section of the Prospectus titled "Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments".

- (c) Collateral - Posted by the Fund: In addition to the requirements in respect of collateral posted to a counterparty in the Prospectus, collateral posted to a counterparty by or on behalf of the Fund will consist of such collateral as is agreed with the counterparty from time to time and may include any types of assets held by the Fund.
- (d) Valuation: Information in respect of the collateral valuation methodology used by the ICAV can be found in the Prospectus in the section titled "Appendix III - Efficient Portfolio Management and Use of Financial Derivative Instruments". The rationale for the use of this collateral valuation methodology is primarily to guard against the price volatility of assets being received by the Fund as collateral.

The risk exposure of the Fund to counterparties will remain within the limits prescribed in the Prospectus under "**Appendix II - Investment Restrictions Applicable to the Funds under the Regulations**".

Further information on the collateral policy is set out under the heading "**Collateral Policy**" in the section of the Prospectus titled "**Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments**".

Borrowing and Leverage

The ICAV on behalf of the Fund may borrow up to 10% of the Net Asset Value of the Fund on a temporary basis. Such borrowings may only be used for short term liquidity purposes to cover the redemption of Shares. Further information on borrowing and leverage is set out in the sections titled "**Borrowing and Lending Powers**" and "**Leverage**" in the Prospectus.

The ICAV will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund's total exposure to the Reference Index will be limited to 100% of Net Asset Value.

While it is not the Investment Manager's intention to leverage the Fund, any leverage resulting from the use of FDIs will be done in accordance with the Regulations.

Dividend Policy

Dividends will be declared on a quarterly basis for the Dist Shares, the USD Hdg Dist Shares, the GBP Hdg Dist Shares, the CHF Hdg Dist Shares, the MXN Hdg Dist Shares, the SEK Hdg Dist Shares, and the HKD Hdg Dist Shares in accordance with the general provisions set out in the Prospectus under the heading "Dividend Policy" and Shareholders will be notified in advance of the date on which dividends will be paid. Distributions will not be made in respect of the Acc Shares, the USD Hdg Acc Shares, the GBP Hdg Acc Shares, the CHF Hdg Acc Shares, the MXN Hdg Acc Shares, the SEK Hdg Acc Shares, and the HKD Hdg Acc Shares and income and other profits will be accumulated and reinvested in respect of those Shares.

Trading

Application will be made to Euronext Dublin, the London Stock Exchange or Deutsche Boerse and/or such other exchanges as the Directors may determine from time to time (the "**Relevant Stock Exchanges**") for listing and/or admission to trading of the Shares issued and available to be issued on the main market of each of the Relevant Stock Exchanges on or about the Launch Date. This Supplement and the Prospectus together comprise listing particulars for the purposes of trading on the main market of each of the Relevant Stock Exchanges.

Exchange Traded Fund

The Fund is an Exchange Traded Fund ("**ETF**"). The ETF Shares of this Fund are fully transferable among investors and will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that ETF Shares will be bought and sold by private and institutional investors in the Secondary Market in the same way as the ordinary shares of a listed trading ICAV.

The ICAV may also establish Non-ETF Shares in the Fund. Such shares will not be listed and/or traded on a Relevant Stock Exchange, and it is not expected that an active secondary market in Non-ETF Shares will develop.

Investors should refer to the section of the Prospectus titled “**Subscriptions and Redemptions**” for information of how to deal in ETF Shares and Non-ETF Shares.

The Shares

The Share Classes available for subscription in the Fund are set out in “**Appendix I – Description of the Shares**”. Additional Share Classes may be added to the Fund, subject to prior notification to and the approval of the Central Bank, and will be set out in a revised supplement.

Intra-Day Portfolio Value ("iNAV")

Further information on intra-day portfolio value is contained in the main body of the Prospectus under the heading “**Intra-Day Portfolio Value**”.

Fees and Expenses

The following fees will be incurred on each Share by Shareholders (which accordingly will not be incurred by the ICAV on behalf the Fund and will not affect the Net Asset Value of the Fund):

Share Class	All Share Classes
Subscription Charge	Up to 5%
Redemption Charge	Up to 3%

The Subscription Charge is deducted from the investment amount received from an investor for subscription for Shares. Such Subscription Charge is payable to the Manager. The fees and expenses that will be incurred by the ICAV on behalf of the Fund and will affect the Net Asset Value of the relevant Share Class of the Fund are set out in “Appendix I – Description of the Shares”.

The TER, a percentage of the Net Asset Value of the relevant Class of Shares (plus VAT, if any), is payable by the ICAV out of the Fund Assets to the Manager. The TER will accrue on each day and will be calculated on each Dealing Day and paid monthly in arrears. The Manager will pay out of the TER the fees and expenses (where appropriate) of the Investment Manager, the Administrator, the Depositary, the Directors and the ordinary fees, expenses and costs incurred by the Fund as described in the section titled “**Fee & Expenses**” in the Prospectus.

Where a distribution fee, commission or other monetary benefit is received by the Fund, the Manager or any person acting on behalf of the Fund or the Manager of the Fund, the fee, commission or other monetary benefit shall be paid into the assets of the Fund.

This section titled “**Fees and Expenses**” should be read in conjunction with the section titled “**Fees & Expenses**” in the Prospectus.

Exchange of Shares

Shareholders may apply to exchange on any Dealing Day all or part of their holding of Shares of any Class of the Fund (the “Original Class”) for Shares of another Class of the Fund which is being offered at that time (the “New Class”) provided that all the criteria for applying for Shares in the New Class have been met.

The general provisions and procedures relating to redemptions will apply equally to exchanges. All exchanges will be treated as a redemption of the Shares of the Original Class and application to the purchase of Shares of the New Class, save that no Subscription Charge or Redemption Charge will be payable. Exchanges of Shares may be subject to an Exchange Charge of up to 3% of the Repurchase Price for the total number of Shares in the Original Class to be repurchased.

GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index is designed to reflect the performance of EUR-denominated Additional Tier 1 contingent convertible bonds issued by banks from global developed market countries.

The Reference Index is further described below but only represents an extract of information available from public sources and neither the Directors, the Manager, S&P Dow Jones Indices GmbH or such other successor sponsor to the Reference Index (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

The Reference Index is based on the Markit iBoxx EUR Contingent Convertible Developed Market Index (the "**Parent Index**"), which is designed to reflect the performance of contingent convertible debt issued by financial institutions (namely banks) and insurance companies from developed market countries. The Reference Index only includes Additional Tier 1 ("**AT1**") capital bonds from the Parent Index. AT1 capital bonds are a specific type of contingent convertible bond issued by banks that qualify as regulatory capital under Basel III.

The securities which comprise the Reference Index must be rated by at least one of the three credit rating agencies, Standard & Poor's, Fitch or Moody's, and have a minimum rating of B using the Index Provider's Rating Methodology which is based on the average rating of the three credit rating agencies. To be included in the Reference Index, securities must have a minimum par amount outstanding of EUR500 million. In addition, the bonds must also have been issued after 1 January 2013 and must have a remaining time to maturity of at least one year on the date of rebalancing. Payment-in-kind bonds are not eligible for selection in the Reference Index.

The Index Provider applies exclusionary criteria to exclude securities that: 1) are involved (as defined by the Index Provider using data provided by Sustainalytics, an independent ESG and corporate governance research, ratings and analytics firm) in any of the following business activities: controversial weapons, small arms, military contracting, oil sands, thermal coal, tobacco, cannabis and predatory lending; and 2) are deemed not to comply with the principles of the United Nations Global Compact (as determined by the Index Provider using Sustainalytics data).

Issuer weights are capped at 8% in the Reference Index.

Capitalised terms used above and not defined herein are defined by the Index Provider. Further information on these terms and the Reference Index methodology can be found on the Index Provider's website.

Index Rebalancing

The Reference Index rebalances monthly, at the end of each month.

The Fund will bear the costs of any rebalancing trades (i.e. the costs of buying and selling securities of the Reference Index and associated taxes and transaction costs).

Index Provider and Website

The Reference Index is sponsored by S&P Dow Jones Indices GmbH and more details on the Reference Index can be found at: <https://indicesweb.ihsmarkit.com/iBoxx/Screeener> .

Publication

The level of the Reference Index will be published on: <https://indicesweb.ihsmarkit.com/iBoxx/Screeener>.

OTHER INFORMATION

Taxation

The tax treatment of the ICAV is set out in the Prospectus of the ICAV and the tax information provided therein is based on tax law and practice as at the date of the Prospectus.

Shareholders and potential investors are advised to consult their professional advisers concerning possible taxation or other consequences of purchasing, holding, selling or otherwise disposing of the Shares under the laws of their country of incorporation, establishment, citizenship, residence or domicile.

Consequences of Disruption Events

Upon the occurrence of a Disruption Event (and without limitation to the Directors personal powers as further described in the Prospectus) an Approved Counterparty may make adjustments to determine the valuation of FDIs. Further information on the consequences of Disruption Events is set out in the section titled "Disruption Events" in the Prospectus.

Limited Recourse

A Shareholder will solely be entitled to look to the assets of the Fund in respect of all payments in respect of its Shares. If the realised net assets of the Fund are insufficient to pay any amounts payable in respect of the Shares, the Shareholder will have no further right of payment in respect of such Shares nor any claim against or recourse to any of the assets of any other Fund or any other asset of the ICAV.

Risk Factors

Certain risks relating to the Shares are set out under the heading "Risk Factors" in the Prospectus. In addition, Shareholders must also note that:

- (a) **Non-Investment Grade Securities Risk:** Non-investment grade securities are subject to the increased risk of an issuer's inability to meet principal and interest payment obligations. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of the non-investment grade securities markets generally, real or perceived adverse economic and competitive industry conditions and less secondary market liquidity. If the issuer of non-investment grade securities defaults, the Fund may incur additional expenses to seek recovery.
- (b) **Contingent convertible bonds** are a type of debt security, issued by a financial institution, that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined event ("the trigger event") and can be exposed to several risks (including but not limited to):
 - **Trigger level risk:** The trigger event is ordinarily linked to the financial position of the issuer and therefore the conversion is likely to occur as a result of a deterioration of the relative capital strength of the underlying. The relative risk associated with different contingent convertibles will depend on the distance between the current capital ratio and the effective trigger level. It is likely that the conversion to equity would occur at a share price, which is lower than when the bond was issued or purchased.
 - **Capital structure inversion risk:** In the case of a principal write down contingent convertible bond, it is possible that the holder could take a write down before equity holders, which is contrary to the typical capital structure hierarchy.
 - **Liquidity risk:** In stressed market conditions, the liquidity profile of the issuer can deteriorate significantly and it may be difficult to find a ready buyer which means that a significant discount may be required in order to sell it.
 - **Call extension risk:** Contingent convertible bonds can also be issued as perpetual bonds (i.e. bonds without a maturity date), while these will have call dates, there is no guarantee that the issue will be called on this date and there is a possibility that the bond may never be called resulting in the investor not receiving the return of the principal at any date, like for any other non-callable perpetual bond.
 - **Unknown/uncertainty risk:** Contingent convertible bonds are a relatively new instrument and the trigger events are generally untested, therefore it is uncertain how the asset class will perform in stressed market conditions and risk to capital, and volatility could be significant.
 - **Coupon cancellation risk:** Coupon payments may be discretionary and can be cancelled at any time, for any reason.
 - **Valuation risk:** Investment in contingent convertible bonds may have a higher yield, however, they can carry higher risk than investment in traditional debt instruments and in certain cases equities;

the volatility and risk of loss can be significant.

- (c) Risks associated with investment in debt securities: Investment in debt securities is subject to interest rate, liquidity and credit risks. Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which respond primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated securities and it may be harder to buy and sell such securities at an optimum time. Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial standing. Such a deterioration may result in a reduction of the credit rating of the issuer's securities and may lead to the issuer's inability to honour its contractual obligations, including making timely payment of interest and principal. Credit ratings are a measure of credit quality. Although a downgrade or upgrade of an investment's credit rating may or may not affect its price, a decline in credit quality may make the Investment less attractive, thereby driving its yield up and its price down. Declines in credit quality can result in bankruptcy for the issuer and permanent loss of investment. In the event of a bankruptcy or other default, the Fund could experience both delays in liquidating the underlying securities and losses including a possible decline in value of the underlying securities during the period when a Fund seeks to enforce its rights thereto. This will have the effect of reducing levels of capital and income in the Fund and lack of access to income during this period together with the expense of enforcing the Fund's rights. Investment in debt securities will be subject to interest rate risk. Interest rate risk refers to the risk that the prices of debt securities generally fall as interest rates rise; conversely, debt securities prices generally rise as interest rates fall. Specific debt securities differ in their sensitivity to changes in interest rates depending on specific characteristics of each debt security. Longer term debt securities are usually more sensitive to interest rate changes.
- (d) Liquidity Risk: The Fund's investments may be subject to liquidity constraints, which means they may trade less frequently and in small volumes. Securities of certain types, such as bonds, may also be subject to periods of significantly lower liquidity in difficult market conditions. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the price at which it has been valued for the purposes of calculating the Net Asset Value of the Fund or at a value considered to be fairest.
- (e) Environmental, Social and Governance Risk: The Fund intends to invest in securities of issuers that aren't involved in specific business activities that could be deemed controversial from an ESG perspective. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not screen securities based on specific business involvement activities.

Investors should also refer to the Prospectus for additional disclosure of risks and conflicts of interest.

Inclusion of a security, commodity, crypto currency or other asset within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, commodity, crypto currency or other asset, nor is it considered to be investment advice or commodity trading advice. SPDJI provides indices that use environmental, social and/or governance (ESG) indicators (including, without limit, business involvement screens, conformance to voluntary corporate standards, GHG emissions data, and ESG scores) to select, weight and/or exclude constituents. ESG indicators seek to measure a company's, or an asset's performance, with respect to E, S and/or G criteria. ESG indicators are derived from publicly reported data, modelled data, or a combination of reported and modelled data. ESG indicators are based on a qualitative assessment due to the absence of well-defined uniform market standards and the use of multiple methodologies to assess ESG factors. No single clear, definitive test or framework (legal, regulatory, or otherwise) exists to determine labels such as, 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. Therefore, the exercise of subjective judgment is necessary. Different persons may classify the same investment, products and/or strategy differently regarding the foregoing labels.
