As at the date of this Supplement, the Prospectus is dated 2 September 2026. However, investors should note that the Prospectus may be amended, supplemented or modified from time to time. For the most current version of the Prospectus, investors should refer to etf.invesco.com.

Invesco Markets IV ICAV

An umbrella fund with segregated liability between the sub-funds

Dated 2 September 2026

IMPORTANT INFORMATION

Suitability of Investment

Please review the information in the Prospectus regarding suitability of an investment.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section headed "Risk Factors" of the Prospectus and the section headed "Other Information – Risk Factors" of this Supplement for a discussion of certain risks that should be considered by you.

In addition to investing in transferable securities, the ICAV may invest on behalf of the Fund in financial derivative instruments ("FDIs"), where applicable. Certain risks attached to investments in FDIs are set out in the Prospectus under "Risk Factors".

The ETF Shares purchased on the Secondary Market cannot usually be sold directly back to the Fund. Investors must buy and sell ETF Shares on a Secondary Market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying ETF Shares and may receive less than the current net asset value when selling them.

Profile of a typical investor

A typical investor would be one who is a private or institutional investor and is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the ICAV and provides general information about offers of shares in the ICAV. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

Definitions

Words and expressions defined in the Prospectus will, unless otherwise defined in this Supplement, have the same meaning when used in this Supplement.

For the purposes of this Supplement:

"Benchmark Spread" means a premium above the yield on a default-free bond with similar time to maturity (also known as the **"benchmark rate"**), which seeks to compensate for the additional risk associated with holding a corporate bond that is not considered default-free. This is calculated as the difference between the yield on a corporate bond and the benchmark rate. For the purposes of the Reference Index, the benchmark rate would be the yield of a government bond that is selected as an approximation of a default free bond, e.g. a Euro denominated government bonds with similar time to maturity.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective of the Fund

The investment objective of the Fund is to provide exposure to the performance of USD denominated investment grade rated corporate bonds with a high Benchmark Spread.

Investment Policy of the Fund

In order to achieve the investment objective, the Fund will seek to track the total return performance of the iBoxx USD Corporates Investment Grade Spread Select Top 50% TCA Index (the "Reference Index") less fees, expenses and transaction costs. Further information on the components and selection criteria of the Reference Index is set out below under "**General Description of the Reference Index**".

In tracking the Reference Index, the Investment Manager applies a Sampling Strategy.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy, the Fund may also hold securities which are not component securities of the Reference Index, as set out in the Prospectus.

Further information in relation to how the Fund will seek to track the Reference Index is set out in the sections titled "**Investment Objective and Policies**" and "**Investment Restrictions and Permitted Investments**" in the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards and spot foreign exchange transactions. Further details on FDIs and how they may be used are set out in the section titled "**Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments**" in the Prospectus.

Further information relevant to the Fund's investment policy is set out in the sections titled "**Investment Objectives & Policies**" and "**Investment Restrictions and Permitted Investments**" in the Prospectus.

Investment Restrictions of the Fund

The general investment restrictions set out under "**Investment Restrictions and Permitted Investments**" in the Prospectus apply to the Fund.

The Fund shall not invest more than 10% of its net assets in other UCITS, open ended CIS or closed ended collective investment funds that meet the requirements of the Central Bank (and, in the case of closed ended collective investment funds, that qualify as transferable securities).

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Index Tracking

It is anticipated that the Tracking Error, as measured using the unhedged Share Classes, will be between 0% and 1.00% under normal market conditions. However, exceptional circumstances may arise which cause the Fund's Tracking Error to exceed 1.00%.

Efficient Portfolio Management

Further information on efficient portfolio management techniques that may be used by the Fund is contained in the "**Securities Financing Transaction**" section below and in the main body of the

Prospectus under the heading "**Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments**".

Securities Financing Transactions

The Fund may use certain Securities Financing Transactions, namely securities lending.

The type of assets that may be held by the Fund in accordance with its investment objective and policies and may be subject to such Securities Financing Transactions are bonds. The maximum proportion of the Fund's assets that may be subject to securities lending is 100%, and the expected proportion of the Fund's assets that may be subject to securities lending is between 0% and 30%. Please refer to the Prospectus section "Securities Financing Transaction" for further details.

Sustainability risks

The Fund is not classified as an Article 8 or Article 9 fund pursuant to SFDR. The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities outlined in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment.

As the Fund is passively managed, management of the portfolio does not include any separate integration of sustainability risks into the investment process. Sustainability risks were considered in the selection of the Reference Index for use by the Fund. However, as the main strategy of the Fund is to track the performance of the Reference Index, the Manager deems that further consideration of sustainability risks is not relevant to the strategy of the Fund.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the foreign exchange exposure in any hedged Share Classes (identified by "**Hdg**" in their names).

Further information on currency hedging at Share Class level is set out in the section titled "**Hedged Classes**" in the Prospectus.

Borrowing and Leverage

The ICAV on behalf of the Fund may borrow up to 10% of the Net Asset Value of the Fund on a temporary basis. Further information on borrowing and leverage is set out in the sections titled "**Borrowing and Lending Powers**" and "**Leverage**" in the Prospectus.

The ICAV will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund's total exposure to the Reference Index will be limited to 100% of Net Asset Value.

While it is not the Investment Manager's intention to leverage the Fund, any leverage resulting from the use of FDIs will be done in accordance with the Regulations.

Dividend Policy

Dividends will be declared on a quarterly basis for the Dist Shares, the EUR Hdg Dist Shares, the GBP Hdg Dist Shares, the CHF Hdg Dist Shares, the MXN Hdg Dist Shares, SEK Hdg Dist Shares and the HKD Hdg Dist Shares in accordance with the general provisions set out in the Prospectus under the heading "Dividend Policy" and Shareholders will be notified in advance of the date on which dividends will be paid. Distributions will not be made in respect of the Acc Shares, the EUR Hdg Acc Shares, the GBP Hdg Acc Shares, the CHF Hdg Acc Shares, the MXN Hdg Acc Shares, SEK Hdg Acc Shares and the HKD Hdg Acc Shares and income and other profits will be accumulated and reinvested.

Trading

Application will be made to the Euronext Dublin and/or the London Stock Exchange and/or Deutsche Borse and/or such other Relevant Stock Exchanges for listing and/or admission to trading of the ETF

Shares issued and available to be issued on the main market of each of the Relevant Stock Exchanges on or about the Launch Date. This Supplement and the Prospectus together comprise listing particulars for the purposes of trading on the main market of each of the Relevant Stock Exchanges.

Exchange Traded Fund

The Fund is an ETF. The ETF Shares of the Fund are fully transferable among investors and will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that ETF Shares will be bought and sold by private and institutional investors in the Secondary Market in the same way as the ordinary shares of a listed trading company.

The ICAV may also establish Non-ETF Shares in the Fund. Such shares will not be listed and/or traded on a Relevant Stock Exchange and it is not expected that an active secondary market in Non-ETF Shares will develop.

Investors should refer to the section of the Prospectus titled “Subscriptions and Redemptions” for information of how to deal in ETF Shares and Non-ETF Shares.

The following fees will be incurred on each Share by Shareholders (which accordingly will not be incurred by the ICAV on behalf the Fund and will not affect the Net Asset Value of the Fund):

GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index is designed to reflect the performance of USD denominated, investment grade rated corporate bonds, while aiming to provide a yield enhancement compared to the iBoxx USD Corporates Index (the "**Parent Index**"), by selecting the bonds with the highest Benchmark Spread within the Parent Index. The Parent Index provides exposure to the performance of USD denominated investment grade corporate bonds.

The Reference Index is further described below but only represents an extract of information available from public sources and neither the Directors, the Manager, S&P Dow Jones Indices GmbH or such other successor sponsor to the Reference Index (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

To be eligible for inclusion in the Reference Index, securities must be corporate credit, i.e., bonds backed by public or private corporate issuers. The securities must be rated investment grade (Baa3/BBB- /BBB- or higher) using the average rating of Moody's, S&P and Fitch. For more information on how the average rating is determined, please refer to the iBoxx Rating Methodology document available at <https://www.spglobal.com/spdji/en/> under Methodology.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in USD. Bonds must have fixed-rate coupon issues. To be eligible for inclusion in the Reference Index, corporate securities must have at least USD500mn par amount outstanding. To be eligible for inclusion in the Reference Index, eligible securities must have a remaining time to maturity of at least 18 months on the date of rebalancing.

Security types excluded from the Reference Index include but are not limited to: sinking funds and amortising bonds, other callable and undated bonds, fixed-to-floating securities, floating-rate issues, pay-in-kind bonds, collateralised debt obligations, collateralised loan obligations, collateralised mortgage obligations, private placements, retail bonds, structured notes, convertible bonds, bonds with differences between accrual and coupon payment periods and monthly paying bonds and extended bonds. The Reference Index may include SEC Rule 144A securities.

The constituents of the Reference Index are selected every quarter. At the quarterly index reconstitution (see details below), all securities in the Parent Index are grouped into 20 categories

depending on a combination of a security's remaining time to maturity (between 1-3, or 3-5, or 5-7, or 7-10, or >10 years) and its sector classification. For more information on how the Index Provider determines the 20 categories, please refer to the methodology of the Reference Index. Within their respective categories, securities are ranked based on their Benchmark Spread as determined by the Index Provider, where the security with the highest spread ranks first. The Index Provider then selects securities that rank in the top 50% based on their Benchmark Spread within each respective category to construct the Reference Index. The Index Provider also applies an approach that seeks to reduce turnover of the Reference Index, by favouring current securities that comprise the Reference Index at rebalance. The Reference Index is market value weighted. Corporate issuers that exceed 4.5% of the market value of the Reference Index are capped at 4.5%.

Capitalised terms used above and not defined herein are defined by the Index Provider. Further information on these terms and the Reference Index methodology can be found on the Index Provider's website. This document provides a summary of the principal features of the Reference Index; the complete description of the Reference Index shall at all times prevail.

Index Rebalancing

The Reference Index is reconstituted on a quarterly basis, in February, May, August and November, to screen and select eligible securities based on Benchmark Spread. The Reference Index otherwise rebalances monthly to remove ineligible securities based on criteria such as minimum amount outstanding and remaining time to maturity.

The Fund may choose, but is not obliged to, to rebalance in line with the Reference Index and will bear the costs of any rebalancing trades (i.e. the costs of buying and selling securities of the Reference Index and associated taxes and transaction costs).

Index Provider and Website

The Reference Index is sponsored by S&P Dow Jones Indices LLC and more details on the Reference Index can be found at: <https://indicesweb.ihsmarkit.com/iBoxx/Screener>

Publication

The level of the Reference Index will be published on: <https://indicesweb.ihsmarkit.com/iBoxx/Screener>.
