Outlook

In 2015 Neurosoft demonstrated a general growth continuing to benefit from its steady and effective business plan despite the fact that 2015 is the sixth continuous year of recession and unstable economic situation both in Greece and its market place.

In particular the outlook per business area is as follows:

1. Sports Betting & Gaming Analytics

As in 2014, this year, despite economic conditions in the markets of its customers, the company managed to achieve its main targets. In addition, the company continued to expand in the retail market and add new products in its sports betting portfolio.

2. Factoring and Financials

Neurosoft, through new innovative products, continued to maintain its dominant position in the Greek market and successfully continued to be aggressively engaged in international outreach activities, aiming to establish itself as a significant player in Western Europe.

In every aspect 2015 was an exceptional year.

4. Field Services

Field Services activities throughout the year continued to broaden the technical expertise of the entire personnel, undertaking to implement and support integrated and complex solutions. The respective manpower was significantly enhanced to cater for increasing customer demands both in terms of geographical coverage and technical competence as well.

Managed Security Services and managed IT outsourcing services were the cornerstone of development within the year. Niche market segments were targeted with specialized solutions and heavy R&D. Specific in-house product development opportunities were analysed and the process for delivering the first product in 2016 has already commenced.
