RATING ACTION COMMENTARY

Fitch Upgrades Unipol's IFS Rating to 'BBB+'; Outlook Stable

Thu 10 Jun, 2021 - 9:59 AM ET

Fitch Ratings - Frankfurt am Main - 10 Jun 2021: Fitch Ratings has upgraded UnipolSai Assicurazioni S.p.A.'s (UnipolSai) UnipolSai's Insurer Financial Strength (IFS) Rating to 'BBB+' from 'BBB'. Fitch has also upgraded UnipolSai and parent Unipol Gruppo S.p.A. (Unipol Gruppo, together Unipol) Long-Term Issuer Default Ratings (IDR) to 'BBB' from 'BBB-'. The Outlooks are Stable.

UnipolSai is Unipol Gruppo's main operating entity.

A full list of rating actions is below.

KEY RATING DRIVERS

The upgrade reflects Unipol's reduced asset concentration risk, following the reduction in the group's exposure to Italian sovereign debt in 2020. The upgrade also reflects improvement to Unipol's capitalisation in 2020 despite the adverse and volatile business and capital-market conditions caused by the coronavirus pandemic. We expect both asset concentration risk and capitalisation to be maintained at current levels in 2021. The ratings continue to reflect Unipol's strong profitability, moderate leverage and 'most favourable' business profile among rated peers.

Feedback

Fitch views Unipol's investment policy as prudent, with nearly 82% of the group's investment portfolio invested in good-quality fixed-income instruments at end-2020. Unipol's concentrated exposure to Italian sovereign debt significantly reduced in 2020 but remains high. Italian sovereign debt fell to 2.8x consolidated shareholders' equity at end-2020, and further decreased to 2.6x at end-1Q21, (2019: 3.5x, 2018: 4x) as a result of a de-risking initiative to protect the group's solvency capital from potential volatility of Italian government spreads. However, Unipol's reduced risky assets was more than offset by Fitch's downgrade of Italy in April 2020 that, under Fitch's insurance criteria, led to a deterioration of the group's risky assets ratio to 156% as at end-2020 (2019: 141%). This ratio slightly improved in 1Q21 to 146%.

Unipol's capital, as measured by Fitch's Prism Factor Based Model (Prism FBM), improved to 'Very Strong' based on end-2020 data from 'Strong' in 2019, due to very strong retained earnings. Fitch expects Unipol's Prism FBM score to remain 'Very Strong' in 2021. Unipol's solvency coverage was also very strong and improved to 216% at end-2020 from 187% at end-2019.

Fitch views Unipol's financial leverage ratio (FLR) as moderate for the group's ratings. In 2020, the FLR remained stable at 35%, following the issue of a EUR1 billion senior unsecured green bond by Unipol Gruppo (treated as 100% debt in FLR) and EUR500 million restricted Tier 1 notes by UnipolSai in 2H20 (100% equity). Unipol's FLR decreased to 32% at end-5M21, following the reimbursement of two subordinated notes totalling EUR562 million, in line with Fitch's expectations. We expect FLR to remain below 35% in 2021.

Fitch assesses Unipol's profitability as strong. The Fitch-calculated combined ratio improved to 87% in 2020 (93% in 2019), benefitting from significantly reduced claims frequency during lockdown in Italy. Fitch expects Unipol's underlying and net profitability to decline slightly in 2021 as general mobility recovers, but to remain strong and above pre-pandemic levels.

We assess Unipol's business profile as 'most favourable'. UnipolSai is the largest motor underwriter in Italy and the leader in the use of telematics in motor insurance. Unipol also has a strong market position in the Italian life insurance sector. The group has a strong franchise and can exploit its pricing power and strong distribution capabilities through its network of agencies and bancassurance agreements.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to positive rating action/upgrade:

--A reduction in Unipol's exposure to Italian sovereign debt to below 2.0x consolidated shareholders' equity on a sustained basis.

--A one-notch upgrade of Italy's Long-Term Local-Currency IDR.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

--A one-notch downgrade of Italy's Long-Term Local-Currency IDR is likely to lead to downgrade of Unipol's ratings by one to two notches.

--An increase in Unipol's exposure to Italian sovereign debt to above 3.5x consolidated shareholders' equity.

--A decrease in Unipol's Prism FBM score to the lower range of 'Strong' or FLR weakening to above 40% on a sustained basis.

BEST/WORST CASE RATING SCENARIO
