Throttling Mechanism Self certification

Self Certification declaration

Customer confirms that the certified application is fully conformant to all aspects of the new "throttling" mechanism. Based on this mechanism ("message cancel" methodology), incoming messages in the same second that exceed the maximum number of allowed messaged defined for their logical connectivity channel will be rejected and the system will be free to immediately process the first messages received in the following second(s).

Please refer to the SOLA12 Release notes: http://www.borsaitaliana.it/borsaitaliana/gestione-mercati/migrazioneidem/sola12releasenotes_pdf.htm

Customer also confirms that its application correctly receives and manages the rejection sent by the market in case the incoming messages in the same second exceed the maximum number of allowed messaged.

Please send to market-access@borsaitaliana.it this certification form filled with the following required information.

Participant/ISV Information

To be completed, by the firm/ISV owning the application.

Application Name:		Version:	
Application Owner:			
Contact Name:			
Venue(s) the Software connects to	IDEM ☐	LSEDM ☐	Curve Global ☐
Phone Number:		Email:	

Self Certification declaration

Participant/ISV should verify the expected behavior of new "throttling" mechanism implementation and send us the confirmation. No validation will be performed by Market Access Analyst.

Execution Date & Time Window	*Start Date/ time: DD/MM/YYYY 00:00*
	End Date/ time: DD/MM/YYYY 00:00
Overall Result:	*Please confirm the new "throttling" mechanism is supported*
General Comments:	*Please confirm the expected behavior as per official documentation*
