2. RATINGS

3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE/OFFER

Save for fees, if any, payable to the Dealer, and so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Notes and Calculation Agent of the Notes.

Société Générale will also ensure the roles of Collateral Agent and Securities Valuation Agent for the Notes.

The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Noteholders on the other hand cannot be excluded.

Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Notes or possession of non public information in relation with them) and those of the Noteholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Noteholders.

5. **INDICATION OF YIELD** (*Fixed Rate Notes only*)
Not Applicable

6. **HISTORIC INTEREST RATES** (*Floating Rate Notes only*)

7. **PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT**

- (i) **PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT**
(*Structured Notes only*)

The value of the Notes and the payment of a redemption amount to a Noteholder on the maturity date will depend on the performance of the underlying asset(s), on the relevant valuation date(s).

The value of the Notes is linked to the positive or negative performance of the underlying instrument.

The possibility of an optional redemption by the Issuer, on a predetermined date, is likely to have a negative effect on the market value of the Notes. Prospective investors should consider the reinvestment risk in light of other investments available at the time of the redemption.

Furthermore, this optional redemption at the sole discretion of the Issuer could prevent the Noteholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.

The terms and conditions of the Notes may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Notes allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the maturity date of the Notes, postpone the maturity date of the Notes, early redeem the Notes on the basis of the market value of these Notes, or deduct from any due amount the increased cost of hedging, and in each case without the consent of the Noteholders.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Notes are calculated by reference to certain underlying(s), the return of the Notes is based on changes in the value of the underlying(s), which may fluctuate. Prospective investors should be aware that these Notes may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.

In case of Secured Notes, there is no guarantee that following enforcement of the relevant pledge, the collateral proceeds available for distribution (or the value of the collateral assets available to be delivered) will be sufficient to pay all amounts due to investors. If there is any shortfall in amounts due to an investor then such investor shall have no further claim against the Issuer, but keep a claim against the Guarantor in respect of such amounts.

During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital.

Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.

The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.

- (ii) **PERFORMANCE OF RATE(S) OF EXCHANGE AND EXPLANATION OF EFFECT ON VALUE OF INVESTMENT** (*Dual Currency Notes only*)

The ECB should continue its accommodating monetary policy at least until the end of 2017, thereby maintaining market interest rates at low levels, in an environment where inflation should also remain low (although slightly above the rate observed in the region in 2016). In the United States, the Fed should continue its monetary tightening started in 2015, at a pace that will be dependent on the country's growth momentum, which could be strengthened by the first effects of the expansionary economic policy of the new US administration. Despite these diverging monetary policies, we should observe a slight steepening of the yield curve in both Europe and the United States, with a gradual increase in long-term rates.</p> <p>In emerging countries, growth in 2016 was moderate on the whole, and varied from region to region. This trend should continue in 2017, in particular with the continued shift in the Chinese growth model. However, commodity-producing countries should benefit from a moderate increase in commodity prices. In particular, oil prices should be supported by the production-limiting agreement signed within the OPEC at end-2016.</p> <p>It is also likely that 2017 will be marked by a highly uncertain geopolitical environment, following on from a certain number of events in 2016. Major elections will be held in several key European Union countries (the Netherlands, France and Germany), and the year will also see the kick-off of Brexit negotiations. In addition, several hotbeds of instability or tension (in the Middle East or the China Sea) could adversely affect the global economy, as could a potential deterioration in relations between certain</p>

major world powers (United States, Russia and China).

2017 should also see the stabilisation of the regulatory framework (Basel reforms, IFRS, etc.) and, for most banks, mark the end of the cycle of equity increases that began with the financial crisis. In this context, the challenge facing banks will nonetheless remain the development of a sustainable long-term growth model and the preservation of their capacity to finance the economy. Indeed, the addition of recent regulatory constraints will weigh on the profitability of certain banking activities and thus influence the strategy and development model of certain operators in the sector.

In Europe, due to the various elections to be held this year within the Eurozone, it is likely that 2017 will see little progress towards the third pillar of the Banking Union, regarding the creation of a European deposit guarantee facility. Ultimately, this facility will contribute to the stability and strengthening of the European banking sector, but could entail significant costs for banking players.

Lastly, banks must continue to adapt to a certain number of fundamental shifts, particularly the acceleration of technological changes, requiring them to radically transform their operational and relationship models. Moreover, the Group is working on a medium-term strategic plan, which will be disseminated towards the end of 2017.

D.6	Key information on the key risks that are specific to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it	<p>The possibility of an optional redemption by the Issuer, on a predetermined</p>

date, is likely to have a negative effect on the market value of the Notes. Prospective investors should consider the reinvestment risk in light of other investments available at the time of the redemption. Furthermore, this optional redemption at the sole discretion of the Issuer could prevent the Noteholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.

The terms and conditions of the Notes may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Notes allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the maturity date of the Notes, postpone the maturity date of the Notes, early redeem the Notes on the basis of the market value of these Notes or deduct from any due amount the increased cost of hedging, and in each case without the prior consent of the Noteholders.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Notes are calculated by reference to certain underlying(s), the return of the Notes is based on changes in the value of the underlying(s), which may fluctuate. Prospective investors should be aware that these Notes may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.

In case of Secured Notes, there is no guarantee that following enforcement of the relevant pledge the collateral proceeds available for distribution (or the value of the collateral assets available to be delivered) will be sufficient to pay all amounts due to investors. If there is any shortfall in amounts due to an investor then such investor shall have no further claim against the Issuer, but keep a claim against the Guarantor in respect of such amounts.

The Guarantee constitutes a general and unsecured contractual obligation of the Guarantor and no other person. Any payments on the Notes are also dependent on the creditworthiness of the Guarantor.

Prospective investors in Notes benefiting from the Guarantee should note that in case of payment default of an Issuer the entitlement of the Noteholder will be limited to (i) the sums obtained by making a claim under the Guarantee, and the relevant provisions of the Guarantee and they shall have no right to institute any proceeding, judicial or otherwise, or otherwise assert a claim against the Issuer (ii) and, in relation to Secured Notes only, from the sums obtained following enforcement of the relevant Pledge Agreement.

The Guarantee is a payment guarantee only and not a guarantee of the performance by the relevant Issuer or any of its other obligations under the Notes benefiting from the Guarantee.

Société Générale will act as issuer under the Programme, as the Guarantor of the Notes issued by the Issuer and also as provider of hedging instruments to the Issuer. As a result, investors will be exposed not only to the credit risk of the Guarantor but also operational risks arising from the lack of independence of the Guarantor, in assuming its duties and obligations as the Guarantor and provider of the hedging instruments.

The potential conflicts of interests and operational risks arising from such lack of independence are in part intended to be mitigated by the fact that different divisions within the Guarantor will be responsible for implementing the Guarantee and providing the hedging instruments and that each division is run as a separate operational unit, segregated by Chinese walls (information barriers) and run by different management teams.

The Issuer and the Guarantor and any of their subsidiaries and/or their

		<p>affiliates, in connection with their other business activities, may possess or acquire material information about the underlying assets. Such activities and information may cause consequences adverse to Noteholders.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates may act in other capacities with regard to the Notes, such as market maker, calculation agent or agent. Therefore, a potential conflict of interests may arise.</p> <p>In connection with the offering of the Notes, the Issuer and the Guarantor and/or their affiliates may enter into one or more hedging transaction(s) with respect to a reference asset(s) or related derivatives, which may affect the market price, liquidity or value of the Notes.</p> <p>During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.</p> <p>The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.</p>

La BCE dovrebbe proseguire con la propria politica monetaria accomodante almeno fino alla fine del 2017, mantenendo bassi i livelli dei</p>

tassi di interesse di mercato in un contesto in cui anche l'inflazione dovrebbe rimanere bassa (seppur leggermente superiore al tasso osservato nella regione nel 2016). Negli Stati Uniti, la Fed dovrebbe continuare la stretta monetaria avviata nel 2015 a un passo che dipenderà dall'andamento della crescita nel Paese e che potrebbe risentire positivamente dei primi effetti della politica economica espansiva inaugurata dalla nuova amministrazione statunitense. Nonostante l'adozione di politiche monetarie divergenti, si dovrebbe osservare una lieve crescita della curva dei rendimenti sia in Europa che negli Stati Uniti, con un graduale aumento dei tassi a lungo termine.

Nei Paesi emergenti, si è assistito nel 2016 a una crescita complessivamente moderata e diversificata da una regione all'altra. Tale tendenza dovrebbe proseguire anche nel 2017, segnatamente con la perdurante affermazione del modello di crescita cinese. Tuttavia, i Paesi produttori di materie prime dovrebbero beneficiare di un aumento moderato dei prezzi delle *commodity*. In particolare, i prezzi del petrolio beneficiari degli effetti prodotti dall'accordo relativo alla limitazione della produzione di greggio sottoscritto con l'OPEC alla fine del 2016.

E' inoltre probabile che, a seguito di una serie di eventi determinatisi nel 2016, il 2017 sarà caratterizzato da un contesto geopolitico molto incerto. In alcuni tra i principali Paesi dell'Unione Europea (Paesi Bassi, Francia e Germania) si terranno le elezioni politiche e saranno avviate le trattative relative alla Brexit. Inoltre, la presenza di vari focolai di instabilità o tensione (in Medio Oriente o nel Mar Cinese), come pur il potenziale deterioramento dei rapporti tra alcune delle maggiori potenze mondiali (Stati Uniti, Russia e Cina), potrebbero avere ripercussioni negative sull'economica globale.

Il 2017 dovrebbe vedere anche la stabilizzazione del quadro normativo (riforme di Basilea, IFRS, ecc.) e, per la maggior parte delle banche, segnare la fine della serie di ricapitalizzazioni iniziata con la crisi finanziaria. In tale contesto, la sfida per le banche sarà comunque caratterizzata dallo sviluppo di un modello di crescita a lungo termine sostenibile e dal mantenimento della capacità di finanziare l'economia. Infatti, l'introduzione dei recenti vincoli normativi peserà sulla redditività di alcune attività bancarie e quindi condiziona la strategia e il modello di sviluppo di alcuni operatori del settore.

In Europa, per via delle elezioni che si terranno quest'anno nell'Eurozona, è probabile che nel 2017 non si registreranno molti progressi verso il terzo pilastro dell'Unione Bancaria, in relazione alla creazione di un meccanismo europeo di garanzia dei depositi bancari. In definitiva, tale meccanismo contribuirà alla stabilità e al rafforzamento del settore bancario europeo, ma potrebbe generare costi significativi per i *player* bancari.

Infine, le banche dovranno continuare ad adattarsi a numerosi importanti cambiamenti, in particolare l'accelerazione degli sviluppi tecnologici, che comporteranno una radicale trasformazione dei loro modelli operativi e relazionali. Inoltre, il Gruppo sta elaborando un piano strategico a medio termine, la cui diffusione è prevista per la fine del 2017

D.6	Principali informazioni relative ai principali rischi	La possibilità di un rimborso opzionale da parte dell'Emittente, in una data predeterminata, probabilmente avrà un impatto negativo sui valori di

<p>specifici dei titoli e avvertenze in merito ai rischi di perdita del valore di tutto o parte del proprio investimento da parte degli investitori</p>	<p>mercato delle Notes. I potenziali investitori devono considerare il rischio di reinvestimento alla luce degli altri investimenti disponibili al momento del rimborso. Inoltre, questo rimborso opzionale a discrezione dell'Emittente potrebbe impedire al Portatore delle Notes di beneficiare della performance degli strumenti sottostanti su tutto il periodo inizialmente immaginato.</p> <p>I termini e le condizioni delle Notes possono prevedere disposizioni ai sensi delle quali il verificarsi di determinate turbative di mercato potrebbe comportare ritardi nel regolamento delle Notes ovvero determinate modifiche. Inoltre, nel caso di eventi che interessino gli strumenti sottostanti, i termini e le condizioni delle Notes consentono all'Emittente di sostituire gli strumenti sottostanti con strumenti sottostanti nuovi, cessare l'esposizione alle attività sottostanti e applicare un tasso di riferimento ai proventi così ottenuti fino alla data di rimborso delle Notes, prorogare la data di rimborso delle Notes, rimborsare anticipatamente le Notes sulla base del relativo valore di mercato, o detrarre da qualunque importo dovuto il maggiore costo di copertura, e in ciascun caso senza in consenso dei Portatori delle Notes.</p> <p>In caso di Notes Garantite, non vi è alcuna garanzia che a seguito dell'escussione del relativo pegno, i proventi del collaterale disponibili per la distribuzione (o il valore degli asset collaterali disponibili per la consegna) siano sufficienti a pagare tutti gli importi dovuti agli investitori. Nel caso in cui vi sia un ammanco negli importi da versare a un investitore, tale investitore non potrà far valere alcuna azione nei confronti dell'Emittente, ma potrà solo mantenere la propria azione nei confronti del Garante in relazione a tali importi.</p> <p>I pagamenti (sia in relazione alla linea capitale sia agli interessi, e sia a scadenza che altrimenti) relativi alle <i>Notes</i> sono calcolati con riferimento a uno o più sottostanti, il rendimento delle <i>Notes</i> si basa sulle variazioni del sottostante, il quale può cambiare. Si richiama l'attenzione dei futuri investitori sul fatto che le <i>Notes</i> potrebbero essere volatili e che gli investitori potrebbero non percepire alcun interesse e perdere tutto il o una parte sostanziale del capitale.</p> <p>La Garanzia costituisce un'obbligazione contrattuale generale e non garantita del Garante e di nessun altro soggetto. Qualsiasi pagamento inerente alle Notes è correlato altresì all'affidabilità creditizia del Garante.</p> <p>Si richiama l'attenzione di coloro che desiderano investire nelle Notes che beneficiano della Garanzia, sul fatto che, in caso di mancato pagamento da parte di un Emittente, gli importi cui hanno diritto i Portatori delle Notes si limiteranno agli importi ottenuti tramite un'apposita azione da promuoversi ai sensi della Garanzia in conformità ai relativi termini, e non avranno alcun diritto di istituire alcun procedimento, di natura giudiziaria o altrimenti, né di avanzare alcuna pretesa nei confronti dell'Emittente e, in relazione alle sole Notes Garantite, agli importi ottenuti a seguito dell'escussione del relativo Atto di Pegno.</p> <p>La Garanzia è una mera garanzia di pagamento e non una garanzia relativa alla performance dell'Emittente rilevante né ad alcuno degli altri obblighi dello stesso ai sensi delle Notes, che beneficiano della Garanzia.</p> <p>Société Générale opererà in qualità di emittente ai sensi del Programma, di Garante delle Notes emesse dall'Emittente e di fornitore di strumenti di</p>

		<p>copertura per l'Emittente. Di conseguenza, gli investitori saranno esposti non solo al rischio di credito del Garante, ma anche ai rischi operativi derivanti dalla mancanza di indipendenza del Garante con riguardo all'assunzione dei propri doveri e obblighi in qualità di Garante e fornitore di strumenti di copertura.</p> <p>I potenziali conflitti di interesse e i rischi operativi derivanti da tale mancanza di indipendenza dovrebbero in parte essere mitigati dal fatto che all'interno del Garante, l'implementazione della Garanzia e la fornitura di strumenti di copertura compente a divisioni differenti, ognuna gestita come unità operativa distinta, segregata da barriere informative (i cosiddetti Chinese Walls) e gestita da team diversi.</p> <p>L'Emittente e il Garante, e qualunque delle rispettive controllate e/o affiliate, in relazione alle altre rispettive attività commerciali, potrebbero essere in possesso di, o acquisire, informazioni rilevanti in merito alle attività sottostanti. Tali attività e informazioni potrebbero comportare conseguenze negative per i Portatori delle Notes.</p> <p>L'Emittente e il Garante e qualunque delle rispettive controllate e/o affiliate potrebbero operare in altre vesti in relazione alle Notes, ad esempio in qualità di market maker, agente per il calcolo o agente. Pertanto, potrebbero verificarsi potenziali conflitti di interesse.</p> <p>In relazione all'offerta delle Notes, l'Emittente e il Garante e/o le rispettive affiliate potrebbe stipulare uno o più operazioni di copertura con riguardo a uno o più attività di riferimento o relativi derivati, suscettibili di incidere sul prezzo di mercato, sulla liquidità o sul valore delle Notes.</p> <p>Nel corso della vita delle Notes, il valore di mercato delle stesse potrebbe risultare inferiore al capitale investito. Inoltre, in caso di insolvenza da parte dell'Emittente e/o del Garante potrebbe verificarsi la perdita totale del capitale investito.</p> <p>Si richiama l'attenzione degli investitori sul fatto che potrebbero incorrere nella perdita totale o parziale del proprio investimento.</p>
