INVESTMENT OBJECTIVES AND POLICIES

The investment objective of the Fund is to replicate the performance of the FTSE EPRA Nareit Developed Green EU PAB Index (the “**Index**”), while minimising as far as possible the tracking error between the Fund’s performance and that of the Index. In replicating the performance of the Index, the Fund promotes certain environmental, social and/or governance characteristics (as set out in the section titled “Index Description”) and has been categorised as an Article 8 fund for the purpose of the SFDR. Information on the Index’s characteristics and the determination of sustainable investments is set out under the section titled “**Index Description**” below.

The Index is constructed from the FTSE EPRA Nareit Developed Index (the “**Parent Index**”), The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. In doing so, the Index excludes companies involved in certain business activities. In addition, the Index also applies green building certification and energy usage targets. Further detail is provided under the section titled “Index Description” section of the Supplement.

In seeking to achieve its investment objective, the Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index.

However, there may be circumstances when it is not possible or practicable for the Fund to invest in all constituents of the Index. Such circumstances may include (but are not limited to): (i) a limited availability of the Index constituents; (ii) trading suspensions on constituents of the Index; (iii) cost inefficiencies; (iv) if the assets under management of the Fund are relatively small, or (v) where there are internal or regulatory driven trading restrictions (as detailed in the “Investment Restrictions” and “Investment Restrictions – Other Restrictions” sections of the Prospectus) that apply to the Fund or Investment Manager but not the Index.

As a result of not investing in some of the Index constituents, the Fund may: (i) gain exposure indirectly through other assets or instruments (including, (a) American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts which are certificates typically issued by a bank or trust company evidencing ownership of shares of a non-US issuer; (b) Eligible Collective Investment Schemes that have a similar investment objective and strategy to the Fund, including schemes managed by the Investment Manager or its affiliates; or (c) financial derivative instruments (“**FDI**”)) which, in the opinion of the Investment Manager, will assist in achieving the Fund’s investment objective and are alternatives to directly purchasing the underlying securities included in the Index and/or (ii) hold the investible Index constituents in different proportions to the Index and/or (iii) invest in securities which are not constituents of the Index which, in the opinion of the Investment Manager, are expected to provide similar performance and risk characteristics to the uninvestable Index constituents and/or (iv) hold cash or cash equivalents. The Fund may not invest more than 10% of its net assets in Eligible Collective Investment Schemes.

Most of the securities in which the Fund invests will be listed or traded on Recognised Markets, as defined in the Prospectus. Accordingly, the underlying exposure is to the issuers of equity securities and REITs included in the Index. The indicative net asset value per Share is available on at least one major market data vendor terminal such as Bloomberg, as well as on a wide range of websites that display stock market data, including www.reuters.com.

The Fund may use the following FDI: futures, forwards, foreign exchange contracts (including spot and forward contracts), equity options and total return swaps which may be used to reduce tracking error between the Fund’s performance and that of the Index. These instruments may be used for efficient portfolio management and/or investment purposes. The primary policy of the Fund is to acquire securities included in the Index, as described above, but FDI may be used where the direct holdings of securities may not be possible or where tracking error can be better minimised by using FDI.

To the extent that the Fund uses FDI, there may be a risk that the volatility of the Fund may increase. However, the Fund is not expected to have an above average risk profile as a result of its use of or

investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in "**Use of Financial Derivative Instruments**" in the Prospectus. Accordingly, although FDI may be inherently leveraged, the primary purpose of the use of FDI is to reduce tracking error and / or hedge currency exposure, and, although the Fund will be leveraged as a result of its investments in FDI, the Fund's global exposure (as prescribed in the Central Bank UCITS Regulations) relating to FDI, calculated using the commitment approach, must not exceed 100% of the Fund's total Net Asset Value. The Fund does not intend to invest in warrants, but it is possible that the Fund will hold warrants due to corporate actions.

Efficient portfolio management refers to techniques and instruments which relate to transferable securities which fulfil the following criteria: They are economically appropriate in that they are realised in a cost-effective way and investment decisions involving transactions that are entered into for one or more of the following specific aims: (i) the reduction of risk (e.g. to perform an investment hedge on a portion of a portfolio); (ii) the reduction of cost (e.g. short term cash flow management or tactical asset allocation); and (iii) the generation of additional capital or income for the Company with an appropriate level of risk, taking into account the risk profile of the Fund as described in this Supplement and the Prospectus and the general provisions of the UCITS Regulations. In particular, FDI may be used for the purpose of minimising tracking error, i.e. the risk that the Fund return varies from the Index return. Equity futures, index futures and currency futures may be used to hedge against market risk or to gain exposure to an underlying market. Forward contracts may be used to hedge or to gain exposure to an increase in the value of an asset, currency or deposit. Foreign exchange contracts may be used to convert the currency of the underlying investments of each Fund into the Base Currency and to hedge the dividends received in a currency other than the Base Currency between the ex date and the pay date. Equity options may be used to hedge or achieve exposure to a particular market instead of using a physical security. Total return swaps may be used to hedge or achieve exposure to a particular stock instead of using a physical security.

The Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations and may be in a position to hold up to 35% of the Fund's Net Asset Value in one constituent of the Index issued by the same body, where due to exceptional market conditions (i.e. the issuer represents an unusually large portion of this market measured by the Index).

The Directors may exercise all borrowing powers of the Company in accordance with the 'Borrowing Policy' section in the Prospectus. Such borrowing will be temporary and will not exceed 10% of the Net Asset Value of the Fund.

The tracking error is the annualised standard deviation of the difference between the monthly (or daily) returns of the Fund and the Index.

A series of factors may give rise to tracking error:

- Transaction costs, operating expenses, custody costs, taxes, as a result of changes in the investments of the Fund and re-weightings of the Index, corporate actions, currency fluctuations, cash flows into and out of the Fund from dividend/reinvestments and any costs and expenses which are not taken into account in the calculation of the Index.
- Internal restrictions, such as the HSBC Global Asset Management Banned Weapons Policy (as detailed in the Prospectus section: Investment Restrictions - Other Restrictions) or other market or regulatory driven trading restrictions that apply to a Fund but not the relevant Index.

Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the returns of the Index.

The Fund is passively managed. There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced exactly. As the Fund is passively managed, the Investment Manager cannot integrate sustainability risks into the investment process as it does not exercise investment discretion. For further information, please refer to "**Integration of Sustainability Risks**" in the Prospectus.

The anticipated tracking error is the expected standard deviation of the differences between the returns of the Fund and the Index.

As at the date of this Supplement, the anticipated tracking error for the Fund is expected to be up to 0.20% in normal market conditions. Divergences between anticipated and realised tracking error will be explained in the annual report for the relevant period.

The anticipated tracking error for the Fund is not a guide to future performance.

The volatility level of the Fund will have a strong correlation to the volatility level of the Index.

Total Return Swaps and Securities Lending

The Fund may engage in securities lending subject to the requirements of the Securities Financing Transactions Regulation, the UCITS Regulations and the Central Bank UCITS Regulations. This is more particularly described in the Prospectus under the heading "*Total Return Swaps and Securities Lending*". Up to 30% of the Fund's net assets may be subject to securities lending arrangements at any one time, however the amount subject to securities lending arrangements is not generally expected to exceed 0 – 25% of the Fund's net assets. Furthermore, the Fund may invest up to 10% of its net assets in total return swaps, however such investments are not generally expected to exceed 5% of the Fund's net assets.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described under "**Risk Factors**" in the Prospectus and the specific risk factors set out below. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisors before making an application for Shares. Investment in the Fund is not for investors who cannot afford to lose all or a significant part of their investment.

An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund.

FDI

In the event the Fund uses FDI for efficient portfolio management or investment purposes, such use may increase the risk profile of the Fund.

For information in relation to the risks associated with the use of FDI, please refer to the "**Risk Factors – Particular Risks of Financial Derivative Instruments**" section of the Prospectus.

The Index

An investment in the Fund exposes an investor to the market risks associated with fluctuations in the Index and the value of securities comprised in the Index. The value of the Index can increase as well as decrease and the value of an investment will fluctuate accordingly. There is no guarantee that the Fund's investment objective will be achieved. The Fund is subject to tracking error, as described in the Prospectus, which is the risk that its returns may not correlate accurately to those of the Index. Furthermore, any re-weighting of the Index may increase the risk of tracking error.

The past performance of the Index should not be seen as an indication of the future performance of the Index or the Fund.

Investments in Real Estate Companies

The Fund may purchase interests in real estate companies that invest primarily in the ownership, trading and development of income-producing real estate. The value of interests in real estate companies may be affected by the value of the underlying real estate assets. The value of the underlying real estate assets will generally be a function of the revenues generated by such assets and any capital

appreciation or depreciation. Revenues and capital appreciation may be adversely affected by development patterns, increases in real estate taxes, operating expenses and energy costs, changes in patterns of employment, transportation and land utilisation, and adverse changes in interest rates, tax laws and environmental laws and regulations. Any of these factors may reduce the value of an underlying asset and therefore adversely affect returns to the real estate companies and adversely impact the value of the real estate companies. There can be no assurance that the underlying real estate assets will produce anticipated cash flows or that there will be any capital appreciation in the underlying real estate assets. However, investing in real estate companies is not equivalent to investing directly in property and the performance of real estate companies may be more heavily dependent on the general performance of stock markets than the general performance of the property sector.

Real Estate Investment Trusts

The Fund may purchase interests in REITs in developed markets, as determined by the Index Provider. REITs are trusts that invest primarily in commercial real estate or real estate-related loans. The value of interests in REITs may be affected by the value of the property owned or the quality of the mortgages held by the trust. The ability to trade REITs in the secondary market can be more limited than other shares or securities that may be listed on or traded on Regulated Markets.

In such an event the investor shall indemnify the Company and the Administrator for any loss suffered as a result of the investor's failure to transmit subscription monies in a timely fashion. The Depositary is not liable for any loss suffered due to the late payment of subscription proceeds to the Fund.

CONVERSIONS

A conversion request will be treated as a cash redemption request in respect of the original Class of Shares and as a cash subscription application in respect of the new Class of Shares in this Fund or in any other sub-fund of the Company. On this basis and provided the original Class of Shares and the new Class of Shares have the same base currency, Shareholders will be entitled on any Dealing Day to apply to convert any or all of their Shares of any Class in the Fund into Shares of another Class in the Fund or any other sub-fund of the Company except where dealings in the relevant Shares have been temporarily suspended in the circumstances described in the Prospectus and where the Dealing Deadlines are different for the Class of Shares in the sub-funds of the Company being converted. Please refer to the terms and conditions regarding subscriptions and redemptions of the relevant Fund Supplements.

When requesting the conversion of Shares as an initial investment in a sub-fund of the Company, Shareholders should ensure that the aggregate Net Asset Value per Share of the Shares converted is equal to or exceeds any minimum holding for the relevant sub-fund. In the case of a conversion of a partial holding only, the value of the remaining holding must also be at least equal to any minimum holding for the relevant sub-fund. If the number of Shares of the new Class to be issued on conversion is not an integral number of Shares, the Company may issue fractional Shares of the new Class or return the surplus arising to the Shareholder seeking to convert the Shares of the original Class.

Conversions will attract a Conversion Transaction Fee, being the fee payable to the Administrator as agent for the Company where, as part of a conversion of Shares, Shares are redeemed for cash and subsequently invested for cash in a different sub-fund of the Company. The fee payable is deducted from the redemption proceeds at the same rate as the Conversion Transaction Fee as specified in the relevant Fund Supplement of the subscribed for sub-fund.

REDEMPTIONS

Shareholders may effect a redemption of Shares at the Net Asset Value per Share less an appropriate provision for Duties and Charges on any Dealing Day, provided that a written redemption request is signed by the Shareholder and received by the Administrator no later than the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the “**Subscriptions, Valuations and Redemptions**” section of the Prospectus. Settlement for cash transactions will take place in accordance with the Prospectus and settlement of in-kind transactions will take place within 10 Business Days of the relevant Dealing Day.

As per the provisions set out in the Prospectus, redemptions proceeds (in-kind and/or in cash) will only be released where the Administrator holds full original anti-money laundering documentation.

For details of the fees and expenses payable by the Fund please refer to the “**Fees and Expenses**” section in the prospectus.

The total annual fees and operating expenses of the Classes (except for transaction charges and taxes or duty charges for portfolio re-balancing, all of which are paid separately out of the assets of the Fund) (the “**Total Expense Ratio**” or “**TER**”) are shown in the table below. The TER shall accrue daily and be payable monthly in arrears. The Management Company will absorb (by reimbursement to the account of the Fund) any additional fees, costs or expenses over the Total Expense Ratio. The fees, costs and expenses which the Total Expense Ratio covers are set out in the next paragraph.

INDEX DESCRIPTION

This section is a summary of the principal features of the FTSE EPRA Nareit Developed Green EU PAB Index (the "Index") and is not a complete description of the Index.

General

The Fund will aim to replicate the net total return performance of the Index.

The Index is based on the FTSE EPRA Nareit Developed Index (the "**Parent Index**") which comprises the eligible universe from which the Index is constructed. The Parent Index is designed to track the performance of listed real estate companies and REITS in developed markets and forms part of the FTSE EPRA Nareit Global Real Estate Index Series. The Index supports investors wanting to integrate sustainable investment considerations into their listed real estate portfolio.

The Parent Index (and the Index) comprises listed equity securities which are free-float adjusted and subject to semi-annual liquidity testing by way of median daily trading volumes ("**MDTV**"). Prospective new constituents will be tested by way of MDTV for liquidity each quarter.

Securities which do not turnover at least 0.05% of their shares in issue (after adjustments for free float) based on their MDTV per month in ten of the twelve months prior to a full market review, will not be eligible for inclusion in the Index. An existing constituent must turnover at least 0.04% of its shares in issue (after the application of any free float weightings) based on its MDTV per month for at least eight of the twelve months prior to a full market review. Where an existing constituent fails this test, the last six months of the testing period will be assessed on a pro-rata basis. Constituents must meet the required turnover levels at least four out of the last six months. Existing constituents which fail both tests will be removed from the Index.

Neither the Parent Index nor the Index has a market capitalisation bias. However, prospective constituents are assessed for inclusion and existing constituents are assessed for exclusion based on thresholds related to the percentage of market capitalisation in each region comprising the Parent Index and Index, respectively, as further described in the Index methodology. This is to ensure that the Index includes or excludes, as relevant, securities whose market capitalisation has significantly increased or diminished while continuing to be representative of the market measured by the Index.

For further information on the size and liquidity criteria, please refer to the website of the Index provider.

The Index follows the FTSE EPRA Nareit Green Index Series ground rules meaning that, at each Index review date, companies are screened based on a list of baseline, climate activity and conduct-related exclusions, as described below. Companies deriving any revenues from the baseline or climate activity exclusions are removed from the Index.

Baseline exclusions

- Controversial weapons
- Tobacco

Climate activity exclusions

- Thermal Coal Power Generation
