---

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in the Fund.

The Directors of the Company whose names appear both on the Company's directorship register and under the heading "Management of the Company" in the Prospectus accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Save as disclosed in this Supplement, there has been no significant change and no significant new matter has arisen since publication of the Prospectus.

Application has been made for all of the Shares issued and to be issued to be traded on Borsa Italiana and Xetra. The Fund constitutes a new fund of the Company and the Shares will be allocated to the Fund as and when issued.

It is expected that dealings in the Shares will commence on or about 2 June 2026.

The date of this Supplement No. 3 is 1 December 2025.

To the extent that there is any inconsistency between this Supplement and the Prospectus, this Supplement shall prevail.

## DEFINITIONS

"*Account Opening Form*", such account opening form or application form (as the context requires) as the Directors may prescribe, to be completed by the Authorised Participant for the purposes of opening a Primary Market dealing account in relation to the Fund; or to be completed by the Common Depository's Nominee for the purposes of applying for Shares to be issued in its name and to include authorisation for the Company to deal with Authorised Participants (as applicable).

"*Accumulating Share Class*", a Share Class designated as being "Accumulating" in the list of Share Classes listed under the heading "Introduction" of this Supplement or "Acc" in the "Current Share Classes" table of this Supplement and in respect of which income and other profits will be accumulated and reinvested.

"*AMF ESG Rules*", the position and recommendation DOC-2020-03 of the French Autorité des Marchés Financiers (AMF). For further information please refer to <https://www.amf-france.org/en/regulation/policy/doc-2020-03>.

"*Authorised Participant*", a market maker or broker entity which is registered with the Company as an authorised participant and therefore able to deal on the Primary Market for Shares in the Fund.

"*Base Currency*", the base currency of the Fund, which is Euro (€).

"*Central Bank*", the Central Bank of Ireland.

"*Central Bank UCITS Regulations*", Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as may be amended or replaced.

"*Central Securities Depositories*", such Recognised Clearing Systems which are national settlement systems for individual national markets. The Central Securities Depositories will be Participants in the International Central Securities Depositories.

"*Clearstream*", Clearstream Banking, Société Anonyme, Luxembourg and any successor in business thereto.

"*Common Depository*", the entity appointed as a depository for the International Central Securities Depositories, currently Citibank Europe plc, having its registered office at 1 North Wall Quay, Dublin 1.

"*Common Depository's Nominee*", the entity appointed as nominee for any Common Depository and as such acts as the registered holder of the Shares in the Fund, currently Citivic Nominees Limited.

"*Company*", iShares III plc.

"*Currency Hedged Share Class*", a Share Class which allows the use of hedging transactions to reduce the effect of exchange rate fluctuations as described under the heading "Currency Hedged Share Classes" in "Current Share Classes" table of this Supplement.

"*Current Share Classes*", the Share Classes of the Fund available for launch at the discretion of the Manager as at the date of this Supplement as listed in the "Current Share Classes" table of this Supplement.

"*Dealing Day*", in general each Business Day will be a Dealing Day. However, some Business Days will not be Dealing Days where, for example, markets on which the Fund's Investments are listed or traded are suspended or closed or where there is a public holiday in the relevant jurisdiction in which a delegate of the Investment Manager is based provided there is at least one Dealing Day per fortnight, subject always to the Directors' discretion to temporarily suspend the determination of the Net Asset Value and the sale, switching and/or redemption of Shares in the Company or the Fund in accordance with the provisions of the Prospectus and the Articles. The Investment Manager produces dealing calendars which detail in advance the Dealing Days for the Fund. The dealing calendar may be amended from time to time by the Investment Manager where, for example, the relevant market operator, regulator or exchange (as applicable) declares a relevant market closed for trading and/or settlement (such closure may be made with little or no notice to the Investment Manager). The dealing calendar for the Fund and each Share Class within the Fund) is available from the Investment Manager.

"*Distributing Share Class*", a Share Class designated as being "Distributing" in the list of Share Classes listed under the heading "Introduction" of this Supplement or "Dist" in the "Current Share Classes" table of this Supplement and in respect of which distributions of income will be declared.

"*Electronic Order Entry Facility*", the website facility which may be used by Authorised Participants to submit dealing requests in respect of Shares in the Fund and to obtain information in relation to the dealing procedures.

"*Euroclear*", Euroclear Bank S.A./N.V. and any such successor in business thereto.

"*Euronext*", Euronext N.V.

"*European MiFID Template*" or "*EMT*", a template developed by FinDatEx and maintained on <https://findatex.eu/> for the purposes of communicating by product manufacturers to distributors information on the target market and costs of financial products.

"*FDI*", financial derivative instruments.

"*Fund*", iShares AT1 Bond Active UCITS ETF; a reference to the "Fund" shall, in the context where no particular Share Class is specified, include all Share Classes attributable to the Fund.

"*Global Share Certificate*", means the certificate evidencing entitlement to the Shares issued pursuant to the Memorandum and Articles and the Prospectus, described in further detail under the section titled "Global Clearing and Settlement" in the Prospectus.

"*International Central Securities Depositories*", such Recognised Clearing Systems used by the Fund issuing its Shares through the International Central Securities Depository settlement system, which is an international settlement system connected to multiple national markets, and which includes Euroclear and/or Clearstream.

"*Investment*", any investment authorised by the Memorandum which is permitted by the Regulations and the Articles.

"*KIID*" or "*KID*", the key investor information document issued in respect of the Fund pursuant to either the Regulations or the PRIIPs Regulation, as may be amended from time to time.

"*Launched Share Class*", a Share Class in existence and available for investment.

"*LSE*", the London Stock Exchange, a division of the London Stock Exchange Group plc.

"*OTC*", over the counter.

"*Participants*", account holders in an International Central Securities Depository, which may include Authorised Participants, their nominees or agents and who hold their interest in Shares settled and/or cleared through the applicable International Central Securities Depository.

"*Paying Agent*", the entity appointed to act as paying agent to the Fund.

"*Portfolio Composition File*", the file setting out the Investments and Cash Component which may be transferred to the Fund, in the case of subscriptions, and by the Company, in the case of redemptions, in satisfaction of the price of Shares thereof. Each Share Class of the Fund will have a Portfolio Composition File, which may (but need not) differ from the Portfolio Composition Files for other Share Classes within the Fund.

"*PRIIPs Regulation*", Regulation (EU) No.1286/2014 of the European Parliament and of the Council of 26 November 2014 as may be amended or replaced.

"*Primary Market*", the off exchange market whereon Shares of the Fund are created and redeemed directly with the Company.

"*Regulations*", European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 as may be amended or replaced.

"*SFDR*", Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

"*Share*", a participating share of no par value in the Fund or any Share Class representing a participation in the capital of the Company and carrying rights attributable to the Fund or Share Class, issued in accordance with the Articles and with the rights provided for under the Articles.

"*Share Class*", any class of Share attributable to the Fund and carrying rights to participate in the assets and liabilities of the Fund, as further described below under the "Introduction" section of this Supplement.

"*Shareholder*", the registered holder of a Share in the Fund.

"*SIX*", SIX Swiss Exchange.

"*Taxonomy Regulation*", Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088.

"*Valuation Currency*", in respect of a Share Class, the currency in which a class of Shares is priced by the Administrator and in which such Shares are denominated.

"*Xetra*", Deutsche Börse Xetra, in Frankfurt, Germany.

All other defined terms shall bear the same meaning as are ascribed thereto in the Prospectus.

## INTRODUCTION

The Company is an open-ended investment company with variable capital and having segregated liability between its funds organised under the laws of Ireland. The Company was authorised by the Central Bank as a UCITS for the purposes of the Regulations on 6 March 2008, to offer pooled investment. The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different classes of shares with one or more classes representing a separate fund of the Company. Each fund may have more than one share class. Other funds of the Company are set out in Appendix I to this Supplement.

Each fund of the Company comprises a distinct portfolio of Investments. The shares of each fund of the Company may be issued with different rights, features and on different terms and conditions to those of the other funds. Shares of the Fund may be divided into different Share Classes with different dividend policies, currency hedging and Valuation Currencies and may therefore have different fees and expenses.

The Prospectus sets out information that applies to each and every fund of the Company. This includes risk factors that apply to investing in funds, the management and administration of the funds by the Company, fund valuations, procedures for subscriptions, redemptions and transfers of shares in the funds, details of fees and expenses payable by the funds and taxation of shares in the funds. The Prospectus also contains information from the Company's Articles of Association.

This Supplement contains specific information relating to the Fund, including details of how to buy and sell Shares and the settlement system used by the Fund. The Base Currency of the Fund is Euro (€). The types of Share Classes that may be made available by the Company in the Fund are set out below.

<b>Income Treatment</b>	<b>Share Class Valuation Currency</b>	<b>Hedged / Unhedged</b>	<b>Currency into which the Share Class is Hedged</b>
Accumulating	Base Currency	Unhedged	N/A
Accumulating	Base Currency	Hedged	The same as the Valuation Currency
Accumulating	Differs from the Base Currency	Unhedged	N/A
Accumulating	Differs from the Base Currency	Hedged	The same as the Valuation Currency
Distributing	Base Currency	Unhedged	N/A
Distributing	Base Currency	Hedged	The same as the Valuation Currency
Distributing	Differs from the Base Currency	Unhedged	N/A
Distributing	Differs from the Base Currency	Hedged	The same as the Valuation Currency

Currency Hedged Share Classes offered in the Fund aim to reduce the impact of exchange rate fluctuations between the Base Currency of the Fund and the Valuation Currency of a Currency Hedged Share Class, on returns of the Fund to investors in that Share Class, through entering into foreign exchange contracts for currency hedging.

For details of the Share Classes in the Fund that have launched and for those currently available at the Manager's discretion, please refer to the tables below under the heading "Current Share Classes". Additional classes of Shares, including Share Classes of the type not currently listed above, may be added by the Company to the Fund in the future, at its discretion, in accordance with the requirements of the Central Bank. The creation of additional Share Classes will not result in any material prejudice to the rights attaching to existing Share Classes. Details of the Share Classes available for subscription, and to which different fee structures may apply, may be set out in separate Supplements. In addition, a list of all Funds and issued Share Classes thereof will be set out in the annual and semi-annual reports of the Company.

Please note that if you hold a Share Class and you wish to change your holding to a different Share Class of the same Fund, any such change may be treated by tax authorities as a redemption and sale and may be a realisation for the purposes of capital gains taxation.

Please refer to the "Risk Factors" section of this Supplement for the specific risks associated with investment in a Share Class of the Fund.

Potential investors in the Fund should read the Fund's KIID or KID. Potential investors in the Fund should also read this Supplement in conjunction with the Prospectus, which is available, free of charge, from the Administrator or the Investment Manager or from the official iShares website ([www.iShares.com](http://www.iShares.com)). All terms and conditions relating to the Company generally as set out in the Prospectus apply to the Fund, save as set out in this Supplement.

Potential investors should also refer to the Company's most recent annual and semi-annual reports (if any) which contain information on the financial performance of the funds of the Company and form part of the Prospectus.

Upon issue the Shares will be traded on Borsa Italiana and Xetra. It is also intended that the Shares of the Fund will be listed and admitted to trading on a number of other stock exchanges including, without limitation, LSE, Euronext and SIX.

### **Profile of a Typical Investor**

The Fund is suitable for: (a) professional investors, (b) "advanced investors" as prescribed in the EMT (including retail investors who qualify as such), and (c) "informed investors" as prescribed in the EMT (including retail investors who qualify as such) who, in each case, can (i) bear loss of capital; (ii) have specific knowledge or experience of investing in the underlying assets of the Fund; (iii) have experience of investing in similar products; and (iv) seek a fund offering with a similar risk and return profile to that of the Fund, in each case seeking to achieve investment objectives which align with those of the Fund in the context of the investor's overall portfolio. For the avoidance of doubt, the Fund is not suitable for "basic investors" as prescribed in the EMT, being investors who have a basic knowledge of the relevant financial instruments and no financial industry experience.

Investors are expected to be able to make an investment decision based on the information set out in this Supplement, the Prospectus and the Fund's KIID / KID. In addition, investors should consider obtaining professional advice. Investors should also be able to bear capital and income risk and view an investment in the Fund as a medium to long term investment.

**An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be suitable for all investors. Please refer to the "Risk Factors" section for further details.**

### **INVESTMENT OBJECTIVE AND POLICIES**

#### **Investment Objective**

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, by primarily investing in additional tier 1 ("**AT1**") bonds.

#### **Investment Policy**

The Fund is actively managed. In order to achieve its investment objective, the Fund will invest at least 80% of its total assets in AT1 bonds denominated in different currencies and issued by banks domiciled in developed markets globally. AT1 bonds are described in further detail below.

The Fund will seek to identify AT1 bonds and other fixed-income securities (as specified below) that are, in the opinion of the Investment Manager, attractive investments that are appropriately priced based on fundamental (i.e. core analyses in respect of specific securities, such as cash flow, returns and leverage) and quantitative analyses (i.e. mathematical or statistical analyses on a macro level) conducted by the Investment Manager both when identifying potential opportunities and also reviewing securities held in the portfolio. The Investment Manager undertakes a fundamental analysis of the balance and earnings resilience of the relevant issuer in order to form a view on the issuer's creditworthiness. Sovereign risk (the risk relating to a government's credit rating) is also assessed, given the correlated nature of sovereign risk and banking sector risk, as is the relevant country's banking market structure. Quantitative analysis is also undertaken, which includes evaluation of macro-economic factors such as interest rates, recession risks, global economic trends, credit cycles and geopolitical risk. The resulting considerations are an input into the credit selection, as well as overall portfolio construction and positioning.

The Fund has full flexibility to invest in investment grade and sub-investment grade AT1 bond issues.

The Fund may invest up to 20% of its total assets in assets other than AT1 bonds issued by developed market banks, including AT1 bonds issued by banks domiciled in emerging markets and other fixed-income securities which may include government bonds, corporate bonds (including bonds issued by banks that do not qualify as regulatory capital), corporate hybrid bonds, tier 2 bonds (as further described below) and other securities issued by financial institutions that qualify as regulatory capital such as restricted tier 1 securities issued by insurance companies or CET1 equity securities (for further information on regulatory capital see the section entitled 'AT1 bonds and other regulatory capital' below). In each case fixed-income securities may be investment grade or sub-investment grade. The Fund may also invest in other equity securities (subject to a maximum limit of all equity securities (including CET1 equities) of 10%), FDI, other funds and money-market instruments. Please see further below for further information on these asset types.

The Fund's assets will be invested in accordance with the Fund's ESG Policy described below.

The Fund may invest in cash, deposits ("**Cash Holdings**") and ancillary liquid assets (which will normally have dividend/income receivables) subject to the limits set out in Schedule III of the Prospectus. The Fund may, to preserve the value of such Cash Holdings, invest in one or more daily dealing money market collective investment schemes as set out below under the heading "Management of Cash Holdings and FDI Cash Holdings".

To assist in achieving its investment objective, the Fund may, subject to the provisions of the Regulations and the conditions imposed by the Central Bank, invest up to 10% of its total assets in aggregate in other open-ended collective investment undertakings, including exchange traded funds.

The Fund may invest in FDI for direct investment purposes or for efficient portfolio management purposes, namely futures, forward contracts, options and swap contracts (including credit default swaps and currency swaps) in accordance with the limitations set down in Schedule II of the Prospectus (subject to the conditions and within the limits laid down by the Central Bank) to assist in achieving its investment objective, to exposure to the securities described above and for currency hedging purposes. Details of indices used by the Fund will be provided in the annual report of the Company.

The Fund will not invest in fully funded FDI, including fully funded swaps.

The Fund's Investments will be limited to investments permitted by the Regulations which are described in more detail in Schedule III of the Prospectus. The Fund's Investments, other than its Investments in OTC FDI, fixed income securities traded OTC and unlisted open-ended collective investment undertakings, will normally be listed or traded on Regulated Markets set out in Schedule I of the Prospectus. Potential investors in the Fund may obtain a breakdown of the constituents of the Fund from the official iShares website ([www.iShares.com](http://www.iShares.com)) or from the Investment Manager.

#### AT1 bonds and other regulatory capital

AT1 bonds are a type of fixed-income security issued by banks to meet regulatory capital requirements. AT1 capital forms part of the Basel III global regulatory framework (an internationally agreed set of measures) which prescribes capital requirements for banks in order to strengthen their ability to withstand financial stress. Banks are required to hold minimum levels of common equity tier 1 capital ("**CET1**", which generally includes common stock and retained earnings) under this framework and AT1 bonds are an 'additional tier' of capital requirement over the CET1 capital requirements. The other category of securities issued by banks that qualifies as regulatory capital is tier 2 (upper and lower) bonds. Tier 2 bonds are senior to AT1 bonds and as such have a different risk and return profile. In the event of a trigger, AT1 bonds are written down prior to tier 2 bonds.

AT1 bonds are hybrid fixed-income securities that were created to help banks absorb capital losses in times of market stress in one or more of the following ways: by converting into equity securities or having their principal partly or wholly written off, in each case when the bank's capital ratio falls below a certain trigger level or when the issuer's regulator has determined that the bank has reached the point of non-viability (such as when the bank has been declared by the regulator as failing or likely to fail and no other private sector alternative or supervisory action other than the write-down and conversion of capital instruments could be found). The features of an AT1 issue are determined by the terms set out in the bonds' issuance documentation. All AT1 bonds are subordinated bonds designed to absorb the issuer's capital losses before other higher-ranking liabilities (such as more senior secured and unsecured debt securities), however, the loss absorption mechanism may take the form of conversion to equity or principal write-down.

AT1 bonds have no final maturity (i.e. are perpetual) and are callable subject to regulatory approval.

AT1 bonds typically have 'non-call' periods of between 5 and 10 years during which fixed rate coupons may be payable and after which the issuer may call and replace the AT1 bonds with a new issue. If AT1 bonds are not called, the coupon payment resets to the level over the prevailing market rate that the AT1 bond was initially created with. Coupon payments are non-cumulative and discretionary, and non-payment of a coupon is not considered a default.

Restricted tier 1 securities are bonds issued by insurance companies that have equivalent features to those of AT1 bonds described above (qualify as regulatory capital, subordinated to tier 2 bonds and have a loss absorption mechanism which may take the form of conversion to equity or principal write-down).

#### ESG Policy

The Investment Manager will manage the Fund to promote environmental and social characteristics based on the environmental and social criteria set out below.

The Investment Manager will apply the BlackRock EMEA Baseline Screens (as described in Appendix III).

The Investment Manager will also employ its proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Manager from time to time. In determining positive and negative externalities, the Investment Manager may have regard to the considerations set out below.

The Fund's investments that may be considered by the Investment Manager to have positive externalities include where:

- the issuer has one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi) as validated by third-party vendor data or by way of the Investment Manager's own research and analysis;
- the issuer has involvement in positive environmental and social impact activities, as determined by the Investment Manager, which may be based on third-party vendor data or on the Investment Manager's own research and analysis (where the issuer is a bank, these may be revenues from financing green building and renewable energy projects, small and medium-sized enterprises and affordable real estate);

- the issuer demonstrates very strong management of environmental, social, and governance (ESG) risks and opportunities compared with its industry peers (this may be based on ratings from a third party data vendor or based on the Investment Manager's own research and analysis); and/or
- the investment is a "green bond" (which complies with the International Capital Markets Association's four Green Bond Principles) and which may or may not also be an AT1 security. Green bonds (AT1 or otherwise) are specifically issued with an environmental financing objective. The proceeds of a green bond are ringfenced for its environmental financing objective.

The Fund's investments that may be considered by the Investment Manager to have negative externalities include where:

- the issuer has been directly involved in a ESG controversy with a very serious, large-scale negative impact on the environment or society (which may include an issuer's involvement in gross human rights violations, major environmental disasters or large-scale corruption and fraud cases). This determination may be based on ratings from a third-party data vendor or on the Investment Manager's own research and analysis;
- the issuer demonstrates poor management measures concerning environmental, social, and governance (ESG) risks and opportunities compared with its industry peers (this may be based on ratings from a third-party data vendor or on the Investment Manager's own research and analysis).

The Investment Manager will seek to enhance exposure to investments that are deemed to have associated positive externalities (by ensuring that the Fund maintains an exposure greater than the Index (as defined below) by at least 5% to issuers with positive externalities) and seek to exclude exposure to investments that are deemed to have associated negative externalities in each case in order to promote environmental and social characteristics related to (i) the support for the transition to a lower carbon economy and (ii) climate change mitigation.

The Investment Manager will evaluate underlying investments in companies according to the good governance criteria outlined in the SFDR where relevant data is available and as appropriate given the underlying investment type. These criteria relate to sound management structures, employee relations, remuneration of staff and tax compliance. The Investment Manager may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers.

Should any Fund holdings, compliant at the time of investment with the Fund's investment objective and policy (including the ESG Policy), subsequently become ineligible, they may continue to be held until it is possible and practicable (in the Investment Manager's view) to be divested by the Fund (within a reasonable period of time).

#### Benchmark

The Fund is actively managed, and the Investment Manager has full discretion to select the Fund's investments and is not bound by any index. The ICE Developed Markets Contingent Capital Index (the "**Index**") may be used by investors to compare the performance of the Fund to the performance of the market for developed markets AT1 bonds.

#### SFDR

The Fund has been categorised as an Article 8 fund under the SFDR, i.e. a fund that promotes environmental and/or social characteristics provided that companies in which the investments are made follow good governance practices.

Through the application of the Fund's ESG Policy (as described above), the Fund promotes environmental and social characteristics related to: (i) the support for the transition to a lower carbon economy, and (ii) climate change mitigation, by seeking to enhance, by at least 5% as compared to the Index, exposure to investments that are deemed to have associated positive externalities, and seeking to exclude exposure to investments that are deemed to have associated negative externalities (as further described in the Fund's ESG Policy); and (iii) the support for human rights, labour standards, the environment and anti-corruption through the application of the BlackRock EMEA Baseline Screens (as described in Appendix III). Details of the environmental and social characteristics promoted by the Fund are set out in Appendix IV.

Appendix IV sets out further information on the pre-contractual disclosures, as required under the SFDR and the Taxonomy Regulation for the Fund.

The Investment Manager will evaluate underlying investments in companies according to the good governance criteria outlined in the SFDR where relevant data is available and as appropriate given the underlying investment type. These criteria relate to sound management structures, employee relations, remuneration of staff and tax compliance. The Investment Manager may consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers.

#### Consideration of principal adverse impacts on sustainability factors ("PAIs")

The pre-contractual disclosures in Appendix IV set out the PAIs considered for the Fund.

#### Integration of Sustainability Risk

The Investment Manager will apply the Fund's ESG policy (as noted above) and will consider such criteria as part of its investment process such that assets align with the Fund's investment objectives and policy (including its binding sustainability commitments). Additionally, the Investment Manager, as the delegate of the Management Company,

will consider sustainability risk alongside other investment risks in its processes. In order to seek the best risk-adjusted returns for the Fund, the Investment Manager will manage material risks and opportunities that could impact the Fund's portfolio, including financially material Environmental, Social and/or Governance (ESG) risks where relevant data or information is available. ESG integration links sustainability risks to investment decisions by using ESG data in financial analysis and risk management to identify, assess, and mitigate risks that could impact an investment's long-term value and performance. The Investment Manager considers this data and information, within the total set of information in its research process and will make a determination as to its materiality in its investment process, alongside the application of the Fund's ESG policy as described above. For further information on how ESG integration is incorporated into the investment process, please see the "Environmental Social and Governance Integration" section of the prospectus.

The potential exposure to and impact of sustainability risk on the Fund's returns is determined by the Fund's investment strategy (including its ESG Policy its geographical focus, portfolio management style, liquidity, sector allocation and product design). Given the investment strategy of the Fund and the Fund's risk profile, the impact of sustainability risk on the Fund is considered to be not material.

#### AMF ESG Rules

For the purposes of the AMF ESG Rules, the ESG policy constitutes the measurable ESG objectives that are incorporated into the Fund's investment policy.

#### **Risk Management Process**

The Investment Manager employs a risk management process in respect of the Fund in accordance with the requirements of the Central Bank to enable it to accurately monitor, measure and manage, the global exposure from FDI ("global exposure") which the Fund gains. Any FDI not included in the risk management process will not be used until such time as a revised risk management process has been provided to the Central Bank. Information regarding the risks associated with the use of FDI can be found in the section entitled "Risk Factors - FDI Risks".

The Investment Manager uses a methodology known as the "Commitment Approach" in order to measure the global exposure of the Fund and manage the potential loss to the Fund due to market risk. The Commitment Approach is a methodology that aggregates the underlying market or notional values of FDI to determine the degree of global exposure of the Fund to FDI. Pursuant to the Regulations, in the event that the Fund uses leverage in the future, the global exposure for the Fund must not exceed 100% of that Fund's Net Asset Value.

It is not the Investment Manager's intention to leverage the Fund.

#### **Management of Cash Holdings and FDI Cash Holdings**

The Fund may invest Cash Holdings and / or FDI Cash Holdings in one or more daily dealing money market collective investment schemes authorised as UCITS. Such collective investment undertakings may be managed by the Investment Manager and / or an Affiliate and are subject to the limits set out in Schedule III of the Prospectus. Such collective investment schemes may comprise sub-funds in Institutional Cash Series plc which invest in money market instruments. Institutional Cash Series plc is a BlackRock umbrella fund and open-ended investment company with variable capital incorporated in Ireland and having segregated liability between its sub-funds. It is not anticipated that the Fund's Cash Holdings and / or FDI Cash Holdings will result in additional market exposure or capital erosion, however, to the extent that additional market exposure or capital erosion occurs it is expected to be minimal.

#### **INVESTMENT AND BORROWING RESTRICTIONS**

The Company is a UCITS and accordingly the Fund is subject to the investment and borrowing restrictions set out in the Regulations and the Central Bank's guidance. These are set out in detail in Schedule III of the Prospectus.

#### **EFFICIENT PORTFOLIO MANAGEMENT**

The Fund may enter into securities lending agreements for the purposes of efficient portfolio management subject to the conditions and limits set out in the Central Bank UCITS Regulations and in accordance with the requirements of the Central Bank.

All revenues from efficient portfolio management techniques will be returned to the Fund, net of direct and indirect operational costs and fees (which do not include hidden revenue).

The maximum proportion of the Net Asset Value of the Fund that can be subject to securities lending is 100%. The demand to borrow securities and to comply with investor tax regulations in certain jurisdictions are significant drivers for the amount that is actually lent from the Fund at a given time. Borrowing demand fluctuates over time and depends to a large extent on market factors and prevailing investor tax legislation in certain jurisdictions, neither of which can be forecasted precisely. Based on historical data, it is expected that the lending volume for the Fund will typically range between 0% and 20% of the Net Asset Value, though past levels are no guarantee of future levels.

The Investment Manager has been appointed by the Company as the securities lending agent of the Fund under the terms of a securities lending management agreement. Under the terms of the agreement, the securities lending agent is appointed to manage the Fund's securities lending activities and is entitled to receive a fee out of the income generated from securities lending which is in addition to its fee as investment manager. The fee of the securities

lending agent represents direct costs (and if relevant indirect operational costs/fees) of the Fund's securities lending activities. All revenue generated from securities lending activities net of the securities lending agent's fee will be returned to the Fund. If there is securities lending revenue generated, the securities lending agent will receive a fee of 37.5% of such securities lending revenue and will pay any third party operational and administrative costs associated with, and incurred in respect of, such activity, out of its fee. To the extent that the securities lending costs payable to third parties exceed the fee received by the securities lending agent, the securities lending agent will discharge any excess amounts out of its own assets. Full financial details of the amounts earned and expenses incurred with respect to securities lending for the Fund, including fees paid or payable, will also be included in the annual and semi-annual financial statements. The securities lending arrangements and associated costs will be reviewed at least annually.

For additional information about techniques and instruments relating to transferable securities for efficient portfolio management purposes, please see the section headed "Efficient Portfolio Management" in the Prospectus.

## **METHODOLOGY FOR CURRENCY HEDGING**

Currency hedging is undertaken for each Currency Hedged Share Class by hedging the Base Currency against the Valuation Currency to keep the difference between the Base Currency and the Valuation Currency within a pre-determined tolerance. The Investment Manager will monitor the currency exposure of each Currency Hedged Share Class against the pre-determined tolerances daily and will determine when a currency hedge should be reset and the gain or loss arising from the currency hedge reinvested or settled, while taking into consideration the frequency and associated transaction and reinvestment costs of resetting the currency hedge. Currency hedging is carried out on a best efforts basis and there is no guarantee that the Investment Manager will be successful in fully hedging the currency risks. This could result in mismatches between the currency position of the Fund and the Currency Hedged Share Class.

In the event that, the over-hedged or under-hedged position on any currency exposure of a Currency Hedged Share Class exceeds the pre-determined tolerance as at the close of a Business Day (for example, due to market movement), the hedge in respect of the Base Currency will be reset on the next Business Day (on which the relevant currency markets are open). Over-hedged positions shall not exceed 105% of the Net Asset Value of the relevant Currency Hedged Share Class and under-hedged positions shall not fall short of 95% of the portion of the Net Asset Value of the relevant Currency Hedged Share Class that is to be hedged against currency risk. In addition, if the aggregate gain or loss arising from the currency forwards for hedging the Valuation Currency of a Currency Hedged Share Class exceeds the pre-determined tolerance as at the close of a Business Day, the Investment Manager will determine on the next Business Day (on which the relevant currency markets are open) whether some or all of the currency hedges held by that Share Class are required to be reset to reduce the gain or loss if the gain or loss remains outside the tolerance. Applying the above tolerance thresholds will enable the Investment Manager to better manage the frequency and associated costs arising from FX transactions to effect the hedge for Currency Hedged Share Classes. The pre-determined tolerance threshold for each Currency Hedged Share Class is reviewed by BlackRock's Risk and Quantitative Analysis team.

In relation to the foreign currency hedging component of the Currency Hedged Share Classes, in the event that there is a gain on the foreign currency hedge, no leverage will result from such gain. In the event that there is a loss on the foreign currency hedge, leverage will result in the relevant Currency Hedged Share Classes from such loss. Any leverage will be removed or reduced when the relevant currency hedge is adjusted or reset as required for the relevant Currency Hedged Share Class. The Investment Manager does not intend to leverage the Currency Hedged Share Classes beyond the tolerance threshold at which point a reset of some or all of the currency hedges for that Currency Hedged Share Class will be triggered. In extreme market circumstances the tolerance threshold may be temporarily breached.

## **RISK FACTORS**

Potential investors' attention is drawn to the "Risk Factors" section detailed at pages 122 to 166 of the Prospectus. In addition to the risk factors outlined in the Prospectus, the Fund has additional risk factors that investors should consider before investing in the Fund:

### **General Investment Risks**

#### ***Investment Risks***

Past performance is not a guide to the future. The prices of Shares and the income from them may fall as well as rise and an investor may not recover the full amount invested. There can be no assurance that the Fund will achieve its investment objective or that an investor will recover the full amount invested in the Fund. The capital return and income of the Fund are based on the capital appreciation and income of the securities it holds, less expenses incurred and any relevant Duties and Charges. Therefore, the Fund's return may be expected to fluctuate in response to changes in such capital appreciation or income.

#### ***Market Risk and Selection Risk***

Market risk is the risk that one or more markets in which the Fund invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. The value of a security or other asset may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or factors that affect a particular issuer or issuers, exchange, country, group of countries, region, market, industry, group of industries, sector or asset class. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events

could have a significant impact on the Fund and its investments. Selection risk is the risk that the securities selected by Fund management will underperform the markets, the relevant indices or the securities selected by other funds with similar investment objectives and investment strategies. This means you may lose money.

### ***Sustainability Risks – General***

BlackRock defines sustainability risk as an investment risk (likelihood of material losses relative to the expected return of an investment) that arises from environmental, social and/or governance issues. In assessing this risk, BlackRock focuses on the investment risks that are financially material to the Fund and its investments. The definition of sustainability risk is not intended to capture the risk that a fund with sustainable characteristics or objectives fails to meet its sustainable commitments.

As with other investment risks and opportunities, the financial materiality of sustainability risk may vary by issuer, sector, product, mandate and time horizon. See the BlackRock SFDR Sustainability Risk Statement applicable to the Manager, as required under Article 3 of SFDR, for further information (which is available at: [www.blackrock.com/corporate/sustainability](http://www.blackrock.com/corporate/sustainability)).

The outcome of the sustainability risk assessment outlined below is an assessment at the fund level with no reference to the Fund's active objective. This is designed to give investors an indication of the total level of sustainability risk they may be exposed to when investing in the Fund. It is not intended to represent how sustainability risk is managed within the investment processes, as risk is managed within the objective of the Fund, and typically assessed relative to the benchmark of the Fund. Like other investment risks, the ability to manage sustainability risk depends on the fund chosen. If an investor chooses a fund with limited investment discretion - such as an index replicating fund - the ability to manage or control the sustainability risk present in that fund will be constrained.

Whilst the impact of sustainability risk may differ from fund to fund, as noted in the Risk Factors above, all funds may be subject to some aspects of sustainability risk, given sustainability risk may manifest itself through existing other risk types (including, but not limited to, market, liquidity, concentration, credit, asset-liability mismatches etc.).

Sustainability risk may be reflected in two ways: 1) the Fund's potential exposure to a sustainability risk event and 2) the potential financial impact to the Fund's performance should such a sustainability risk event or factor occur. In assessing the potential impact of sustainability risk, these aspects are considered against the Fund's characteristics as listed below. Exposure and impact are assessed across a 5 year (or less) time horizon as aligned with the investment horizon of the majority of BlackRock funds.

- **Fund Geographical Focus:** the geographic location of underlying investments may impact the extent to which a fund is exposed to and impacted by a sustainability risk event or factor. Certain conditions in a geographic location such as the local climate, regulatory environment, economic diversification or level of infrastructure may impact the extent to which a fund is exposed to either the physical impacts of climate change, the risks related to the transition to a lower carbon economy or social and governance risks.
- **Fund Liquidity:** funds with lower liquidity may be less able to exit positions impacted by sustainability risk and may therefore be more exposed to sustainability risk events and more likely to be financially impacted by a sustainability risk event if it occurs.
- **Fund Sector Allocation:** certain sectors are likely to be more exposed to the impacts of sustainability risk. As a result, issuers in such sectors may require significant business model transformation or face decreased demand for their goods or services. These effects could be positive or negative depending on company positioning for the future, current economic activities and ability to manage change. Funds with a higher allocation to such sectors, for example, the energy sector, are expected to have higher exposure to sustainability-related risk and also expect a higher impact on financial performance should a sustainability risk event occur. Funds that have lower exposures to these sectors are expected to have lower exposure to sustainability related risk and are expected to experience a lower impact on financial performance should a sustainability risk event occur.
- **Product design:** funds with explicit aims to consider environmental or social characteristics, or with explicit sustainability objectives, adopt investment strategies which drive greater exposure to sustainability related themes and therefore have a higher exposure to a sustainability risk event. As these funds have greater exposure to sustainability related themes, they can expect a higher financial performance impact should a sustainability risk event occur.

BlackRock classifies each of the above factors and aggregates the factor assessments to a fund by fund overall classification of material or not material.

### **Risks specific to investing in exchange traded funds (ETFs)**

#### ***Authorised Participant Concentration Risk***

Only an Authorised Participant may engage in creation or redemption transactions directly with the Fund. The Fund may have a limited number of institutions that act as Authorised Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorised Participant is able to step forward to make creation and/or redemption orders, the Shares may trade at a discount to the Fund's Net Asset Value and possibly face delisting.

**Secondary Trading Risk**

The Shares will be traded on Borsa Italiana and Xetra and may be listed or traded on one or more other stock exchanges. There can be no certainty that there will be liquidity in the Shares on any one or more of the stock exchanges or that the market price at which Shares may be traded on a stock exchange will be the same as the Net Asset Value per Share. There can be no guarantee that once the Shares are listed or traded on a stock exchange they will remain listed or traded on that stock exchange.

**Suspension risk on local markets**

In certain markets, trading on the local exchange may be carried out by one or a small number of local market account holders. If such account holder(s) fail(s) to deliver securities or monies in relation to a trade, there is a risk of suspension in relation to all funds which effect their trading on the local market through such account holder(s). This risk may be increased where the Fund participates in a securities lending programme. Suspension in either case may increase the costs of the Fund.

**Counterparty and trading risks****Counterparty Risk**

The Company will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. This would include the counterparties to any FDI that is entered into by the Fund. Trading in FDI which have not been collateralised gives rise to direct counterparty exposure. The Company mitigates much of its credit risk to its FDI counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any FDI is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. Currency forwards used by the Currency Hedged Share Classes to hedge their currency risks are not collateralised and the Currency Hedged Share Classes have uncollateralised counterparty exposure to such foreign exchange counterparties in respect of such FDI, subject to the investment limits in Schedules II & III of the Prospectus and subject to Currency Hedged Share Classes not being permitted to have over-hedged positions in excess of 105% of their Net Asset Value. As at the date of this Supplement, State Street is the sole counterparty for currency forwards used by Currency Hedged Share Classes.

A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Company maintains an active oversight of counterparty exposure and the collateral management process. Counterparty exposure is subject to the investment restrictions in Schedule III of the Prospectus.

**Counterparty Risk to the Depositary and other depositaries**

The Company will be exposed to the credit risk of the Depositary or any depositary used by the Depositary where cash or other assets are held by the Depositary or other depositaries. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Cash held by the Depositary and other depositaries will not be segregated in practice but will be a debt owing from the Depositary or other depositaries to the Company as a depositor. Such cash will be co-mingled with cash belonging to other clients of the Depositary and/or other depositaries. In the event of the insolvency of the Depositary or other depositaries, the Company will be treated as a general unsecured creditor of the Depositary or other depositaries in relation to cash holdings of the Company. The Company may face difficulties and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Fund will lose some or all of its cash. The Company's securities are however maintained by the Depositary and sub-custodians used by the Depositary in segregated accounts and should be protected in the event of insolvency of the Depositary or sub-custodians. The Company may enter into additional arrangements (for example placing cash in money market collective investment schemes) in order to mitigate credit exposure for its cash holdings but may be exposed to other risks as a result.

To mitigate the Company's exposure to the Depositary, the Investment Manager employs specific procedures to ensure that the Depositary is a reputable institution and that the credit risk is acceptable to the Company. If there is a change in Depositary then the new depositary will be a regulated entity subject to prudential supervision with a high credit rating assigned by international credit rating agencies.

**Liability of the Depositary and Responsibility of the Depositary for Sub-Custodians**

The Depositary shall be liable to the Company and its shareholders for the loss by the Depositary or a sub-custodian of financial instruments of the Company held in custody. In the case of such a loss, the Depositary is required, pursuant to the Regulations, to return the financial instrument of an identical type or the corresponding amount to the Company without undue delay, unless the Depositary can prove that the loss arose as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. This standard of liability only applies to assets capable of being registered or held in a securities account in the name of the Depositary or a sub-custodian and assets capable of being physically delivered to the Depositary.

The Depositary shall also be liable to the Company and its shareholders for all other losses suffered by the Company and/or its shareholders as a result of the Depositary's negligent or intentional failure to fully fulfil its obligations pursuant to the Regulations. In the absence of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Regulations, the Depositary may not be liable to the Company or its shareholders for the loss of an asset of the Fund which is not capable of being registered or held in a securities account in the name of the Depositary or a sub-custodian or being physically delivered to the Depositary.

The liability of the Depositary is not affected by the fact that it has entrusted the custody of the Company's assets to a third party. In the event that custody is delegated to local entities that are not subject to effective prudential regulation, including minimum capital requirements, and supervision in the jurisdiction concerned, prior Shareholder notice will be provided advising of the risks involved in such delegation. As noted above, in the absence of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Regulations, the Depositary may not be liable to the Company or its shareholders for the loss of an asset of the Fund which is not capable of being registered or held in a securities account in the name of the Depositary or a sub-custodian or being physically delivered to the Depositary. Accordingly, while the liability of the Depositary is not affected by the fact that it has entrusted the custody of the Company's assets to a third party, in markets where custodial and/or settlement systems may not be fully developed, the Fund may be exposed to sub-custodial risk in respect of the loss of such assets in circumstances whereby the Depositary may have no liability.

#### ***Counterparty risk to the Paying Agent - dividend monies***

The Paying Agent for the Fund is responsible for making dividend payments to Participants on the relevant dividend payment date. Shortly before the dividend payment date, monies for distribution to Participants as dividends will be transferred from the Company's cash accounts with the Depositary to the Paying Agent. During the interim period, dividend monies are held with the Paying Agent (or its associated depositary bank) in the form of cash and the Company will have credit risk exposure, in respect of such cash, to the Paying Agent and its associated depositary bank. Cash held by the Paying Agent will not be segregated in practice but will be a debt owing from the Paying Agent (or its associated depositary bank) to the Company as a depositor. In the event of the insolvency of the Paying Agent (or its associated depositary bank) during the interim period, the Company will be treated as a general unsecured creditor of the Paying Agent (or its associated depositary bank) in relation to the cash. The Company may face difficulties and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Company may lose some or all of the dividend monies being distributed by the Paying Agent resulting in a reduction in the value of the Fund.

#### ***On Exchange Trading***

Where a counterparty to an on exchange trade in the Fund's underlying securities suffers an Insolvency Event, there are risks associated with the recognised investment exchanges and markets themselves set out in Schedule I of the Prospectus. There is a risk that the relevant recognised investment exchange or market on which the trade is being conducted will not apply its rules fairly and consistently and that failed trades will be effected notwithstanding the insolvency of one of the counterparties. There is also a risk that a failed trade will be pooled with other failed trades, which may make it difficult to identify a failed trade to which the Fund has been a party. Either of these events may have a negative impact on the value of the Fund.

#### **Specific investment risks for the Fund**

##### ***AT1 Bonds Risk***

An AT1 bond is a type of hybrid debt security issued by a bank which may be converted into the issuer's equity or be partly or wholly written off upon the occurrence of certain trigger events. These trigger events may include where: (1) the bank's capital ratio falling to a pre-determined level, or (2) the bank's regulator has determined that the bank has reached the point of non-viability (such as when the bank has been declared by the regulator as failing or likely to fail and no other private sector alternative or supervisory action other than the write-down and conversion of capital instruments could be found). In such cases, the Fund may lose some or all of its investment in the security.

Investment in AT1 bonds may entail the following (non-exhaustive) risks:

Trigger Level and Write-Down Risk. Trigger levels for AT1 bonds differ and determine exposure to conversion and write-down risk depending on the distance of the capital ratio to the trigger level. It might be difficult for the Investment Manager to anticipate when the trigger events might occur that would require the debt to convert into equity or be written down. This may be where the issuer's capital ratio has fallen to a pre-determined level or the issuing bank's regulatory authority has made its own determination that an institution is non-viable and may therefore require the conversion into equity or write-down of an AT1 bond in circumstances beyond the control of the issuing bank.

In the event that an AT1 bond held by the Fund is written off (a "write-down") as the result of a trigger event, the Fund may suffer a full, partial or staggered loss of the value of its investment. A write-down may be either temporary or permanent. In such cases the Fund may lose some or all of its investment in the security.

In the case of a principal write-down, AT1 bonds' investors (such as the Fund) may also suffer a loss of capital before equity holders which is contrary to common capital hierarchy structures.

Equity Conversion Risk. Events that trigger the conversion from debt into equity are designed so that conversion occurs when the issuer of the AT1 bonds is in financial difficulty, as determined either by regulatory assessment or objective losses (e.g. if the capital ratio of the issuer company falls below a pre-determined level). In such cases, it is likely that the conversion to equity would occur at a share price which is lower than when the bond was issued or purchased. Additionally, the securities may be converting at a time when the value of shares in the bank may be significantly declining, which might have an effect on market liquidity in so far as there may be limited demand for these shares.

Call Extension Risk. Most AT1 bonds are issued as perpetual instruments (i.e. bonds without a maturity date). While AT1 bonds will be callable at pre-determined dates, there is no guarantee that an AT1 bond will be called on the pre-defined call date or any date and investors in the AT1 bond may not receive the return of principal on the call date or at any date.

Coupon Cancellation Risk. Coupon payments on AT1 bonds may be entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. Coupon payments may also be suspended or cancelled by the issuer's regulator. In the event that a coupon payment is suspended, the price of the AT1 bond may decline significantly from the price the AT1 bond was purchased by the Fund.

Subordinated Debt Risk. AT1 bonds are usually subordinated to comparable non-convertible securities and thus are subject to higher risks than other debt securities. In the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights of the holders of the AT1 bonds (such as the Fund) will likely rank junior to the holders of unsubordinated securities in the issuer. Additionally, where the Fund holds AT1 bonds that convert to equity securities following a conversion event, the Fund's holding will be subordinated due to the conversion of the securities from being a debt instrument to an equity instrument. Any loss incurred by subordinated securities is likely to be proportionately greater than unsubordinated securities.

Concentration Risk. Investment in AT1 bonds may also lead to an increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks.

### ***Fixed Income Transferable Securities***

Debt securities are subject to both actual and perceived measures of creditworthiness. The amount of credit risk may be assessed using the issuer's credit rating which is assigned by one or more independent rating agencies. This does not amount to a guarantee of the issuer's creditworthiness but provides an indicator of the likelihood of default. Securities which have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. Companies often issue securities which are ranked in order of seniority which in the event of default would be reflected in the priority in which investors might be paid back. The "downgrading" of an investment grade rated debt security or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security, particularly in a thinly traded market.

The Fund may be affected by changes in prevailing interest rates and by credit quality considerations. Changes in market rates of interest will generally affect the Fund's asset values as the prices of fixed rate securities generally increase when interest rates decline and decrease when interest rates rise. Prices of shorter-term securities generally fluctuate less in response to interest rate changes than do longer-term securities. An economic recession may adversely affect an issuer's financial condition and the market value of high yield debt securities issued by such entity. The issuer's ability to service its debt obligations may be adversely affected by specific issuer developments, or the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. In the event of bankruptcy of an issuer, the Fund may experience losses and incur costs.

### ***High Yield Bonds***

Bonds that are rated sub-investment grade, or bonds which are unrated but judged to be of comparable quality with sub-investment grade bonds, at the time of purchase, may be more volatile than higher-rated bonds of similar maturity.

High yield bonds may also be subject to greater levels of credit or default risk than high-rated bonds. Such bonds are more likely to react to developments affecting market and credit risk than more highly rated securities. The value of high yield bonds can be adversely affected by overall economic conditions, such as an economic downturn or a period of rising interest rates, and high yield bonds may be less liquid and more difficult to sell at an advantageous time or price or to value than higher-rated bonds. In particular, high yield bonds are often issued by smaller, less creditworthy companies or by highly leveraged (indebted) firms, which are generally less able than more financially stable firms to make scheduled payments of interest and principal.

Investors should carefully consider the relative risks of investing in high yield securities and understand that such securities generally are not meant for short-term investing. The Fund may find it more difficult to sell high yield securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Furthermore, the Fund may experience difficulty in valuing certain securities at certain times. Prices realised upon the sale of such lower or unrated rated securities, under these circumstances, may be less than the prices used in calculating the Net Asset Value. In addition, prices for high yield securities may be affected by legislative and regulatory developments which could adversely affect the Net Asset Value insofar as they could adversely affect the Secondary Market for high yield securities, the financial condition of issuers of these securities and the value of outstanding high yield securities.

Lower rated or unrated (i.e. high yield) securities are more likely to react to developments affecting market and credit risk than the more highly rated securities, which primarily react to movements in the general level of interest rates. Lower rated or unrated fixed income obligations also present risks based on payment expectations. If an issuer calls the obligations for redemption, the Fund may have to replace the security with a lower yielding security, resulting in a decreased return for investors. If the Fund experiences unexpected net redemptions, it may be forced to sell its higher rated securities, resulting in a decline in the overall credit quality of the Fund's investment portfolio and increasing the exposure of the Fund to the risks of high yield securities.

### ***Euro and Eurozone Risk***

The deterioration of the sovereign debt of several countries, together with the risk of contagion to other, more stable, countries, exacerbated the global economic crisis. There is a continued possibility that Eurozone countries could be subject to an increase in borrowing costs. This situation as well as the United Kingdom's referendum have raised a number of uncertainties regarding the stability and overall standing of the European Economic and Monetary Union.

The departure or risk of departure from the Euro by one or more Eurozone countries could lead to the reintroduction of national currencies in one or more Eurozone countries or, in more extreme circumstances, the possible dissolution of the Euro entirely. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Fund's investments. Investors should carefully consider how any potential changes to the Eurozone and European Union may affect their investment in the Fund.

#### **ESG Policy risk**

As the Fund has an ESG policy, the Fund will, in addition to other investment criteria set out in its investment policy, take into account, in accordance with that policy, environmental, social and governance ("ESG") characteristics when selecting the Fund's investments. Investors should refer to the Fund's ESG Policy for more information.

The Fund's ESG Policy is expected to include the application of ESG-based exclusionary criteria which may result in the Fund foregoing opportunities to purchase, or otherwise reducing exposure to or underweighting, certain securities when it might otherwise be advantageous to carry out such purchase or maintain its holding of such securities, and/or selling securities due to their ESG characteristics, when to do so might otherwise be disadvantageous. As such, the use of such criteria may affect the Fund's investment performance and the Fund may perform differently compared to similar funds that do not apply such criteria. If the Investment Manager's assessment of ESG characteristics of a security changes, guiding the Investment Manager to sell a security already held or to buy a security not held, none of the Fund, the Company, the Manager, the Investment Manager nor their affiliates accept liability in relation to that assessment. Investors should therefore be comfortable and satisfied with the extent of ESG-related screening undertaken under the ESG Policy prior to investing in the Fund.

In assessing a security, issuer or index based on ESG characteristics, the Investment Manager may be dependent upon information and data from third party ESG research providers, which may be incomplete, inaccurate or unavailable. It may also seek to rely on its own proprietary models which may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security, issuer or index. There is also a risk that the Investment Manager, or third party ESG research providers on which the Investment Manager may depend, may not interpret or apply the relevant ESG characteristics correctly. None of the Fund, the Company, the Manager, the Investment Manager or any of their affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of any such ESG assessment.

#### **Active Management Risk**

The Fund's assets will be actively managed by the Investment Manager, based on the expertise of individual fund managers, who will have discretion (subject to the Fund's investment objective and policy) to invest in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

The success of the investment strategy of the Fund will depend upon the ability of the Investment Manager or its delegates to interpret market data correctly and to predict market movements. Any factor which would make it more difficult to execute timely buy and sell orders, such as a significant lessening of liquidity in a particular market or investment would also be detrimental to profitability. Such investment activities depend upon the experience and expertise of the Investment Manager and/or its delegates' team, as applicable. The loss of the services of any or all of these individuals, or the termination of the Investment Management Agreement and/or agreements with its delegates could have a material adverse effect on the Fund's performance.

#### **Recent Market Events**

Periods of market volatility may occur in response to various political, social and economic events both within and outside of the United States. These conditions have resulted in, and in many cases continue to result in, greater price volatility, less liquidity, widening credit spreads and a lack of price transparency, with many securities remaining illiquid and of uncertain value. Such market conditions may adversely affect the Fund, including by making valuation of some of the Fund's securities uncertain and/or result in sudden and significant valuation increases or declines in the Fund's holdings. If there is a significant decline in the value of the Fund's portfolio, this may impact the asset coverage levels for any outstanding leverage the Fund may have.

Risks resulting from any future debt or other economic crisis could also have a detrimental impact on the global economic recovery, the financial condition of financial institutions and the Fund's business, financial condition and results of operation. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. To the extent uncertainty regarding the U.S. or global economy negatively impacts consumer confidence and consumer credit factors, the Fund's business, financial condition and results of operations could be significantly and adversely affected. Downgrades to the credit ratings of major banks could result in increased borrowing costs for such banks and negatively affect the broader economy. Moreover, Federal Reserve policy, including with respect to certain interest rates, may also adversely affect the value, volatility and liquidity of dividend- and interest-paying securities. Market volatility, rising interest rates and/or unfavourable economic conditions could impair the Fund's ability to achieve its investment objective(s).

#### **Impact of Natural or Man-Made Disasters and Disease Epidemics**

Certain regions are at risk of being affected by natural disasters or catastrophic natural events. Considering that the development of infrastructure, disaster management planning agencies, disaster response and relief sources, organized public funding for natural emergencies, and natural disaster early warning technology may be immature and unbalanced in certain countries, the natural disaster toll on an individual portfolio company or the broader local economic market may be significant. Prolonged periods may pass before essential communications, electricity and other power sources are restored and operations of the portfolio company can be resumed. The Fund's Investments

could also be at risk in the event of such a disaster. The magnitude of future economic repercussions of natural disasters may also be unknown, may delay the Fund's ability to invest in certain companies, and may ultimately prevent any such investment entirely.

Investments may also be negatively affected by man-made disasters. Publicity of man-made disasters may have a significant negative impact on overall consumer confidence, which in turn may materially and adversely affect the performance of the Fund's Investments, whether or not such investments are involved in such man-made disaster.

Outbreaks of infectious diseases may also have a negative impact on the performance of the Fund. For example, an infectious respiratory disease caused by a novel coronavirus known as COVID-19 detected in December 2019 gave rise to a global pandemic. This pandemic adversely affected the economies of many nations globally, negatively affecting the performance of individual companies and capital markets. Future epidemics and pandemics could have similar effects, and the extent of their impact cannot be foreseen at the present time.

Moreover, the impact of infectious diseases in certain developing or emerging market countries may be more severe due to less established healthcare systems, as was evident with COVID-19. Health crises caused by infectious diseases can exacerbate existing political, social, and economic risks in these countries leading to prolonged recovery periods and greater investment risks in these regions. The long-term effects of such outbreaks may include increased volatility as investors react to uncertainty and rapidly changing conditions and potential losses in the value of investments.

Governments and regulatory bodies may implement new policies and regulations in response to health crises, which can impact various industries and investment strategies. These responses can include fiscal stimulus, changes in healthcare policies, and adjustments to trade and travel regulations.

#### ***Governmental Intervention Risk***

In response to a recession, economic slowdown or financial market instability, governments and regulators may choose to intervene by implementing austerity measures and reforms, as seen in the 2007-2008 global financial crisis. There is no guarantee that a government or regulatory intervention will work and they may result in social unrest, limit future growth and economic recovery or have unintended consequences. Additionally, government and regulatory intervention have sometimes been unclear in scope and application, resulting in confusion and uncertainty which in itself has been detrimental to the efficient functioning of financial markets.

It is impossible to predict with certainty what temporary or permanent governmental restrictions may be imposed on the markets in the future and/or the effect of such restrictions on the Investment Manager's ability to implement the Fund's investment objective, the European or global economy or the global securities markets. Instability in the global financial markets or government intervention may increase the volatility of the Fund and hence the risk of loss to the value of your investment.

#### ***Emerging Markets – General***

Emerging markets are subject to special risks associated with investment in an emerging market. The material risks include: generally less liquid and less efficient securities markets; generally greater price volatility; exchange rate fluctuations and exchange control; lack of available currency hedging instruments; abrupt imposition of restrictions on foreign investment; imposition of restrictions on the expatriation of funds or other assets; less publicly available information about issuers; the imposition of taxes; higher transaction and custody costs; settlement delays and risk of loss; difficulties in enforcing contracts; less liquidity and smaller market capitalisations; less well regulated markets resulting in more volatile stock prices; different accounting and disclosure standards; governmental interference; risk of expropriation, nationalisation or confiscation of assets or property; higher inflation; social, economic and political instability and uncertainties; the risk of expropriation of assets and the risk of war. In the absence of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Regulations, the Depositary may not be liable to the Company or its shareholders for the loss of an asset of the Fund which is not capable of being registered or held in a securities account in the name of the Depositary or a sub-custodian or being physically delivered to the Depositary. Accordingly, while the liability of the Depositary is not affected by the fact that it has entrusted the custody of the Company's assets to a third party, in markets where custodial and/or settlement systems may not be fully developed, the Fund may be exposed to sub-custodial risk in respect of the loss of such assets in circumstances whereby the Depositary will have no liability. In the event that custody is delegated to local entities that are not subject to effective prudential regulation, including minimum capital requirements and supervision in the jurisdiction concerned, prior Shareholder notice will be provided advising of the risks involved in such delegation. There could be additional impacts on the value of the Fund as a result of sustainability risks, in particular those caused by environmental changes related to climate change, social issues (including relating to labour rights) and governance risk (including but are not limited to risks around board independence, ownership & control, or audit & tax management). Additionally, disclosures or third-party data coverage associated with sustainability risks is generally less available or transparent in these markets.

As a result of the above risks, the Fund's investments can be adversely affected and the value of your investments may go up or down.

#### ***Issuer Risk***

The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Any issuer of these securities may perform poorly, causing the value of its securities to decline. Poor performance may be caused by poor management decisions, competitive pressures, changes in technology, expiration of patent protection, disruptions in supply, labour problems or shortages, corporate restructurings, fraudulent disclosures or other factors. Issuers may, in times of distress or at their own discretion, decide to reduce or eliminate dividends, which may also cause their stock prices to decline.

**Portfolio Concentration Risk**

The Fund may invest in a limited number of securities compared to other more diversified funds holding a larger number of securities. Where the Fund holds a limited number of securities and is considered concentrated, the value of the Fund may fluctuate more than that of a diversified fund holding a greater number of securities. The selection of securities in a concentrated portfolio may also result in sectoral and geographical concentration.

**Money Market Risk**

The Company, with a view to mitigating credit exposure to depositaries, may arrange for cash holdings of the Company (including pending dividend payments) to be placed into money market collective investment schemes, including other funds of the BlackRock Group. A money market collective investment scheme which invests a significant amount of its assets in money market instruments may be considered as an alternative to investing in a regular deposit account. However, a holding in such a scheme is subject to the risks associated with investing in a collective investment scheme and, while a money market collective investment scheme is designed to be a relatively low risk investment, it is not entirely free of risk. Despite the short maturities and high credit quality of investments of such schemes, increases in interest rates and deteriorations in the credit quality can reduce the scheme's yield and the scheme is still subject to the risk that the value of such scheme's investment can be eroded and the principal sum invested will not be returned in full.

**Securities Lending Risk**

The Company engages in a securities lending programme through the Investment Manager. Securities are lent to borrowers on a title transfer basis, so borrowers are required to return to the Fund securities that are equivalent to those lent, rather than the original securities. When securities are lent to a borrower, there is a risk that the borrower may default on their obligation to return equivalent securities. In order to mitigate this credit risk, the lending of the Fund's securities must be covered by high-quality and liquid collateral received by the Fund under a title transfer arrangement, and such collateral must maintain a market value at all times at least equivalent to the market value of the Fund's securities lent plus a premium.

The market value of securities lent and collateral received can, however, fluctuate over time. As such, credit risk can arise during the life of a loan (for example, where the market value of the collateral falls below the value of the securities lent). A default by the borrower in such circumstances may result in a reduction in the value of the Fund. To mitigate these risks, the Company benefits from a collateral shortfall indemnity provided by BlackRock, whereby the Fund is reimbursed by BlackRock if the value of the collateral received from the borrower does not cover the value of the securities lent by the Fund.

Securities lending involves exposure to certain other risks, including operational risk (such as the risk of losses resulting from problems in the settlement and accounting process), currency risk (such as the risk that in the event of a default by the borrower there may be a shortfall when collateral received by the Fund is denominated in a currency other than the base currency of the Fund due to movements in foreign exchange rates), legal risk (such as the risk that a court declares a contract unenforceable), taxation risk (such as the risk of changes to the status of issuers under applicable laws and regulations, including tax regulations, that may impact the regulatory or tax treatment of loaned securities and could, for example, result in a delay in the payment of dividend equivalent payments owed to the Fund as permitted by applicable law), and market risk (such as the risk that market events, including but not limited to corporate actions, could lead the Fund to lend securities that are trading at a premium due to increased demand, or to recall loaned securities or to lend less or not at all, which could lead to reduced securities lending revenue). In the context of market risk, if the Fund were to lend out securities that are subject to a corporate action and commit to the borrower a particular election as determined by the Investment Manager, the benefit the Fund would receive in respect of committing to such election may or may not be less than the benefit the Fund would have received from making a different election in such corporate action. Investors should also note that a limitation of maximum securities lending levels by the Fund, at a time when demand exceeds those maximum levels, may reduce potential income to the Fund that is attributable to securities lending. Please refer to the section headed "Efficient Portfolio Management" in the Prospectus for further detail.

There are potential conflicts of interest in managing the securities lending program, including but not limited to: (i) The Investment Manager as securities lending agent may have an incentive to, among other things, increase or decrease the amount of securities on loan, lend particular securities, or accept and/or preference affiliated products as collateral in order to generate additional risk-adjusted fees and/or other potential benefits for the Investment Manager and/or its affiliates; (ii) The Investment Manager as securities lending agent may have an incentive to allocate loans to clients that would provide more revenue to BlackRock; and (iii) an indemnity is offered to certain clients, including the Company, for any collateral shortfall in the event of a borrower's default, so the Investment Manager as securities lending agent may have an incentive to mitigate the possible risk of BlackRock incurring losses under the indemnity by preferencing un-indemnified clients over indemnified clients. BlackRock seeks to mitigate this conflict by providing its securities lending clients with equal lending opportunities over time in order to approximate pro rata allocation.

**Currency Risk**

The Fund's Investments may be acquired in currencies which are not the Valuation Currency of the Share Class. For Unhedged Share Classes, the fact that their Valuation Currencies and the currency of the Fund's Investments may differ may cause the cost of purchasing such Investments to be affected favourably or unfavourably by fluctuations in the relative exchange rates of the different currencies.

## **Settlement through an International Central Securities Depository**

### ***Inaction by the Common Depository and/or an International Central Securities Depository***

Investors that settle or clear through an International Central Securities Depository will not be a registered Shareholder in the Company, they will hold an indirect beneficial interest in such Shares and the rights of such investors, where Participants, shall be governed by their agreement with the applicable International Central Securities Depository and otherwise by the arrangement with a Participant of the International Central Securities Depository (for example, their nominee, broker or Central Securities Depositories, as appropriate). The Company will issue any notices and associated documentation to the registered holder of the Global Share Certificate, the Common Depository's Nominee, with such notice as is given by the Company in the ordinary course when convening general meetings. The Common Depository's Nominee has a contractual obligation to relay any such notices received by the Common Depository's Nominee to the Common Depository which, in turn, has a contractual obligation to relay any such notices to the applicable International Central Securities Depository, pursuant to the terms of its appointment by the relevant International Central Securities Depository. The applicable International Central Securities Depository will in turn relay notices received from the Common Depository to its Participants in accordance with its rules and procedures. The Directors understand that the Common Depository is contractually bound to collate all votes received from the applicable International Central Securities Depositories (which reflects votes received by the applicable International Central Securities Depository from Participants) and that the Common Depository's Nominee is obligated to vote in accordance with such instructions. The Company has no power to ensure the Common Depository relays notices of votes in accordance with their instructions. The Company cannot accept voting instructions from any persons, other than the Common Depository's Nominee.

### ***Payments***

With the authorisation of the Common Depository's Nominee, any dividends declared and any liquidation and mandatory redemption proceeds are paid by the Company or its authorised agent (for example, the Paying Agent) to the applicable International Central Securities Depository. Investors, where they are Participants, must look solely to the applicable International Central Securities Depository for their share of each dividend payment or any liquidation or mandatory redemption proceeds paid by the Company or, where they are not Participants, they must look to their respective nominee, broker or Central Securities Depository (as appropriate, which may be a Participant or have an arrangement with a Participant of the applicable International Central Securities Depository) for any share of each dividend payment or any liquidation or mandatory redemption proceeds paid by the Company that relates to their investment.

Investors shall have no claim directly against the Company in respect of dividend payments and any liquidation and mandatory redemption proceeds due on Shares represented by the Global Share Certificate and the obligations of the Company will be discharged by payment to the applicable International Central Securities Depository with the authorisation of the Common Depository's Nominee.

## **Risks specific to investing in Currency Hedged Share Classes**

### ***Currency Hedged Share Classes***

Investors should be aware that currency hedging may adversely affect the returns on their investment due to transaction costs and spreads, market inefficiency, risk premia and other factors which may be material in the case of certain currencies and/or over the long term.

Currency Hedged Share Classes use forward FX contracts and spot FX contracts to reduce or minimise the risk of currency fluctuations between the Base Currency and the Share Class Valuation Currency. In circumstances where the Valuation Currency of a Currency Hedged Share Class is generally strengthening against the Base Currency, currency hedging may protect investors in the relevant Share Class against such currency movements. However, where the Valuation Currency of a Currency Hedged Share Class is generally weakening against the Base Currency, currency hedging may preclude investors from benefiting from such currency movements. Investors should only invest in a Currency Hedged Share Class if they are willing to forego potential gains from appreciations in the Base Currency against the Currency Hedged Share Class's Valuation Currency.

While currency hedging is likely to reduce currency risk in the Currency Hedged Share classes, it is unlikely to completely eliminate currency risk.

Currency Hedged Share Classes in non-major currencies may be affected by the fact that capacity of the relevant currency market may be limited, which could reduce the ability of the Currency Hedged Share Class to reduce its currency risk and the volatility of such Currency Hedged Share Class.

Currency Hedged Share Classes use a currency hedging approach whereby the hedge is proportionately adjusted for net subscriptions and redemptions in the relevant Currency Hedged Share Class. An adjustment is made to the hedge to account for changes in the base value of the Fund, or additions, deletions or any other changes to the underlying portfolio holdings for the Currency Hedged Share Class, however, the hedge will only be reset or adjusted on a monthly basis and as and when a pre-determined tolerance is triggered intra-month, and not whenever there is market movement in the underlying securities. In any event, any over-hedged position arising in a Currency Hedged Share Class will be monitored daily and is not permitted to exceed 105% of the Net Asset Value of that Share Class as prescribed by the Central Bank UCITS Regulations. Under-hedged positions shall not fall short of 95% of the portion of the Net Asset Value of the relevant Currency Hedged Share Class that is to be hedged against currency risk.

The aggregate gain or loss arising from the hedging positions of a Currency Hedged Share Class will be reduced by an adjustment to some or all of the currency hedges only on a monthly basis and as and when the aggregate exceeds

a pre-determined tolerance intra-month as determined by the Investment Manager, and not whenever there is an aggregate gain or loss. When a gain or loss from a currency hedge is adjusted, either the gain will be reinvested into underlying securities or the underlying securities will be sold to meet the loss. In the event that there is a loss on the foreign currency hedge of the relevant Currency Hedged Share Class prior to an adjustment or reset, the relevant Currency Hedged Share Class will have an exposure to securities which will exceed its Net Asset Value as its Net Asset Value comprises both the value of its underlying securities plus the unrealised loss on its foreign currency hedge. Conversely, in the event that there is a gain on the foreign currency hedge of the relevant Currency Hedged Share Class prior to an adjustment or reset, the relevant Currency Hedged Share Class will have a lower exposure to securities than its Net Asset Value as, in this case, its Net Asset Value will include an unrealised gain on the foreign currency hedge. When the foreign currency hedge is adjusted or reset, any such difference will be materially addressed.

The Investment Manager will monitor the currency exposure and gain or loss arising from hedge positions of each Currency Hedged Share Class against the pre-determined tolerances daily and will determine when a currency hedge should be reset and the gain or loss arising from the currency forwards reinvested or settled, while taking into consideration the frequency and associated transaction and reinvestment costs of resetting the currency forwards. When a pre-determined tolerance threshold for a Currency Hedged Share Class is triggered as at the close of a Business Day, the relevant currency hedge will be reset or adjusted only on the next Business Day (on which the relevant currency markets are open); therefore, there could be a Business Day's lag prior to the hedge position being reset or adjusted.

The triggers for resetting and adjusting the hedge are pre-determined by the Investment Manager and periodically reviewed for appropriateness. Other than this periodic adjustment of the tolerance levels, the Investment Manager has no discretion to alter or vary the hedging methodology used by the relevant Currency Hedged Share Class (other than in exceptional market circumstances where the Investment Manager believes that it would be in investors' interests to reset or adjust the hedge before the trigger levels are exceeded, or not reset or adjust the hedge if they are exceeded).

### **Risks specific to use of FDI**

#### ***FDI Risks***

In accordance with the investment limits and restrictions set out in Schedule III of the Prospectus and in the section headed "Investment Objective and Policies", the Fund may use FDI for investment purposes, for the purposes of efficient portfolio management and to hedge currency risk.

The use of FDI may expose the Fund to a higher degree of risk. These risks may include credit risk with regard to counterparties with whom the Fund trades, the risk of settlement default, volatility risk, over-the-counter transaction risk, lack of liquidity of the FDI, imperfect tracking between the change in value of the FDI, and the change in value of the underlying asset that the Fund is seeking to track and greater transaction costs than investing in the underlying assets directly. Some FDI are leveraged and therefore may magnify or otherwise increase investment losses to the Fund.

In accordance with standard industry practice when entering into FDI, the Fund may be required to secure its obligations to its counterparty. For non-fully funded FDI, this may involve the placing of initial and/or variation margin assets with the counterparty. For FDI which require the Fund to place initial margin assets with a counterparty, such assets may not be segregated from the counterparty's own assets and, being freely exchangeable and replaceable, the Fund may have a right to the return of equivalent assets rather than the original margin assets deposited with the counterparty. These deposits or assets may exceed the value of the Fund's obligations to the counterparty in the event that the counterparty requires excess margin or collateral. In addition, as the terms of a FDI may provide for one counterparty to provide collateral to the other counterparty to cover the variation margin exposure arising under the FDI only if a minimum transfer amount is triggered, the Fund may have an uncollateralised risk exposure to a counterparty under a FDI up to such minimum transfer amount.

FDI can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDI than on standard bonds or equities. Leveraged FDI positions can therefore increase Fund volatility. The Fund may enter into long positions executed using FDI (synthetic long positions) such as futures positions and may also enter into currency forwards.

Additional risks associated with investing in FDI may include a counterparty breaching its obligations to provide collateral, or due to operational issues (such as time gaps between the calculation of risk exposure to a counterparty's provision of additional collateral or substitutions of collateral or the sale of collateral in the event of a default by a counterparty), there may be instances where the Fund's credit exposure to its counterparty under a FDI is not fully collateralised but the Fund will continue to observe the limits set out in Schedule III of the Prospectus. The use of FDI may also expose the Fund to legal risk, which is the risk of loss resulting from changing laws or from the unexpected application of a law or regulation, or because a court declares a contract not legally enforceable.

### **Other general risks**

#### ***Fund Liability Risk***

The Company is structured as an umbrella fund with segregated liability between its funds. As a matter of Irish law, the assets of one fund will not be available to meet the liabilities of another. However, the Company is a single legal entity that may operate or have assets held on its behalf or be subject to claims in other jurisdictions that may not

necessarily recognise such segregation of liability. As at the date of this Supplement, the Directors are not aware of any such existing or contingent liability.

#### ***Fund with Multiple Share Classes***

While assets and liabilities that are specific to a Share Class within the Fund would be attributable to (and should be borne by) only that Share Class, there is no segregation of liabilities between Share Classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a Share Class may bring a claim against the assets of the Fund notionally allocated to other Share Classes.

In practice, cross liability between Share Classes is only likely to arise where the aggregate liabilities attributable to a Share Class exceed the aggregate assets of the Fund notionally allocated to that Share Class. Such a situation could arise if, for example, there is a default by a counterparty in respect of the Fund's investments. In these circumstances, the remaining assets of the Fund notionally allocated to other Share Classes of the same Fund may be available to meet such payments and may accordingly not be available to meet any amounts that otherwise would have been payable to holders of Shares of such other Share Classes.

#### ***Fund with One or More Currency Hedged Share Classes***

Currency Hedged Share Classes hedge their currency exposure using forward FX contracts and spot FX contracts. All gains, losses and expenses arising from hedging transactions for a particular Currency Hedged Share Class are attributed only to that Currency Hedged Share Class and should generally be borne only by the investors in that Share Class. However, given that there is no segregation of liabilities between Share Classes under law, there is a risk that, if the assets notionally allocated to a Currency Hedged Share Class are insufficient to meet the losses arising from its hedging transactions (in addition to other fees and expenses attributable to such Share Class), the losses arising from the hedging transactions for such Share Class could affect the Net Asset Value per Share of one or more other Share Classes of the Fund.

#### ***Insufficiency of Duties and Charges***

The Fund levies Duties and Charges in order to defray the costs associated with the purchase and sale of Investments. The level of Duties and Charges may be determined by the Manager in advance of the actual purchase or sale of Investments or execution of associated foreign exchange. It may be estimated based on historic information concerning the costs incurred in trading the relevant securities in the relevant markets. This figure is reviewed periodically and adjusted as necessary. If the Fund levies Duties and Charges which are insufficient to discharge all of the costs incurred in the purchase or sale of Investments, the difference will be paid out of the assets of the Fund, which, pending the reimbursement of the shortfall by an Authorised Participant, will result in a reduction in the value of the Fund (and a corresponding reduction in the value of each Share). In circumstances where Shares subscribed have been issued to an Authorised Participant prior to the receipt by the Fund from the Authorised Participant of the full costs incurred or to be incurred by the Fund in acquiring underlying investments attributable to a subscription, the Fund will have a credit exposure as an unsecured creditor to the Authorised Participant in respect of any shortfall. Similarly, in circumstances where redemption proceeds have been paid to the Authorised Participant prior to the deduction from such proceeds of the full costs incurred or to be incurred by the Fund in disposing of underlying investments attributable to a redemption, the Fund will have a credit exposure as an unsecured creditor to the Authorised Participant in respect of any shortfall.

#### ***Failure to Settle***

If an Authorised Participant submits a dealing request and subsequently fails or is unable to settle and complete the dealing request, the Company will have no recourse to the Authorised Participant other than its contractual right to recover such costs. In the event that no recovery can be made from the Authorised Participant and any costs incurred as a result of the failure to settle will be borne by the Fund and its investors.

#### ***Taxation Risks***

Potential investors' attention is drawn to the taxation risks associated with investment in the Company. See sections headed "Taxation" in the Prospectus and this Supplement.

*Changes in taxation legislation may adversely affect the Fund.*

The tax information provided in the "Taxation" sections is based, to the best knowledge of the Company, upon tax law and practice as at the date of this Supplement. Tax legislation, the tax status of the Company and the Fund, the taxation of investors and any tax relief, and the consequences of such tax status and tax relief, may change from time to time. Any change in the taxation legislation in Ireland or in any jurisdiction where the Fund is registered, cross-listed, marketed or invested could affect the tax status of the Company and the Fund, affect the value of the Fund's Investments in the affected jurisdiction, affect the Fund's ability to achieve its investment objective, and/or alter the post tax returns on Shares held. Where the Fund invests in FDI, or participates in securities lending, the preceding sentence may also extend to the jurisdiction of the governing law of the FDI contract, or securities lending contract and/or the FDI counterparty and/or borrower and/or to the market(s) comprising the underlying exposure(s) of the FDI.

The availability and value of any tax relief available to investors depend on the individual circumstances of investors. The information in the "Taxation" section in the Prospectus and this Supplement is not exhaustive and does not constitute legal or tax advice. Prospective investors are urged to consult their tax advisors with respect to their particular tax situations and the tax effects of an investment in the Fund.

### *Withholding tax reclaims*

The Company may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Where the Company invests in securities that are not subject to withholding or other taxes at the time of acquisition, there can be no assurance that tax may not be imposed in the future as a result of any change in applicable laws, treaties, rules or regulations or the interpretation thereof. The Company may not be able to recover such tax and so any such change could have an adverse effect on the Net Asset Value of the Shares.

The Company (or its representative) may file claims on behalf of the Fund to recover withholding tax on dividend and interest income (if any) received from issuers in certain countries where such withholding tax reclaim is possible. Whether or when the Fund will receive a withholding tax refund in the future is within the control of the tax authorities in such countries. Where the Company expects to recover withholding tax for the Fund based on a continuous assessment of probability of recovery, the Net Asset Value of the Fund generally includes accruals for such tax refunds. The Company continues to evaluate tax developments for potential impact to the probability of recovery for the Fund. If the likelihood of receiving refunds materially decreases, for example due to a change in tax regulation or approach, accruals in the Fund's Net Asset Value for such refunds may need to be written down partially or in full, which will adversely affect the Fund's Net Asset Value. Investors in the Fund at the time an accrual is written down will bear the impact of any resulting reduction in Net Asset Value regardless of whether they were investors during the accrual period. Conversely, if the Fund receives a tax refund that has not been previously accrued, investors in the Fund at the time the claim is successful will benefit from any resulting increase in the Fund's Net Asset Value. Investors who disposed of their interest in Shares prior to such time will not benefit from such Net Asset Value increase.

### *FATCA*

Investors should also read the information set out under the heading "FATCA and other cross-border reporting systems" in the Prospectus, particularly in relation to the consequences of the Company being unable to comply with the terms of such reporting systems.

### ***Dealing Day Risk***

As foreign exchanges can be open on days when the Fund may have suspended calculation of its Net Asset Value and the subscription and redemption of Shares and, therefore, Shares in the Fund are not priced, the value of the securities in the Fund's portfolio may change on days when the Fund's Shares will not be able to be purchased or sold.

### ***Liquidity Risk***

The Fund's investments may be subject to liquidity constraints, which means they may trade less frequently and in small volumes. Securities of certain types, such as bonds and mortgage-backed instruments, may also be subject to periods of significantly lower liquidity in difficult market conditions. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the price at which it has been valued for the purposes of calculating the Net Asset Value of the Fund or at a value considered to be fairest. Reduced liquidity of the Fund's investments may result in a loss to the value of your investment.

### ***Share Subscriptions and Redemptions***

Provisions relating to the redemption of Shares grant the Company discretion to limit the amount of Shares available for redemption on any Dealing Day to 10% of the Net Asset Value of the Fund and, in conjunction with such limitations, to defer or pro-rate such redemption requests. In addition, where requests for subscription or redemption are received late, there will be a delay between the time of submission of the request and the actual date of subscription or redemption. Such deferrals or delays may operate to decrease the number of Shares or the redemption amount to be received.

### ***Trading Currency Exposure***

Shares may be traded in various currencies on various stock exchanges. In addition, subscriptions and redemptions of Shares in the Fund will ordinarily be made in the Valuation Currency of the Shares and may in some cases be permitted in other currencies. Depending on the currency in which an investor invests in the Fund, foreign exchange fluctuations between the currency of investment, the Valuation Currency of the Shares and the Base Currency of the Fund will have an impact on, and may adversely affect, the value of such investor's investments.

### ***Temporary Suspension***

Investors are reminded that in certain circumstances their right to redeem or switch Shares may be temporarily suspended. Please see 'Temporary Suspension of Valuation of the Shares and of Sales, Redemptions and Switching' in the Prospectus.

### ***Valuation Risk***

Certain assets of the Fund may become illiquid and/or not publicly traded. Such securities and financial instruments may not have readily available prices and may therefore be difficult to value. The Manager, Investment Manager or Administrator may provide valuation services (to assist in calculating the Net Asset Value of the Fund) in relation to such securities and financial instruments. Investors should be aware that in these circumstances a possible conflict of interest may arise as the higher the estimated valuation of the securities the higher the fees payable to the Manager, Investment Manager or Administrator. Please see "Conflicts of Interest - General" in the Prospectus for details of how the Company deals with conflicts. In addition, given the nature of such Investments, determinations as to their fair value may not represent the actual amount that will be realised upon the eventual disposal of such Investments.

### **Operational Risk**

The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Manager seeks to reduce these operational risks through controls and procedures and, through its monitoring and oversight of providers of services for the Fund, also seeks to ensure that such service providers take appropriate precautions to avoid and mitigate risks that could lead to disruptions and operating errors. However, it is not possible for the Manager and other service providers to identify and address all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

The Fund's operations (including investment management, securities lending, distribution, collateral management, administration and currency hedging) are carried out by several service providers which are selected based on a rigorous due diligence process.

Nevertheless, the Manager and other providers of services for the Fund may experience disruptions or operating errors such as processing errors or human errors, inadequate or failed internal or external processes, or systems or technology failures, provision or receipt of erroneous or incomplete data, resulting in operational risk which may have a negative effect on the Fund's operations and may expose the Fund to a risk of loss. This can manifest itself in various ways, including business interruption, poor performance, information systems malfunctions or failures, provision or receipt of erroneous or incomplete data or loss of data, regulatory or contractual breaches, human error, negligent execution, problems in the settlement and accounting process, employee misconduct, fraud or other criminal acts. Investors could experience delays (for example, delays in the processing of subscriptions, switching and redemption of Shares) or other disruptions.

While the Manager seeks to minimise operational errors as set out above, there may still be failures that could cause losses to the Fund and reduce the value of the Fund.

### **DEALINGS IN THE FUND**

The Fund is an exchange traded fund which means that the Shares of the Fund are listed on one or more stock exchanges. Certain market makers and brokers are authorised by the Company to deal in Shares of the Fund in the Primary Market and they are referred to as "Authorised Participants". Such Authorised Participants have the capability to ensure delivery of the Shares of the Fund within the International Central Securities Depository relevant to the stock exchanges on which the Shares are listed. Authorised Participants usually sell the Shares they acquire on one or more stock exchanges, the Secondary Market, where such Shares become freely tradable. Potential investors who are not Authorised Participants can purchase and sell Shares of the Fund on the Secondary Market through a broker/dealer on a recognised stock exchange or OTC. For further details of such brokers please contact the Investment Manager.

Authorised Participants dealing on the Primary Market should refer to the section below titled "Procedure for Dealing on the Primary Market" set out below. Investors who are not Authorised Participants should refer to the "Procedure for Dealing on the Secondary Market" section detailed at page 185 of the Prospectus.

### **PROCEDURE FOR DEALING ON THE PRIMARY MARKET**

#### **Initial Offer of Shares**

Shares listed in the Current Share Classes as set out in the tables below under the heading "Current Share Classes" will initially be offered between 9.00a.m. (Irish time) on 2 December 2025 and 12.00 noon (Irish time) on 2 June 2026 (which period may be shortened, extended, changed to an earlier date, or changed to a later date by the Directors) and at a fixed price per Share equal to 5 units of the relevant currency (e.g. US\$5) or such other amount determined by the Investment Manager at the relevant time and communicated to investors prior to investment.

Account Opening Forms for first time Authorised Participants and Dealing Forms must be received during the initial offer period noted above to receive the initial offering price. Arrangements must also be made by that date for the settlement of the transfer of Investments and cash payments within the settlement times available on the Electronic Order Entry Facility (which can range from one to four Business Days).

It is expected that trading in the Shares will commence on or about 2 June 2026, and the Shares will be admitted to trading upon issue.

Shares will be issued for a price to be satisfied in cash or, where available, in kind, together with any applicable Duties and Charges, as described under the heading "Procedure for Dealing on the Primary Market" in the Prospectus. The initial Portfolio Composition File (where relevant) will be available upon request from the Administrator.

#### **Subscriptions and Redemptions after the Initial Offer**

Shares may be subscribed at the Net Asset Value per Share together with associated Duties and Charges which may be varied to reflect the cost of execution. Shares may be redeemed at the Net Asset Value per Share less any associated Duties and Charges which may be varied to reflect the cost of execution. The Articles empower the Company to charge such sum as the Manager considers represents an appropriate figure for Duties and Charges. The level and basis of calculating Duties and Charges may also be varied depending on the size of the relevant dealing request and the costs relating to, or associated with, the primary market transactions. Where Authorised Participants subscribe for or redeem Shares in cash in a currency that is different from the currencies in which the

Fund's underlying investments are denominated, the foreign exchange transaction costs associated with converting the subscription amount to the currencies needed to purchase the underlying investments (in the case of a subscription) or converting the sale proceeds from selling the underlying investments to the currency needed to pay redemption proceeds (in the case of a redemption) will be included in the Duties and Charges which are applied to the relevant subscription or redemption amounts (respectively) paid or received (as the case may be) by such Authorised Participants.

Where Authorised Participants subscribe for or redeem shares in a Currency Hedged Share Class, the transaction costs associated with increasing (in the case of a subscription) or decreasing (in the case of a redemption) such hedge will be included in the Duties and Charges which are applied to the relevant subscription or redemption amounts (respectively) paid or received (as the case may be) by such Authorised Participants.

In some cases, the level of Duties and Charges has to be determined in advance of the completion of the actual purchase or sale of Investments or execution of associated foreign exchange by or on behalf of the Company and the subscription or redemption price may be based on estimated Duties and Charges (which could be based on historic information concerning the costs incurred or expected costs in trading the relevant securities in the relevant markets). Where the sum representing the subscription or redemption price is based on estimated Duties and Charges which turn out to be different to the costs actually incurred by the Fund when acquiring or disposing of Investments as a result of a subscription or redemption, the Authorised Participant shall reimburse the Fund for any shortfall in the sum paid to the Fund (on a subscription) or any excess sum received from the Fund (on a redemption), and the Fund shall reimburse the Authorised Participant for any excess received by the Fund (on a subscription) or any shortfall paid by the Fund (on a redemption), as the case may be. Authorised Participants should note that no interest will accrue or be payable on any amount reimbursed or to be reimbursed by the Fund. In order to protect the Fund and holders of its Shares, the Company and the Manager reserve the right to factor into the estimated Duties and Charges a buffer to protect the Fund from potential market and foreign exchange exposure pending the payment of the actual Duties and Charges.

Dealing orders will normally be accepted in multiples of the minimum number of Shares. Such minima may be reduced or increased in any case at the discretion of the Manager. Authorised Participants should refer to the Electronic Order Entry Facility for details of minimum dealing order amounts for the Fund. Detail in relation to the Valuation Point and cut-off times for the Fund are also set out in the Primary Market dealing timetable below. Details of the dealing cut-off times for dealing orders are also available from the Administrator. There is no minimum holding requirement for the Fund as at the date of this Supplement.

Applications for Shares in the Fund received after the times listed in the dealing timetable will generally not be accepted for dealing on the relevant Dealing Day. However, such applications may be accepted for dealing on the relevant Dealing Day, at the discretion of the Company, Manager or the Investment Manager, in exceptional circumstances, provided they are received prior to the Valuation Point. Settlement of the transfer of Investments and/or cash payments in respect of dealing orders must take place within a prescribed number of Business Days after the Dealing Day (or such earlier time as the Manager may determine in consultation with the Authorised Participant). Authorised Participants should refer to the Electronic Order Entry Facility for details of the maximum and minimum settlement times (which can range from one to four Business Days) in respect of subscriptions and redemptions. If a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Dealing Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times (but such delays will not exceed the regulatory requirements for settlement).

#### **Title to Shares**

As with other Irish companies limited by shares, the Company is required to maintain a register of Shareholders. Shares will be held by the Common Depositary's Nominee (as registered holder) in registered form. Only persons appearing on the register of Shareholders (i.e. the Common Depositary's Nominee) will be a Shareholder. Fractional Shares will not be issued. No temporary documents of title or Share certificates will be issued, other than Global Share Certificate required for the International Central Securities Depositories. The Administrator will also send a trade confirmation to Authorised Participants. Potential investors should refer to the section in the Prospectus titled "Global Clearing and Settlement" for details of the settlement system and the relative rights of investors through such settlement system.

Details in relation to applying for and redeeming Shares and other general information concerning dealing is set out in the Prospectus under the following headings:

<b>Section Heading in Prospectus</b>	<b>Page number in Prospectus</b>
Dealings in the Company	172
Procedure for Dealing on the Primary Market	173
Portfolio Composition File	173
Dealings in Kind, in Cash and Directed Cash Dealings	173

### CURRENT SHARE CLASSES

The Current Share Classes are indicated with a 'Y' and are available to launch at the discretion of the Manager.

#### Current Unhedged Share Classes

Fund Name	Fund Base Ccy	Valuation Currency											
		DKK		EUR		GBP		JPY		SEK		USD	
		Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist
iShares AT1 Bond Active UCITS ETF	EUR	Y	Y	Y*	Y	Y	Y	Y	Y	Y	Y	Y	Y

#### Current Currency Hedged Share Classes

Fund Name	Fund Base Ccy	Currency into which the exposure is hedged and Valuation Currency																									
		AUD		CAD		CHF		DKK		EUR		GBP		HKD		JPY		MXP		NZD		SEK		SGD		USD	
		Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist	Acc	Dist		
iShares AT1 Bond Active UCITS ETF	EUR	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	

\*It is intended that this Share Class will be the first Share Class to become a Launched Share Class.

## PRIMARY MARKET DEALING TIMETABLE

Fund Name	Initial Share Class(es)	Initial Offer Price	Fund Valuation Point on DD*	Dealing request cut off on DD (Cash/Market Trade dealings and, where available, In Kind FOP/OTC DVP dealings) (or, in exceptional circumstances, such later time as approved by the Manager in its absolute discretion)** Authorised Participants should refer to the Electronic Order Entry Facility for further details.
iShares AT1 Bond Active UCITS ETF	EUR Accumulating	€5	11.00pm	4.00am***

This Primary Market Dealing Timetable is applicable to Authorised Participants that are able to effect subscriptions and redemptions of Shares with the Company on the Primary Market. Authorised Participants should also refer to the terms of the Electronic Order Entry Facility.

“BD” means Business Day and “DD” means Dealing Day. Any application received after the cut off time on a Dealing Day will be treated as an application for the next Dealing Day.

\*The Fund Valuation Point relevant to an application is the Fund Valuation Point on the Dealing Day for which that application is treated as being received.

\*\* Dealing requests received after the cut off time for the Fund may be accepted in exceptional circumstances at the discretion of the Manager, provided always that the application is received before the Fund Valuation Point on the relevant Dealing Day for which the application is treated as being received. Applications received after the Valuation Point will be treated as applications for the next Dealing Day.

\*\*\* The cut off time for this Fund reflects that some, or all, of the Fund’s underlying assets are traded in time zones earlier than the European time zone.

Subscription and redemption orders will normally be accepted in multiples of the minimum number of Shares set at the discretion of the Manager or the Investment Manager. Authorised Participants should refer to the Electronic Order Entry Facility for details of minimum subscription and redemption orders for the Launched Share Classes.

Earlier or later times may be determined by the Manager or the Investment Manager at their discretion with prior notice to Authorised Participants.

On the Dealing Day prior to 25 December and 1 January, dealing requests for subscriptions or redemptions must be received by the earlier of the stated dealing request cut-off and 12.00 noon.

NOTE: ALL TIME REFERENCES IN THIS DEALING TIMETABLE ARE TO GREENWICH MEAN TIME (GMT), OR BRITISH SUMMER TIME (BST), WHEN SUCH IS APPLICABLE - NOT CENTRAL EUROPEAN TIME (CET).

## VALUATION

The Net Asset Value per Share of the class of the Fund on offer pursuant to this Supplement shall be calculated for each Dealing Day taking the value of the Fund's Investments as at the Valuation Point. Except where the determination of the Net Asset Value has been suspended in the circumstances described under "Temporary Suspension of Valuation of the Shares and of Sales, Redemptions and Switching", the Net Asset Value per Share shall be made available at the registered office of the Administrator on or before the close of business of each Dealing Day.

The Net Asset Value per Share for each class of Shares shall also be published daily on the Business Day following the Valuation Point for the Fund by means of a Regulatory Information Service or the official iShares website ([www.iShares.com](http://www.iShares.com)), which shall be kept up to date, and such other publications and with such frequency as the Directors may determine. The publishing of the Net Asset Value per Share for each class of Shares in the Fund is for information purposes only, and is not an invitation to subscribe, redeem or switch Shares at the published Net Asset Value per Share.

Assets of the Fund listed or traded on a Regulated Market for which market quotations are readily available shall be priced at the Valuation Point using the bid price for fixed income securities and the last traded price for shares, units of or participations in listed open-ended collective investment schemes on the principal Regulated Market for such Investment. If the assets of the Fund are listed or traded on several Regulated Markets, the bid price or the last traded price, as applicable, on the Regulated Market which, in the opinion of the Administrator, constitutes the main market for such assets, will be used.

## INDICATIVE NET ASSET VALUE

The indicative net asset value (iNAV) is the net asset value per Share of each class of Shares in the Fund calculated on a real time basis (every 15 seconds) during trading hours. The values are intended to provide investors and market participants with a continuous indication of the value of each class of Shares. The values are usually calculated based on a valuation of the actual Fund portfolio using real-time prices from Tradeweb Markets LLC and other sources. The Investment Manager has appointed Tradeweb Markets LLC to calculate and publish the iNAVs of each class of Shares. These iNAVs are published by the relevant stock exchanges. There are provisions for the BlackRock Group to receive payments from the iNAV provider for its engagement in the development and enhancement of service levels.

An iNAV is not, and should not be taken to be or relied on as being, the value of a Share or the price at which Shares may be subscribed for or redeemed or purchased or sold on any relevant stock exchange. In particular, any iNAV provided for the Fund where the Investments are not actively traded during the time of publication of such iNAV may not reflect the true value of a Share and may therefore be misleading and should not be relied on. The inability of the Investment Manager or its designee to provide an iNAV, on a real-time basis, or for any period of time, will not in itself result in a halt in the trading of the Shares on a relevant stock exchange, which will be determined by the rules of the relevant stock exchange in the circumstances. Investors should be aware that the calculation and reporting of any iNAV may reflect time delays in the receipt of the prices of the relevant constituent securities in comparison to other calculated values for example, the iNAV of other exchange traded funds based on the same Investments. Investors interested in dealing in Shares on a relevant stock exchange should not rely solely on any iNAV which is made available in making investment decisions, but should also consider other market information and relevant economic and other factors (including, where relevant, information regarding Investments or investments corresponding to the Fund). None of the Company, the Directors, the Investment Manager or its designee, the Depositary, the Administrator, and Authorised Participant and the other service providers shall be liable to any person who relies on the iNAV.

## DIVIDEND POLICY

The Company intends to declare dividends pursuant to this Supplement on the Shares of the Distributing Share Classes. Dividends may be paid out of the total income of the applicable Distributing Share Class net of any relevant expenses in respect of each financial year. Dividends will normally be declared with a view to being paid either monthly, quarterly or semi-annually. No smoothing of dividends will be applied across the dividend payments in a calendar year. The dividend payment frequency for each Distributing Share Class is as follows (please refer to [www.ishares.com](http://www.ishares.com) for further information on the dividend payment dates).

<b>Fund</b>	<b>Frequency of Distributions for Distributing Share Classes</b>	<b>Months of Distributions</b>
iShares AT1 Bond Active UCITS ETF	Quarterly	January, April, July, October

Distributions will not be made in respect of Accumulating Share Classes and income and other profits will be accumulated and reinvested.

Full details of any change to the dividend policy will be provided in an updated Prospectus or Supplement and a Shareholder notice will be issued in advance.

Any dividend which has remained unclaimed for twelve years from the date of its declaration shall be forfeited and cease to remain owing by the Company and become the property of the Fund.

Dividends for Distributing Share Classes will be declared in the Valuation Currency of the relevant Share Class. Investors who wish to receive dividend payments in a currency other than the Base Currency or Valuation Currency should arrange this with the relevant International Central Securities Depository (subject to this option being made available by the relevant International Central Securities Depository). Any foreign exchange conversions of dividend payments are not the responsibility of the Company and are at the cost and risk of the investors.

**FUND EXPENSES**

The Company employs an “all in one” fee structure for its Funds (and Share Classes). Each Fund pays all of its fees, operating costs and expenses (and its due proportion of any costs and expenses of the Company allocated to it) as a single flat fee (the “Total Expense Ratio” or “TER”). Any fees, operating costs and expenses which are attributable to a particular Share Class (rather than the entire Fund) will be deducted from the assets notionally allocated by the Fund to that Share Class. Expenses paid out of the TER include, but are not limited to, fees and expenses paid to the Manager, regulators and auditors and certain legal expenses of the Company, but exclude transaction costs and extraordinary legal costs.

The Total Expense Ratio for a Share Class is calculated and accrued daily from the current Net Asset Value of the relevant Share Class as follows and shall be payable monthly in arrears:

<b>Fund</b>	<b>Fund / Share Classes</b>	<b>TER</b>
iShares AT1 Bond Active UCITS ETF	Unhedged Share Classes	0.50%
	Currency Hedged Share Classes	Up to 1.00%*

The Manager is responsible for discharging all operational expenses, including but not limited to, fees and expenses of the Directors, the Investment Manager, Depository and Administrator from the amounts received by the Manager from the Total Expense Ratio. Such operational expenses include regulatory and audit fees but exclude transaction costs and extraordinary legal costs. In the event the costs and expenses of a Share Class that are intended to be covered within the TER exceed the stated TER, the Manager will discharge any excess amounts out of its own assets.

Establishment costs for the Fund will be paid by the Manager.

For additional information about fees and expenses of the Fund, see the heading “Fund Expenses” in the Prospectus.

\*For the current TER charged on each Share Class please refer to its KIID / KID and/or the product pages of the website at [www.ishares.com](http://www.ishares.com).

**TAXATION**

**General**

The information given in the Prospectus and below is not exhaustive and does not constitute legal or tax advice. Prospective investors should consult their own professional advisers as to the implications of their subscribing for, purchasing, holding, switching or disposing of Shares under the laws of the jurisdictions in which they may be subject to tax.

In addition to the United Kingdom taxation considerations detailed on pages 226 to 229 of the Prospectus, the following taxation considerations apply specifically to the Fund.

**United Kingdom Taxation**

Investors who are insurance companies within the charge to United Kingdom taxation holding their Shares in the Fund for the purposes of their long-term business (other than their pensions business) will be deemed to dispose of and immediately reacquire those Shares at the end of each accounting period. In general terms, the chargeable gains and allowable losses arising under the annual deemed disposal rules are aggregated and one-seventh of the net amount thus emerging is chargeable (where there are net gains) or allowable (where there are net losses) at the end of the accounting period in which the deemed disposals have taken place.

**INSPECTION OF DOCUMENTS**

Copies of the following documents will be available for inspection at any time during normal business hours on any day (excluding Saturdays, Sundays and public holidays), free of charge, at the registered offices of the Company (J.P. Morgan, 200 Capital Dock, 79 Sir John Rogerson’s Quay, Dublin 2, D02 RK57, Ireland) and the offices of the Investment Manager (BlackRock Advisors (UK) Limited, 12 Throgmorton Avenue, London EC2N 2DL, England):

- (a) the Prospectus;
- (b) this Supplement;
- (c) the KIID / KID;
- (d) the Memorandum and Articles of Association of the Company; and
- (e) the latest annual and semi-annual reports of the Company (if any).

The documents listed above may also be obtained, on request free of charge, from the Administrator.

## **DISCLAIMERS**

### **Tradeweb Markets LLC**

Tradeweb Markets LLC exercises reasonable care when sourcing data input and calculating the iNAV in accordance with the methodologies disclosed on Tradeweb's website.

However, Tradeweb Markets LLC cannot and does not guarantee or represent that the iNAV is always calculated free of errors or will be accurate. Tradeweb Markets LLC accepts no liability for any direct or indirect losses suffered, incurred or, arising from any incorrect calculation of the iNAV or from the use of the iNAV by any person. The iNAV are indicative values and should not be relied on or used by any person for anything other than as a simple indication of the possible value of a share at that time.

The applicable iNAV calculation methodologies, changes to those methodologies, and decisions regarding the sources of data inputs to the iNAV, are considered by Tradeweb Markets LLC with best practices and standards in mind. However, Tradeweb Markets LLC does not represent that any of the foregoing will remain consistent in its calculation of the iNAV and for the avoidance of doubt, shall not be liable for any direct or indirect losses arising from any changes to or decisions made regarding the methodologies or sources of data inputs.

The iNAV is not a recommendation for investment of whatever nature. In particular, the iNAV shall not be construed as a recommendation to buy or sell: (i) individual securities, (ii) the constituent basket underlying a given iNAV or exchange traded fund, or (iii) any exchange traded fund on Tradeweb Markets LLC or on any other relevant exchange or trading platform.

## APPENDIX I

Schedule III – Investment Restrictions	242

## APPENDIX III

### BlackRock EMEA Baseline Screens

The Investment Manager will seek to limit and/or exclude direct investment (as applicable) in corporate issuers which, at the time of purchase, in the opinion of the Investment Manager, have exposure to, or ties with, certain sectors (in some cases subject to specific revenue thresholds) including but not limited to:

- (i) Issuers which are engaged in, or are otherwise exposed to the production of controversial weapons (including, but not limited to, cluster munitions, biological chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons).
- (ii) Issuers deriving more than 5% of their revenue from thermal coal extraction and/or thermal coal-based power generation, with the exception of "green bonds", that are considered to comply with the International Capital Markets Association's Green Bond Principles, from such issuers.
- (iii) Issuers deriving more than 5% of their revenue from the production and generation of tar sands (also known as oil sands).
- (iv) Issuers deriving any revenue from direct involvement in the production of nuclear weapons or nuclear weapon components or delivery platforms, or the provision of auxiliary services related to nuclear weapons.
- (v) Issuers which produce tobacco products.
- (vi) Issuers which derive more than 5% of their revenue from the production, distribution, retail and supply of tobacco-related products.
- (vii) Issuers which produce firearms and/or small arms ammunition intended for retail to civilians.
- (viii) Issuers which derive more than 5% of their revenue from the distribution (wholesale or retail) of firearms and/or small arms ammunition intended for civilian use.
- (ix) Issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anticorruption).

To undertake its analysis of ESG criteria, the Investment Manager may use data generated internally by the Investment Manager and/or its Affiliates or provided by one or more third party ESG research providers.

Should existing holdings, compliant at the time of investment subsequently become ineligible, they will be divested within a reasonable period of time.

The Fund may gain limited indirect exposure (through, including but not limited to, FDI and shares or units of collective investment schemes) to issuers with exposures that do not meet the ESG criteria described above.

A full list of the limits and/or exclusions being applied by Investment Managers at any time (including any specific threshold criteria) is available at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

It is the Investment Manager's intention that the BlackRock EMEA Baseline Screens policy will evolve over time as improved data and more research on this subject becomes available. The full list may be amended from time to time at the Investment Manager's discretion and (unless it alters the description in this section) may be implemented without notification to Shareholders.

**APPENDIX IV**

**Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name: iShares AT1 Bond Active UCITS ETF**

**Legal entity identifier: 52990023BQT90QB36L37**

**Environmental and/or social characteristics**

**Does this financial product have a sustainable investment objective?**

Yes

No

<input type="checkbox"/>	It will make a minimum of <b>sustainable investments with an environmental objective:</b> ___%	<input type="checkbox"/>	It <b>promotes Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It will make a minimum of <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/>	It promotes E/S characteristics, but <b>will not make any sustainable investments</b>

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund promotes environmental characteristics related to (i) the support for the transition to a lower carbon economy, and (ii) climate change mitigation, by seeking to enhance, by at least 5% as compared to the ICE Developed Markets Contingent Capital Index (the "Index"), exposure to investments that are deemed to have associated positive externalities and by seeking to exclude exposure to investments that are deemed to have associated negative externalities. Investments with positive externalities shall include (among other things) financial institutions: (i) that have one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi); or (ii) that finance green building and renewable energy projects. Investments with negative externalities shall include financial institutions: (i) involved in very serious ESG controversies or (ii) demonstrating poor management measures concerning ESG risks and opportunities compared with its industry peers.

The Fund also promotes social and environmental characteristics relating to support for human rights, labour standards, the environment and anti-corruption by excluding direct investment in issuers deemed by the Investment Manager to have failed to comply with

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

	<p>the 10 UN Global Compact Principles, through the application of the BlackRock EMEA Baseline Screens.</p> <p>The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however the Index is used as a comparison for certain ESG characteristics promoted by the Fund.</p>
<p><b>Sustainability indicators</b> measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● <b><i>What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?</i></b></p> <p>The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund are:</p> <ul style="list-style-type: none"> <li>● The percentage of the Fund (expected to be 0%) directly invested in issuers deemed by the Investment Manager to have failed to comply with the 10 UN Global Compact Principles.</li> <li>● The Fund's exposure to investments deemed by the Investment Manager to have associated positive externalities (including financial institutions that have one or more active carbon emissions reduction target(s) approved by the SBTi or that finance green building and renewable energy), as described above (expected to be at least 5% higher than that of the Index).</li> <li>● The Fund's exposure to investments deemed by the Investment Manager to have associated negative externalities, as described above (expected to be 0%).</li> </ul>
	<p>● <b><i>What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?</i></b></p>
	<p>The Fund does not commit to holding Sustainable Investments.</p>
<p><b>Principal adverse impacts</b> are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.</p>	<p>● <b><i>How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?</i></b></p> <p>Not applicable as this Fund does not commit to investing in Sustainable Investments.</p>
	<p>--- <b><i>How have the indicators for adverse impacts on sustainability factors been taken into account?</i></b></p> <p>Not applicable as this Fund does not commit to investing in Sustainable Investments.</p>

	<p>How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>Not applicable as this Fund does not commit to investing in Sustainable Investments.</p>
	<p>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.</p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p>Any other sustainable investments must also not significantly harm any environmental or social objectives.</p>
	<p><b>Does this financial product consider principal adverse impacts on sustainability factors?</b></p> <p><input checked="" type="checkbox"/> Yes,</p> <p><input type="checkbox"/> No</p> <p>The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its exclusionary policy.</p> <p>The Fund takes into account the following PAIs:</p> <ul style="list-style-type: none"> <li>• GHG emissions</li> <li>• GHG intensity of investee companies</li> <li>• Exposure to companies active in the fossil fuel sector</li> <li>• Energy consumption intensity per high impact climate sector</li> <li>• Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises</li> <li>• Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises</li> <li>• Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)</li> </ul>
 <p><b>The investment strategy</b> guides investment decisions based on factors such as investment objectives and risk tolerance</p>	<p><b>What investment strategy does this financial product follow?</b></p> <p>The Fund is actively managed. In order to achieve its investment objective, the Fund will invest at least 80% of its total assets in AT1 bonds denominated in different currencies and issued by banks domiciled in developed markets globally.</p> <p>The Fund will seek to identify AT1 bonds and other fixed-income securities (as specified below) that are, in the opinion of the Investment Manager, attractive investments that are appropriately priced based on fundamental (i.e. core analyses in respect of specific securities, such as cash flow, returns and leverage) and quantitative analyses (i.e. mathematical or statistical analyses on a macro level) conducted by the Investment Manager both when identifying potential opportunities and also reviewing securities held in the portfolio. The Investment Manager undertakes a fundamental analysis of the</p>

balance and earnings resilience of the relevant issuer in order to form a view on the issuer's creditworthiness. Sovereign risk (the risk relating to a government's credit rating) is also assessed, given the correlated nature of sovereign risk and banking sector risk, as is the relevant country's banking market structure. Quantitative analysis is also undertaken, which includes evaluation of macro-economic factors such as interest rates, recession risks, global economic trends, credit cycles and geopolitical risk. The resulting considerations are an input into the credit selection, as well as overall portfolio construction and positioning.

The Fund has full flexibility to invest in investment grade and sub-investment grade AT1 bond issues.

The Fund may invest up to 20% of its total assets in assets other than AT1 bonds issued by developed market banks, including AT1 bonds issued by banks domiciled in emerging markets and other fixed-income securities which may include government bonds, corporate bonds (including bonds issued by banks that do not qualify as regulatory capital), corporate hybrid bonds, tier 2 bonds and other securities issued by financial institutions that qualify as regulatory capital such as restricted tier 1 securities issued by insurance companies or CET1 equity securities. In each case fixed-income securities may be investment grade or sub-investment grade. The Fund may also invest in other equity securities (subject to a maximum limit of all equity securities (including CET1 equities) of 10%), FDI, other funds and money-market instruments.

The Fund's assets will be invested in accordance with the Fund's ESG Policy.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy used to select the investments to attain each of the environmental and social characteristics promoted by the Fund are as follows:

- **UN Global Compact Principles:** The Investment Manager applies the BlackRock EMEA Baseline Screens and, as a result, the Fund excludes direct investment in debt securities issued by issuers which have been deemed by the Investment Manager to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption).
- **Positive / negative externalities:** Enhancing, by at least 5% as compared to the Index, exposure to investments that are deemed by the Investment Manager to have associated positive externalities (including, financial institutions that have one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi) or that finance green building and renewable energy), while excluding investments that are deemed by the Investment Manager to have associated negative externalities as further described above (see *What environmental and/or social characteristics are promoted by this financial product?*).

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the Fund's investments.

● ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound

management structures, employee relations, remuneration of staff and tax compliance.

The Investment Manager assesses good governance practices of the investee companies by combining proprietary insights by the Investment Manager with data from external ESG research providers. The Investment Manager uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame. The Investment Manager may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

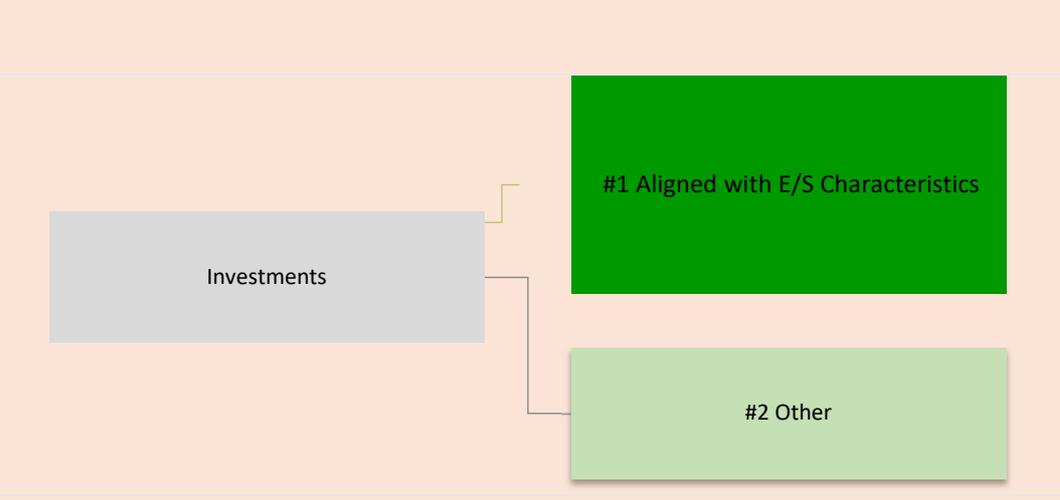

**Asset allocation** describes the share of investments in specific assets.

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics.

Taxonomy-aligned activities are expressed as a share of:

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

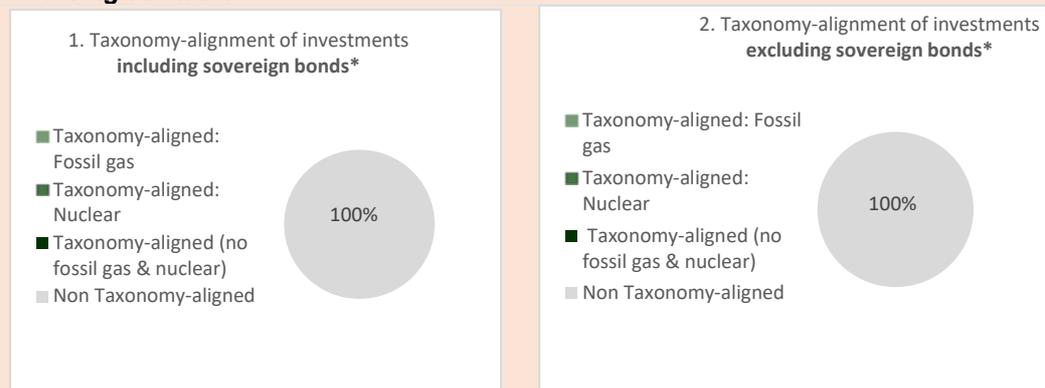

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas  In nuclear energy
- No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

**The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund does not commit to holding Sustainable Investments.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under the EU Taxonomy.	
	 <b>What is the minimum share of socially sustainable investments?</b>
	The Fund does not commit to holding Sustainable Investments.
	 <b>What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?</b>
	<p>Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of collective investment schemes (CIS).</p> <p>These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.</p> <p>These other holdings are considered against minimum environmental or social safeguards.</p>
	<b>Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?</b>
<b>Reference benchmarks</b> are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.	No.
	<input type="radio"/> <b>How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?</b>
	Not applicable.
	<input type="radio"/> <b>How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?</b>
	Not applicable.
	<input type="radio"/> <b>How does the designated index differ from a relevant broad market index?</b>
	Not applicable.
	<input type="radio"/> <b>Where can the methodology used for the calculation of the designated index be found?</b>
	Not applicable.
	<b>Where can I find more product specific information online?</b> <p>More product-specific information can be found on the website:</p> <p>Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: <a href="http://www.blackrock.com">www.blackrock.com</a>.</p>
