Xtrackers Eurozone Government Bond 1-10 UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Eurozone Government Bond 1-10 UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with, the Prospectus and the Addenda.

Xtrackers (IE) plc

Dated 24 April 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of euro-denominated sovereign debt issued by Eurozone countries that have a remaining term to maturity of 1 year or greater, and less than 10 years.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the ICE BofA 1-10 Year Euro Government Index (the "**Reference Index**"), by holding a portfolio of euro-denominated sovereign debt securities (being government bonds) that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being fixed income securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Any unrelated transferable securities held by the Fund will typically be similar to the securities comprised in the Reference Index. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled **"Use of Derivatives by Direct Investment Funds"** set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The Reference Index covers sovereign debt issued in developed markets. As a result, the Reference Index may be concentrated in sovereign debt issued or guaranteed by one or more governments. Changes in the financial condition of the relevant governments, changes in specific economic or political conditions that affect the governments, and changes in general economic or political conditions can affect the value of the debt issued by the governments. Such issuer-specific changes may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares. Dividends may be declared and paid on the "1D" Shares up to four times per annum.

General Information Relating to the Fund

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by ICE Data Indices, LLC. (“**ICE**”) (the “**Index Administrator**”).

The Reference Index is based on the ICE BofA Euro Government Index (the "**Parent Index**"). The Parent Index represents the performance of investment grade, euro-denominated sovereign debt issued by Eurozone countries in either the Eurobond market or the issuer’s own domestic market. For bonds to be eligible for inclusion in the Parent Index, they must be rated investment grade (BBB3 or higher) using the ICE composite rating. This consists of the average rating of the applicable ratings of Moody’s, S&P and Fitch; when a rating from only two agencies is available, the average of these is used; when only one agency rates a bond, that rating is used. All bonds need to meet certain minimum amount outstanding, bond type and maturity criteria in order to be eligible for the Parent Index.

The Reference Index includes sovereign debt from the Parent Index which has a remaining term to maturity of 1 year or greater and less than 10 years.

The composition of the Reference Index is rebalanced on a monthly basis, at each month-end. On each rebalancing date, the criteria above will be applied to the universe of eligible bonds in order to determine those bonds which shall be included in the Reference Index. The bonds included in the Reference Index are weighted on each rebalancing date according to the relative market value of each issuance.

The Reference Index is calculated on a total return basis which means that the payments from coupons are reinvested in the Reference Index. Payments from coupons and scheduled partial and unscheduled full redemptions are held as cash until the next rebalancing, when the cash is reinvested in the Reference Index.

Bonds in the Reference Index are priced on the bid side. New issuances entering the Reference Index are initially priced on the offer side, and are then priced on the bid side.

The Reference Index is calculated in EUR on an end of day basis.

Further Information

ICE Data Indices, LLC has been granted authorisation by the UK FCA as a UK administrator for all ICE fixed income indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the ICE indices can be found on https://indices.ice.com. Index constituents can be viewed under https://indices.ice.com.
