Risk Factors	Investment in the Fund carries with it a degree of risk, including the risks described in the section entitled "Risk Factors" in the Prospectus and the risks associated with investment in space economy companies described below.

Investment Policy

	<i>Space Economy Companies Risk</i> The creation and utilization of space-related technologies is a business based on anticipation off future developments and is witnessing new entrants into the market. The exploitation and utilization of space is a global event with a growing number of corporate participants looking to meet the future needs of a growing global population. Technological and engineering advances may not be sufficient, or occur quickly enough, to fulfil current expectations regarding progress in space exploration and development. Other risks include obsolescence of existing systems and equipment, supply chain issues, cybersecurity incidents, government spending policies, requirements of government contracting processes, regulatory changes, geopolitical instability and shortages of skilled labour, among other things. Therefore, investments by the Fund may be riskier than traditional investments in established industry sectors and the growth of these companies may be slower and subject to setbacks as new technology advancements are made to expand into space. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisors before making an application for Shares. Investment in the Fund is not for investors who cannot afford to lose all or a significant part of their investment.
Initial Offer Period/Price	The Initial Offer Period for each of the Share Classes of the Fund shall begin from 24 June 2026 at 9.00 am (Irish time) and will terminate on 23 December 2026 at 5.00 pm (Irish time), or such other dates as the Directors may determine. The Initial Offer Price for each class of Shares is set out in the section below entitled “Share Class Features”.
Fees and Expenses	The ICAV shall pay to the Manager out of the Fund’s assets an annual management fee of a percentage of the Fund’s average daily net assets. Details of the annual management fee that the Manager shall receive from the Fund are set out in the section below entitled “Share Class Features”.
Duties and Charges	In relation to subscriptions and/or redemptions of shares of the Fund on the Primary Market, costs may be charged to Authorised Participants, such as part or all of any of the Transaction Costs; stamp and other duties; taxes; governmental charges; valuation fees; property management fees; agents fees; brokerage fees; bank charges; foreign exchange spreads; interest; depositary charges (relating to subscriptions and redemptions); transfer fees; registration fees; and all other duties and charges which, for the avoidance of doubt, includes, when calculating the Portfolio Composition File, any provision for spreads (to take into account the difference between the price at which Investments were valued for the purpose of calculating the Net Asset Value and the estimated price at which such Investments shall be bought as a result of a subscription or sold as a result of a redemption), whether in connection with the original acquisition or increase of the Investments of the Fund or the creation, issue, sale, purchase, transfer, conversion or redemption of shares, or the purchase or proposed purchase of Investments or otherwise which may have become or will be payable in respect of or prior to or in connection with or arising out of or upon the

Investment Policy

	occasion of any transaction or dealing in respect of which such duties and charges are payable on the issue and/or redemption of shares, any charges associated with payments of cash in lieu of securities delivery as part of the Cash Component of a Portfolio Composition File, and any costs associated with the acquisition or disposition of Investments while the relevant Regulated Market for the securities is closed, and costs associated with short settlement, long settlement, or any other non-standard settlement of subscriptions, redemptions, conversions or transfers of shares.
Conversion Transaction Fee	The switching charge for the conversion of shares in a Fund into shares of another Fund shall be 3% of the Net Asset Value per share. For further information please refer to the section of the Prospectus entitled “Conversion of shares”.
Borrowing	The Fund may not borrow money except in accordance with the provisions set out in the section of the Prospectus entitled “Borrowings”.
Determination of Net Asset Value	Following the Initial Offer Period the Net Asset Value per share of the Fund shall be calculated on each Dealing Day and will be rounded upwards or downwards, as appropriate, to the nearest 3 decimal places. Please refer to the section of the Prospectus entitled “Determination of Net Asset Value” for information on the valuation of the Fund.
Index	The Index is designed to measure the performance of companies that are exposed to the space economy in the areas of: Space Domain Awareness (i.e. companies that provide detection, tracking, and characterisation of threats in space); Launch and Space Transportation (i.e. companies that manufacture rockets, launch infrastructure, and critical components); Satellites and Communications (i.e. companies that deploy, operate and maintain satellite constellations); and Space Data and Artificial Intelligence (i.e. companies that leverage satellite constellations, advanced sensors and AI-driven analytics to generate actionable intelligence from space-based data). Index Description The description below is a summary of information provided by the Index Provider on the methodology for the construction of the Index. For details of the exact composition of the Index, please refer to the following website link here. To be eligible for inclusion in the Index, securities must be components of the Bloomberg World Aggregate Index (the “Parent Index”) and must be a member of the Bloomberg Intelligence Space Basket. Bloomberg Intelligence uses analysts and strategists to identify and categorize companies exposed to a particular theme. For inclusion in the Bloomberg Intelligence Space Basket, companies are assessed based on their revenue exposure linked to the Space Economy and an assessment of each company’s exposure to the Space Economy on a scale from highest to lowest. Bloomberg Intelligence assigns a combined score to companies based on their revenue

Investment Policy

	exposure (on a scale from 1 to 3, with 1 demonstrating at least 50% revenue exposure and 3 demonstrating less than 20% exposure) and theme exposure. The Index Provider uses this information from Bloomberg Intelligence to assign companies into a “Gold Tier,” “Silver Tier” or “Bronze Tier” based on the combined revenue assessment and theme assessment . Only companies in the Gold and Silver Tiers, exhibiting the highest exposure to the Space Economy, are eligible for inclusion in the Index. The Index is constructed from the Parent Index by first excluding securities of the Parent Index which are listed on the Shanghai or Shenzhen Stock Connect Exchanges and then selecting those securities with: 1. a minimum market capitalization of \$500 million; 2. a minimum three-month average daily traded value (ADTV) of \$5 million; and 3. Gold or Silver tier ranking in the Bloomberg Intelligence Space Basket, (together, the “Eligibility Screens”). Following the application of the Eligibility Screens, Index constituents are ranked based on their Bloomberg Intelligence tier (i.e. Gold or Silver), revenue linked to the Space Economy, and their free float market capitalisation, with up to 50 securities selected. Constituents are then weighted based on their revenue intensity, being a combination of their revenue linked to the Space Economy and their free float market capitalisation, with Gold tier ranked companies capped at 4.5% of the Index, Silver tier ranked companies capped at 3% and all constituents subject to a minimum weighting of 0.1%. All the securities that belong to the Gold tier are selected for inclusion in order of revenue assessment category and descending order of free float market capitalisation. If the number of securities selected in the Gold Tier is less than 50, eligible securities within the Silver Tier will be included in descending order of revenue assessment and free float market capitalization up to 50 securities. The Index is rebalanced and reconstituted on a quarterly basis in January, April, July and October.
