

Xtrackers Global High Yield Corporate Bond UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Global High Yield Corporate Bond UCITS ETF (the **"Fund"**), a sub-fund of Xtrackers (IE) plc (the **"Company"**) an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the **"Central Bank"**).

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with, the Prospectus and the Addenda.

An investment in the sub-fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 24 April 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of below investment grade corporate debt publicly issued in major domestic and Eurobond markets.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the ICE BofA Global High Yield Index (the "**Reference Index**"), by holding a portfolio of below investment grade corporate debt securities (being corporate bonds) that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being fixed income securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Any unrelated transferable securities held by the Fund will typically be similar to the securities comprised in the Reference Index. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index (and, for Currency Hedged Share Classes, the relevant hedging arrangement, as described under "**Share Class Hedging**"), the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Share Class Hedging

The "2C – EUR Hedged", "3C – USD Hedged", "4C – GBP Hedged" and "5C – CHF Hedged" Share Classes ("**Currency Hedged Share Class**", as indicated under Description of the Shares below) are subject to currency hedging.

The Fund will seek to hedge against the currency exposures of the Underlying Securities in the portfolio which differ from the currency of the respective Currency Hedged Share Class in accordance with the "**Share Class Currency Hedging Methodology**" set out in the Prospectus.

Investors should note that the Currency Hedged Share Classes will not completely eliminate currency risk, or provide a precise hedge, and as such, investors may have exposures to currencies other than the currency of the Currency Hedged Share

Class.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Currency Hedging Risk

In order to mitigate against the risk of movements in the currency of a Currency Hedged Share Class against the currency of the portfolio constituents (where they are different to that of the relevant Currency Hedged Share Class currency), Share Class specific derivative transactions will be entered into for the purposes of acquiring currency hedges for each Currency Hedged Share Class. The return of the Share Class specific derivative transactions may not perfectly offset the actual fluctuations between the Currency Hedged Share Class currency and currency exposures of the securities that constitute the portion of the portfolio referable to the Currency Hedged Share Classes. No assurance can be given that such hedging activities will be entirely effective in achieving the purpose for which they have been entered into. While currency hedging reduces risks and losses in adverse market circumstances, it can also reduce and may completely offset gains in market circumstances that would otherwise have been beneficial had the position not been hedged. Consequently, the performance of a Currency Hedged Share Class may differ from that of the Underlying Asset as a result of the foreign exchange hedging transactions.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

- a. *Emerging Market Risk:* Investments in the markets to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant

market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

- b. **Legal Risk:** The economies of most emerging markets are often substantially less developed than those of other geographic regions such as the United States of America and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations are not as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.
- c. **Regulatory Risk:** Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.
- d. **Taxation Risk:** The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked.
- e. **Liquidity Risk:** Primary market investors should be aware that it may take up to nine Settlement Days following the Transaction Day to receive the proceeds of redemptions requests.

Sub-Investment Grade (High Yield) Bonds

The Fund is exposed to the performance of bonds that are rated sub-investment grade, which may be more volatile than higher-rated bonds of similar maturity. High yield bonds may also be subject to greater levels of credit or default risk than higher rated bonds. The value of high yield bonds can be adversely affected by overall economic conditions, such as an economic downturn or a period of rising interest rates, and high yield bonds may be less liquid and more difficult to value or sell at an advantageous time or price than higher rated bonds. In particular, high yield bonds are often issued by smaller, less creditworthy companies or by highly leveraged (indebted) firms, which are generally less able than more financially stable firms to make scheduled payments of interest and principal. Potential investors in the Fund should consider the relative risks of investing in the Fund carefully and understand that high yield bonds are generally not meant for short-term investing. Prices for high yield bonds may be affected by a sudden lack of market liquidity, legislative and/or regulatory developments which could adversely affect the performance of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C", "2C – EUR Hedged", "3C – USD Hedged", "4C – GBP Hedged" and "5C – CHF Hedged" Shares. Dividends may be declared and paid on the "1D" Shares up to four times per

annum.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C", "1D" "2C – EUR Hedged", "3C – USD Hedged", "4C – GBP Hedged" and "5C – CHF Hedged" Shares shall be from 9:00 a.m. on 27 April 2026 to 4:30 p.m. (Dublin time) on 23 October 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day ¹ .
Securities Lending	No
Transparency under SFDR	The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.
Significant Market	Means a Direct Replication Significant Market.

¹ In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com.

² The anticipated tracking error displayed represents the tracking error of the unhedged Share Class against the Fund's Reference Index (which is also unhedged).

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by ICE Data Indices, LLC. ("ICE") (the "Index Administrator").

The Reference Index represents the performance of below investment grade corporate debt publicly issued in major domestic and Eurobond markets which meet certain currency, minimum amount outstanding, bond type and maturity criteria. For bonds to be eligible for inclusion they must be rated below investment grade (less than BBB3) using the ICE composite rating. This consists of the average rating of the applicable ratings of Moody's, S&P and Fitch; when a rating from only two agencies is available, the average of these is used; when only one agency rates a bond, that rating is used.

The composition of the Reference Index is rebalanced on a monthly basis, at each month-end. On each rebalancing date, the criteria above will be applied to the universe of eligible bonds in order to determine those bonds which shall be included in the Reference Index. The bonds included in the Reference Index are weighted on each rebalancing date according to the relative market value of each issuance.

The Reference Index is calculated on a total return basis which means that the payments from coupons are reinvested in the Reference Index. Payments from coupons and scheduled partial and unscheduled full redemptions are held as cash until the next rebalancing, when the cash is reinvested in the Reference Index.

Bonds in the Reference Index are priced on the bid side. New corporate issuances entering the Reference Index are priced on the offer side, and then priced on the bid side.

The Reference Index is calculated in USD on an end of day basis.

Further Information

ICE Data Indices, LLC has been granted authorisation by the UK FCA as a UK administrator for all ICE fixed income indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the ICE indices can be found on <https://indices.ice.com>. Index constituents can be viewed under <https://indices.ice.com>.
