GLOBAL NET ZERO COVERAGE

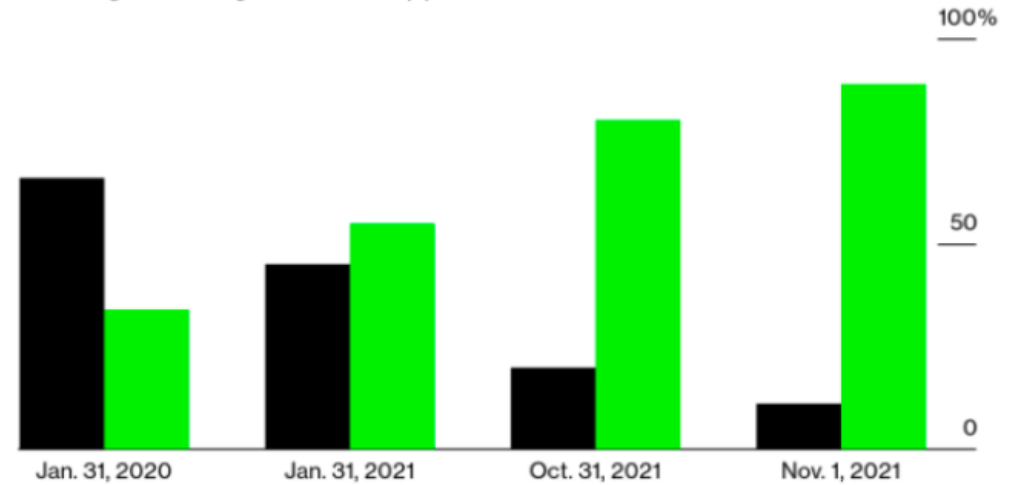

Country-level coverage only. We do not include sub-national net zero targets in countries without a target.

Getting on Target

COP26 boosts net-zero goals to cover 89% of greenhouse gases

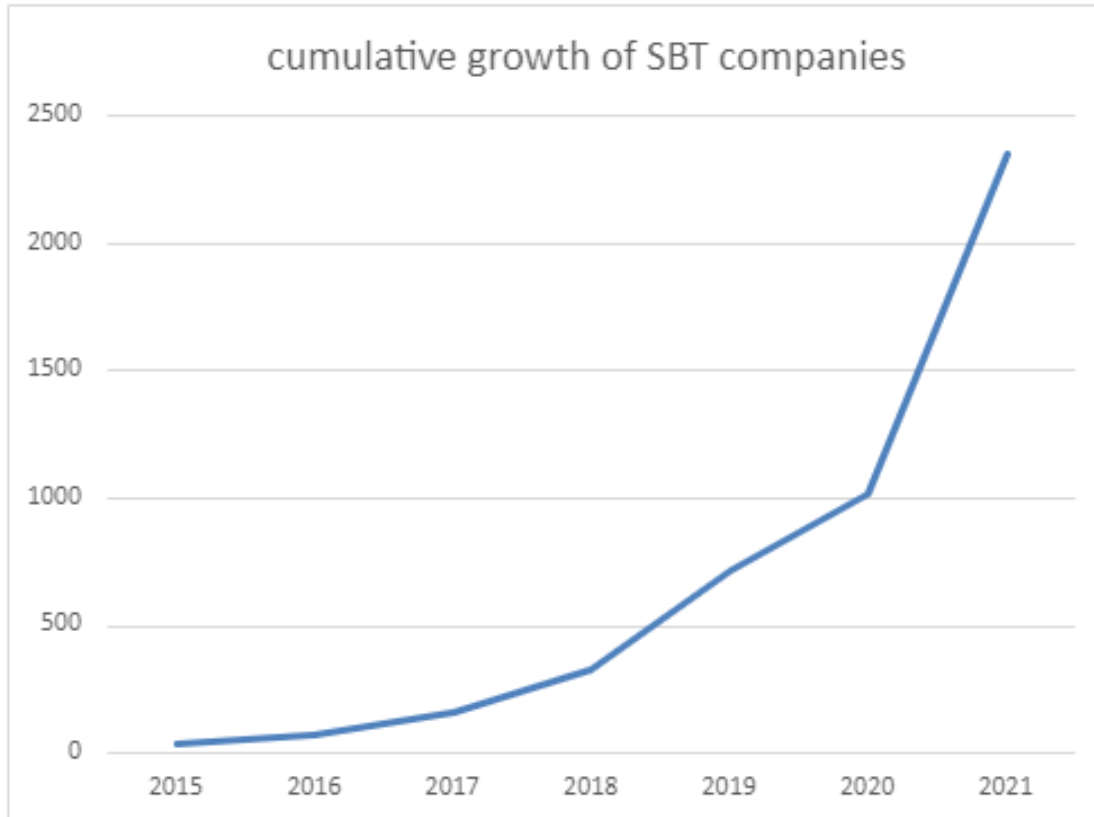

■ No target ■ Target in force or in pipeline

Source: BloombergNEF, World Resources Institute CAIT data

Note: Includes land use, land-use change and forestry. Uses emissions data from 2018, the latest available, to calculate each country's share.

Bloomberg Green

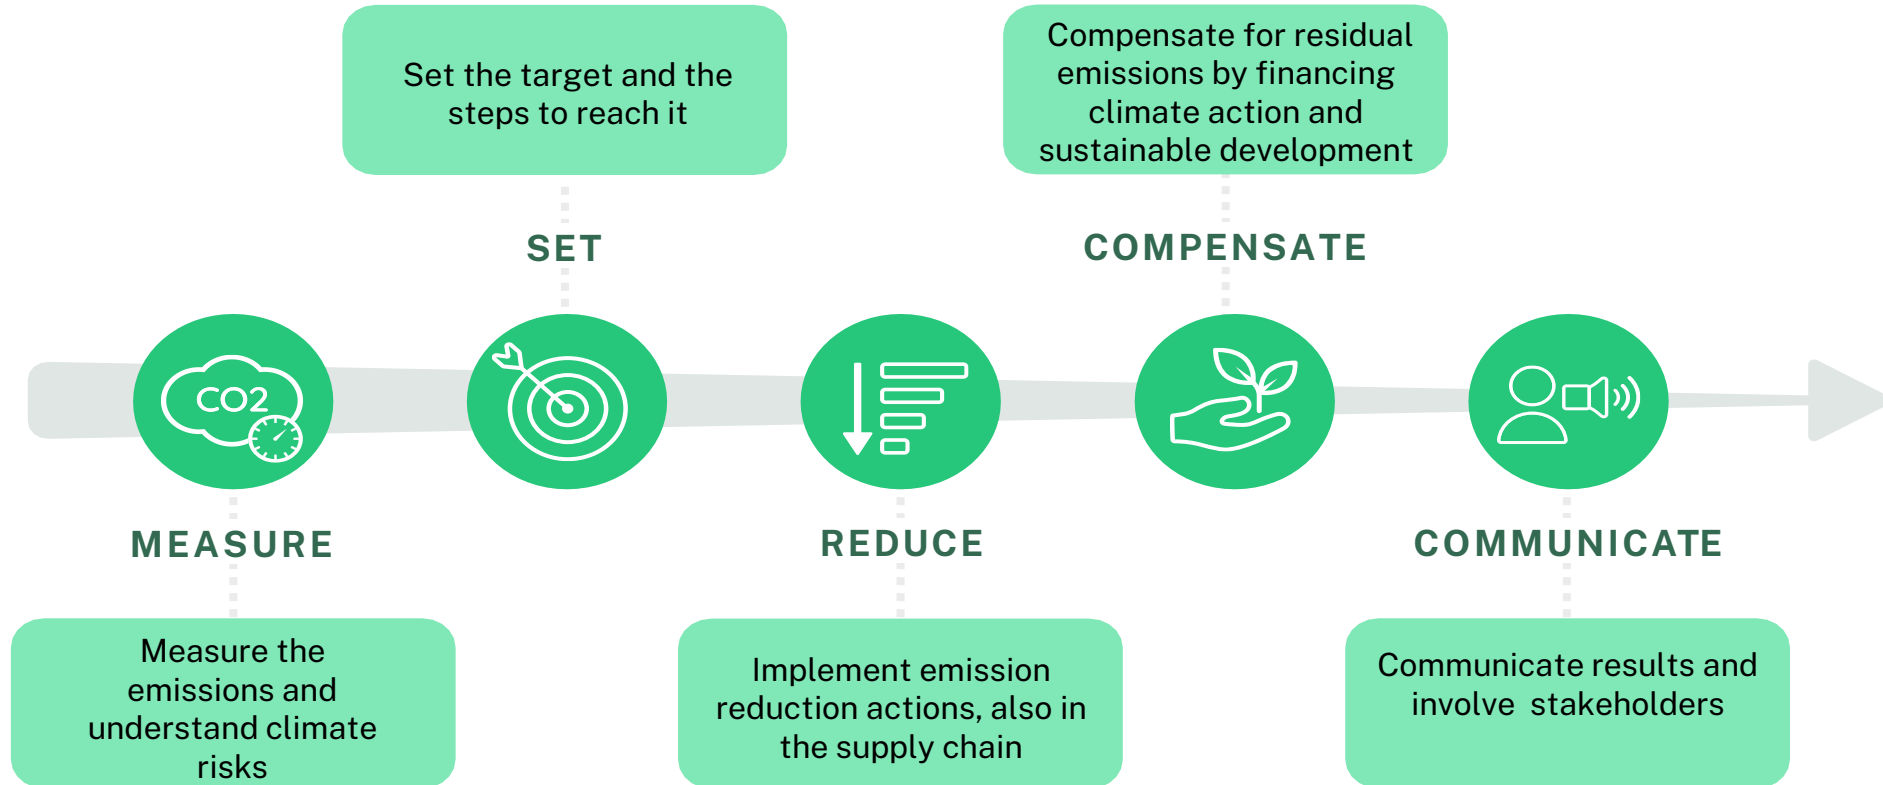

In Italy:

11 companies
committed or target set
in 2020, 48 in 2022
(and counting)

Growth of Italian
companies
committing and
setting SBTs
outperforms global
trends.

THE CLIMATE JOURNEY

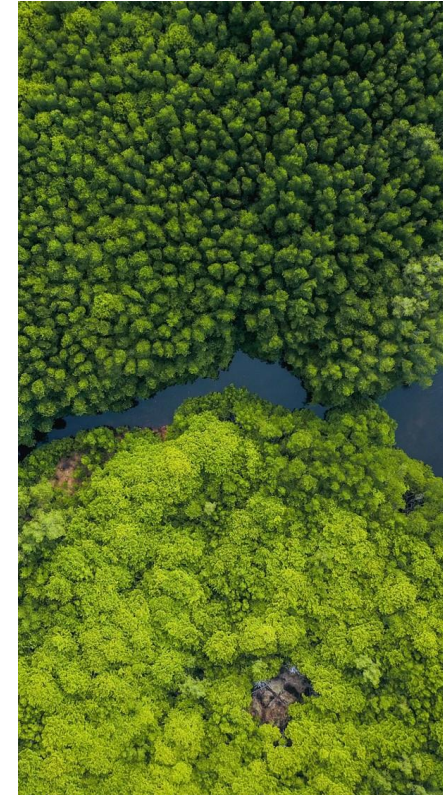

READY FOR NET-ZERO?

2022 is the year when climate commitments take a center stage

What does it mean to be ready for Net-Zero?

JOINING SOUTH POLE

As of January 2022, we are a South Pole company. Together, we form the world's largest climate solutions provider and carbon project developer. Moreover, we have decades of experience, and we share a passion for and deep knowledge of combating climate change.

By joining the South Pole family, we are now taking full advantage of global resources and access to cutting-edge technologies and about 1,000 projects worldwide while maintaining our role as a local leader in the Italian market.

**From ambition to action:
start your climate journey today.**

Thank you
