

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (“**UK**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**EUWA**”); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the “**FSMA**”) and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Securities or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

MIFID II product governance / Retail investors, professional investors and ECPs target market – Solely for the purposes of the manufacturer’s product approval process, the target market assessment in respect of the Securities has led to the conclusion that: (i) the target market for the Securities is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, “**MiFID II**”); (ii) all channels for distribution to eligible counterparties and professional clients are appropriate, except for pure execution services for the latter; and (iii) the following channels for distribution of the Securities to retail clients are appropriate - investment advice, and portfolio management on primary and secondary markets and execution with appropriateness on the secondary market (no distribution via execution only), subject to the distributor’s suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Securities (a “**Distributor**”) should take into consideration the manufacturer’s target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer’s target market assessment) and determining appropriate distribution channels, subject to the distributor’s suitability and appropriateness obligations under MiFID II, as applicable.

What are the key risks that are specific to the Issuer?

The Issuer and Mediobanca Group is subject to the following key risks:

- The operations, earnings capacity and the stability of the sector of both the Issuer and the Mediobanca Group may be influenced by its credit standing, the general economic situation of the country of Italy and the entire Eurozone, trends on financial markets and the economic, social and financial consequences generated by the Covid-19 pandemic and the Russia/Ukraine conflict. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operates in particular will be especially important. The macroeconomic scenario is currently marked by considerable uncertainty in relation to: (a) the crisis generated by the pandemic; (b) the slowdown in the rate of growth following the recession caused by the pandemic, aggravated by the increase in inflationary pressures; and (c) the Russia/Ukraine conflict, which has caused volatility on financial markets and driven a spiral of inflation. In relation to point (a) above, the spread of new variants or a return of the virus itself could impact further on the economic, social and financial situation of Italy and thus indirectly on the credit quality, capitalization and profitability of the Issuer which operates primarily on the Italian domestic market. As at 30 June 2022, loan loss provisions amounted to €242.6 million (compared to €248.8 million as at 30 June 2021), while the Group's cost of risk stood at 48 bps (compared with the 52 bps as at 30 June 2021). In relation to point (c) above, the conflict in Ukraine has generated strong tensions on the energy and commodities markets, and in particular has driven sharp increases in the prices of gas, cereals and fertilizers. Although the Italian government has taken steps to find alternative energy suppliers in the Mediterranean basin and Africa, the country remains highly exposed due to its sizeable energy imports from Russia. In this scenario, the prospects for Italian growth continue to be strongly linked to developments in the Russia-Ukraine conflict and to the economic sanctions imposed on Russia in agreement with the allied countries. Hence, as at the date of the Base Prospectus, the ongoing downward trend in the growth estimates for macroeconomic indicators, such as inflation, employment and private consumption indicators, coupled with the increase in volatility on financial markets, risks creating adverse repercussions on the earnings, capital and financial situation of the Issuer and/or on the Group.
- The business activities of both Mediobanca and the Group and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca.
- As at the date of the Base Prospectus, the Issuer's capability to implement the actions and to meet the targets to be reached by end-June 2023 (the "**Plan Objectives**") contained in its 2019-23 Strategic Plan depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Covid-19 pandemic, the Russia/Ukraine conflict, the changes in the regulatory framework, and the effects of specific actions or concerning future events which the Issuer are only partially able to influence. However, there is no certainty that the actions provided for in the Issuer's 2019-23 Strategic Plan will result in the benefits expected from implementation of the Plan Objectives; if such benefits fail to materialize, the results expected by Mediobanca may differ, even materially, from those envisaged in the Strategic Plan.
- The Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2022 has been characterized by a generalized increase in volatility in all asset classes due primarily to the effects of the Covid-19 pandemic and to the Russia/Ukraine conflict.
- The Group is exposed to different types of operational risk. The event types most impacted by operational risk are originated by products sold to clients, commercial practices, the execution of operating processes, and frauds committed from outside the Group. Although the Mediobanca Group has adopted a system for recording, assessing and monitoring operational risks with a view to preventing and containing them, it should be noted that unpredictable events or events otherwise beyond the control of the Issuers could occur, which could impact negatively on the Issuer's and the Group's operating results, activities and earnings, capital and/or financial situation, as well as on their reputation.

KEY INFORMATION ON THE SECURITIES

What are the main features of the Securities?

Type, class and security identification number

The Securities are Certificates. The ISIN is: XS2713193634. The Common Code is: 271319363. The CFI is: DMMXXB. The FISN is: MEDIOBICA INTL./3.625 OTH DBT. The Series Number of the Securities is 96. The Tranche number is 1. The Securities are governed by English Law. The Securities are cash settled Securities.

Currency, calculation amount, aggregate notional amount and settlement date of the Securities

Subject to compliance with all relevant laws, regulations and directives, the Securities are issued in USD.

The issue price per the Security is USD 1,000 (the "**Issue Price**"). The calculation amount is USD 1,000. The aggregate notional amount of the Securities to be issued is USD 250,000.

Settlement Date: 4 November 2024. This is the date on which the Securities are scheduled to be settled, subject to an early settlement of the Securities and adjustments in accordance with the applicable Terms and Conditions.

Rights attached to the Securities

The product offers the total protection of the Notional Amount per Securities under the occurrence of certain conditions, therefore the investor might incur in a capital loss of 100 per cent. of the Notional Amount.

This product is linked to the performance of the Underlying Reference and is designed to provide, to the occurrence of certain conditions: i) at maturity date, a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities and, i i) on predetermined dates, an unconditional remuneration, unless an automatic early redemption event occurs.

In particular, on the Settlement Date, the redemption amount will be determined on the Settlement Valuation Date as follows:

a) if the worst Performance of the Underlying Reference is greater than or equal to the Barrier Level, the investor will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities;

b) if the worst Performance of the Underlying Reference is less than the Barrier Level, the investor will be entitled to receive a physical delivery of the Underlying Reference to be intended as a number of shares determined by dividing (i) 133.333333 per cent. of the Notional Amount per Security and (ii) the Initial Reference Level of the Underlying Reference with the worst Performance. The value of such shares will depend on the performance of the relevant Underlying Reference on the Settlement Date. If, as a result of the calculation, fractions of shares of the relevant Underlying Reference with the worst Performance are determined, investors will receive a residual cash settlement amount equal to the value of the fraction of the share on the Settlement Valuation Date. In this case, the value of the shares allotted, and the residual cash settlement amount might be less than the amount invested, therefore, investors would incur in a partial or total loss of the Notional Amount per Securities.

The product pays, in addition, a Unconditional Remuneration on the relevant Unconditional Remuneration Payment Dates.

If an Automatic Early Settlement Event occurs, the product will be early redeemed and investors will receive, on the relevant Automatic Early Settlement Date, a settlement amount equal to 100 per cent of Notional Amount per Security. If an Automatic Early Settlement Event occurs, the product early redeemed and no other payments will be paid to the investors.

Record Date: the second business day preceding the relevant Unconditional Remuneration Payment Date.

Payments in respect of Securities in global form: All payments in respect of Securities represented by a Global Security will be made against presentation for endorsement and, if no further payment falls to be made in respect of the Securities, surrender of that Global Security to or to the order of the Fiscal Agent or such other Paying Agent as shall have been notified to the Securityholders for such purpose. A record of each payment so made will be endorsed on each Global Security, which endorsement will be *prima facie* evidence that such payment has been made in respect of the Securities.

Payments in respect of Securities in definitive form: All payments in respect of the Securities in definitive form shall be made against presentation and surrender of the relevant Securities at the specified office of any Paying Agent outside the United States by a cheque payable in the currency in which such payment is due drawn on, or, at the option of the holder, by transfer to an account denominated in that currency with a bank in the principal financial centre of that currency; provided that in the case of Euro, the transfer may be to a Euro account.

Illegality and force majeure: If the Issuer determines that the performance of its obligations under the Securities or that any arrangements made to hedge the Issuer's obligations under the Securities have become (i) illegal in whole or in part for any reason, or (ii) by reason of a *force majeure* event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable the relevant Issuer may settle the Securities by giving notice to Securityholders.

Further issues and consolidation: The Issuer may from time to time without the consent of the Securityholders create and issue further

Securities so as to be consolidated with and form a single series with the outstanding Securities.

Substitution: Subject to the fulfilment of certain conditions, Mediobanca International may at any time (subject to certain conditions as provided in the Terms and Conditions) without the consent of the Securityholders, substitute Mediobanca, or any other third party entity as Issuer in place of Mediobanca International.

Seniority of the Securities: The Securities are issued by the relevant Issuer on an unsubordinated basis. The Securities will constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will rank *pari passu* among themselves and (save for certain obligations required to be preferred by law and subject to the application of the bail-in legislation applicable to the Issuer) equally with all other unsecured obligations other than unsubordinated obligations, if any, of the Issuer from time to time outstanding. Each holder of the Securities acknowledges, accepts, consents and agrees, by its acquisition of the Securities, to be bound by the exercise of, any bail-in power by the relevant resolution authority in respect of the Securities. Any exercise of such bail-in power or other action taken by a resolution authority in respect of the Issuer could materially adversely affect the value of and return on the Securities.

Any restrictions on the free transferability of the Securities: there are restrictions on sales of the Securities into, amongst other jurisdictions, the United States, the European Economic Area (including Italy), the United Kingdom and Japan.

Where will the Securities be traded?

Application has been made by the Issuer (or on its behalf) for the Securities to be admitted to trading on the multilateral trading facility of EuroTLX which is not a regulated market for the purpose of Directive 2014/65/EU with effect from or around the Issue Date.

The Issuer reserves the right to make further applications for the Securities to be admitted to listing and/or trading on additional markets/trading venues.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

General

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

Risks related to the structure of a specific issue of Securities

- The Securities involve a high degree of risk, which may include (in addition to the risks relating to the Issuers (including the default risk) and Guarantor's ability to fulfil their obligations under the Securities to investors), among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in a share, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.
- The Cash Settlement Amount and the value of the Entitlement less the Exercise Price (the "Physical Settlement Value") at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price, the Cash Settlement Amount, the Physical Settlement Value, will reflect, among other things, a "time value" for the Securities;
- With respect to physically settled Securities, the Calculation Agent may determine that a settlement disruption event or a failure to deliver due to illiquidity occurred. Any such determination may affect the value of the Securities and/or may delay settlement and/or lead to cash settlement rather than physical settlement in respect of the Securities;

Considerations Associated with specific types of Securities

- Risks associated with Multiple Final Payout - Reverse Convertible Securities: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of a knock-in event occurs. In addition, the value of the Securities and the amount that Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.

Risks relating to Underlying Reference Asset(s)

- In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include exposure to one or more share, similar market risks to a direct equity investment, global depository receipt ("GDR") or American depository receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities. In addition, the value of the Securities and the amount that

Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.

- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities. In addition, the value of the Securities and the amount that Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.
- Settlement may be postponed following the occurrence or existence of a Settlement Disruption Event and, in these circumstances, the Issuer may pay a Disruption Cash Settlement Price (which may be less than the fair market value of the Entitlement) in lieu of delivering the Entitlement.

Exchange rate risks and exchange controls

- The Issuer will pay amounts on the Securities in the Settlement Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "Investor's Currency") other than the Settlement Currency. These include the risk that exchange rates may significantly change and the risk that authorities with jurisdiction over the Settlement Currency and/or the Investor's Currency may impose or modify exchange controls.
