In case the Indices are an iSTOXX or idDAX index, note that such indices are tailored to a customer request or market requirement based on an individualized rule book which is not integrated into the STOXX index family or DAX index family.

**STOXX Limited, Qontigo Index GmbH and their licensors, research partners or data providers do not:**

- sponsor, endorse, sell or promote the Certificates or recommend that any person invest in the Certificates or any other securities.
- have any responsibility or liability for or make any decisions about the timing, amount or pricing of the Certificates.
- have any responsibility or liability for the administration, management or marketing of the Certificates.
- consider the needs of the Certificates or the owners of the Certificates in determining, composing or calculating the Indices or have any obligation to do so.

**STOXX Limited and Qontigo Index GmbH respectively as the licensor and their licensors, research partners or data providers give no warranty, and exclude any liability (whether in negligence or otherwise), in connection with the Certificates or their performance.**

Specifically,

- STOXX Limited, Qontigo Index GmbH and their licensors, research partners or data providers do not give any warranty, express or implied, and exclude any liability about:
  - the results to be obtained by the Certificates, the owner of the Certificates or any other person in connection with the use of the Indices and the data included in the Indices;
  - the accuracy, timeliness, and completeness of the Indices and their data;
  - the merchantability and the fitness for a particular purpose or use of the Indices and their data;
  - the performance of the Certificates generally.
- STOXX Limited, Qontigo Index GmbH and their licensors, research partners or data providers give no warranty and exclude any liability, for any errors, omissions or interruptions in the Indices or their data;
- Under no circumstances will STOXX Limited, Qontigo Index GmbH or their licensors, research partners or data providers be liable (whether in negligence or otherwise) for any lost profits or indirect, punitive, special or consequential damages or losses, arising as a result of such errors, omissions or interruptions in the Indices or its data or generally in relation to the Certificates even in circumstances where STOXX Limited, Qontigo Index GmbH or their licensors, research partners or data providers are aware that such loss or damage may occur.

In case the Index is a Decrement index, STOXX Limited, Qontigo Index GmbH and their licensors, research partners or data providers:

- expressly declare that the valuation and calculation methodologies for the IXENEL03 Index, IXENI088 Index, IXMBG5 Index and IXSTL134 Index require deductions from the index performance (the “Performance Deductions”) and therefore may not be reflecting the aggregate fair or full performance of the IXENEL03 Index, IXENI088 Index, IXMBG5 Index and IXSTL134 Index.
- do not have any responsibility for, and do not purport, neither expressly nor by implication, that any Performance Deduction is adequate or sufficient for any particular purpose, such as serving as a sufficient basis for achieving capital protection in capital protected products.

STOXX Limited and Qontigo Index GmbH do not assume any contractual relationship with the purchasers of the Certificates or any other third parties. The licensing agreement between the Issuer and the respective licensors solely for their benefit and not for the benefit of the owners of the Certificates or any other third parties.

Amounts due in respect of the Certificates are linked to the performance of the Underlying(s), which is a basket of security indices. Global economic, financial and political developments, among other things, may have a material effect on the value of the component Certificates of, and/or the performance of, the Underlying(s), and in recent years, currency exchange rates and prices for component Certificates have been highly volatile. This may in turn affect the value of and return on the Certificates. Where the Underlying(s) is a price return index, holders of Certificates will not participate in dividends paid on the components comprising the Underlying(s) and such Certificates may not perform as well as a position where such holder had invested directly in such components or where they invested in a “total return” version of the Underlying(s) or in another product. Where the Underlying(s) has a decrement feature, the return on such Underlying(s) will be calculated by reinvesting net dividends or gross dividends (depending on the type and rules of such Underlying(s)) paid by its components and by subtracting on a daily basis a pre-defined amount, and this may result in a lower return than that of a traditional “price return” or “total return” index, or a direct investment in the components of the Underlying(s). As the deduction of such pre-defined amount is defined as a fixed number of index points rather than as a percentage of the index level of the Underlying(s), such fixed deduction will have a greater negative impact on the index level of

the Underlying(s) in a falling equities market.

### What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- Following the military action by Russia in Ukraine, the U.S. has imposed, and is likely to impose material additional, financial and economic sanctions and export controls against certain Russian organisations and/or individuals, with similar actions implemented and/or planned by the European Union, the UK and other jurisdictions. The Group's ability to engage in activity with certain consumer and institutional businesses in Russia and Ukraine or involving certain Russian or Ukrainian businesses and customers is dependent in part upon whether such engagement is restricted under any current or expected U.S., European Union, UK or other countries' sanctions and laws, or is otherwise discontinued in light of these developments. Sanctions and export controls, as well as any actions by Russia, could adversely affect the Group's business activities and customers in and from Russia and Ukraine. Any negative impact of Russia's actions in Ukraine, and related sanctions, export controls and similar actions or laws on the Group, including the Issuer, could adversely affect the ability of the Issuer to fulfil its obligations under the Securities, and the value of and return on the Securities may also be adversely affected.

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.				
Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:				
<ul style="list-style-type: none"><li>The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities, including the global COVID-19 pandemic and the military action by Russia in Ukraine (and related sanctions, export controls and similar actions or laws), which may negatively impact the businesses of the Guarantor and its ability to fulfil its obligations under the Securities, and the value of and return on the Securities.</li><li>The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.</li><li>If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured debt claims (such as the under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.</li></ul>				
What are the key risks that are specific to the Securities?				
The Securities are subject to the following key risks:				
<ul style="list-style-type: none"><li>You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled redemption may vary due to a number of interrelated factors, including the value, dividend yields and volatility of the Underlying(s) and any changes in interim interest rates if applicable, and a sale of Securities prior to their scheduled termination may be at a substantial discount from the original purchase price and you may lose some or all of your investment. If, at maturity, a Termination Barrier Event has occurred and the Final Reference Level of the Final Performance Underlying is less than its Termination Initial Level, the Securities may be terminated for less than your initial investment or even zero.</li><li>The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.</li><li>Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse</li></ul>				

effect on the market value of Securities.

- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of security indices. Global economic, financial and political developments, among other things, may have a material effect on the value of the component securities of, and/or the performance of, the Underlying(s), and in recent years, currency exchange rates and prices for component securities have been highly volatile. This may in turn affect the value of and return on the Securities. Where the Underlying(s) has a decrement feature, the return on such Underlying(s) will be calculated by reinvesting net dividends or gross dividends (depending on the type and rules of such Underlying(s)) paid by its components and by subtracting on a daily basis a pre-defined amount, and this may result in a lower return than that of a traditional "price return" or "total return" index, or a direct investment in the components of the Underlying(s). As the deduction of such pre-defined amount is defined as a fixed number of index points rather than as a percentage of the index level of the Underlying(s), such fixed deduction will have a greater negative impact on the index level of the Underlying(s) in a falling equities market.
- The Securities do not create an actual interest in, or ownership of, an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying or other items which may comprise the Underlying(s) in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- Where (i) a benchmark is materially changed, cancelled or its use is prohibited, (ii) any authorisation or similar in respect of a benchmark or its administrator or sponsor has not been, or will not be, obtained or has been, or will be, rejected or similar such that the Issuer or any other entity is not, or will not be, permitted to use the benchmark, (iii) it is not commercially reasonable to continue use of a benchmark due to licensing restrictions or changes in licence costs, or (iv) a supervisor and/or sponsor officially announces a benchmark is no longer representative, or as of a specified future date will no longer be representative, of any relevant underlying market(s) or economic reality that such benchmark is intended to measure, adjustments may be made to the Securities which may include selecting one or more successor benchmarks and making related adjustments. Alternatively, early redemption of the Securities may apply. Any such adjustment may have an adverse effect on the value of, return on or market for the Securities, and if the Securities are early redeemed, the amount repaid to you could be substantially less than your initial investment and you could therefore sustain a loss.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the level of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or an Underlying and/or hedging arrangements, or may replace an Underlying with a new security index. Any such adjustments may have an adverse effect on the value of such Securities. In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated early, the amount paid may be less than your initial investment and you may therefore sustain a loss.
- Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at the relevant Mandatory Early Termination Amount and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this case, you are subject to a reinvestment risk, as you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.
