Responsibility

The Issuer accepts responsibility for the information contained in these Final Terms. To the best of the knowledge of the Issuer (who has taken all reasonable care to ensure that such is the case), the information contained herein is in accordance with the facts and does not omit anything likely to affect the import of such information.

PART B – OTHER INFORMATION

1. Listing and Admission to trading

Application will be made for the Securities to be admitted to trading on the Multilateral Trading Facility EuroTLX (organised and managed by Borsa Italiana S.p.A.). The Issuer is not a sponsor of, nor is it responsible for, the admission and trading of the Securities on the EuroTLX and no assurance can be given that any such application will be successful.

2. Ratings

Ratings: The Securities have not been rated.

The long-term credit rating of the Issuer is A+ from S&P Global Ratings Europe Limited ("**Standard & Poor's**").

The long-term credit rating of the Guarantor is Aa3 from Moody's Investors Service Ltd ("**Moody's**"), A+ from Standard & Poor's and AA- from Fitch Ratings Ireland Limited ("**Fitch**").

As defined by Moody's, an "Aa" rating means that the obligations of the Guarantor under the Programme are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 3 indicates a ranking in the lower end of that generic rating category.

As defined by Standard & Poor's, an obligation rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the major rating category.

As defined by Fitch, an AA rating denotes expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events. The addition of a "+" or "-" are used with a rating symbol to indicate the relative position of a credit within the rating category.

Standard & Poor's and Fitch are established in the European Union and are registered under Regulation (EC) No. 1060/2009 (as amended) (the "**CRA Regulation**"). Moody's is not established in the European Union and has not applied for registration under the CRA Regulation. The ratings issued by Moody's have been endorsed by Moody's France SAS in accordance with the CRA Regulation. Moody's France SAS is established in the European Union and registered under the CRA Regulation.

The Custom Index aims to replicate a portfolio rebalanced at the discretion of the Index Allocation Agent. A fee is applied for each Rebalancing and, depending on the Underlying subject to the Rebalancing, additional replication fees may be charged that affect the value of the Custom Index and reduce it. The value of the Custom Index incorporates, in addition, a (i) maintenance fee of 1.40% per annum (plus VAT) and (ii) a performance fee of 15% (plus VAT) calculated with the *high-water mark* methodology, which are paid to the Entity Responsible for Allocation of the Custom Index. In this case the investor may incur a partial or total loss of the invested capital.

Most material risk factors pertaining to the Guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition
2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors
5. Adverse economic and financial conditions have in the past had and may in the future significantly affect the BNP Paribas Group and the markets in which it operates
6. Laws and regulations adopted in recent years, as well as current and future legislative and regulatory developments, may significantly impact the BNP Paribas Group and the financial and economic environment in which it operates.
7. Should the BNP Paribas Group fail to implement its strategic objectives or to achieve its published financial objectives, or should its results not follow stated expected trends, the trading price of its securities could be adversely affected.

What are the key risks that are specific to the Securities?

Most material risk factors specific to the Securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and whether knock-in or knock out features apply. Auto-callable Products include automatic early redemption mechanisms. Depending on the applicable formula, if an automatic early redemption event occurs investors may be exposed to a partial loss of their investment. Investors may be exposed to a partial or total loss of their investment.

2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities. An exchange traded instrument (an "ETI") may invest using sophisticated techniques, such as leverage or short selling or in complex financial instruments such as derivatives (swaps, options, futures), securities lending transactions, repurchase or reverse repurchase agreements or foreign exchange instruments. If the investment strategy of the ETI is not successful it will have a negative impact upon the performance of the ETI, and consequently, could have a negative impact on the value of the ETI Securities and the return investors may receive. Holders of ETI Securities have no right to participate in the ETI, whether by voting or in any distributions. Accordingly, the return a Holder of ETI Securities receives could be less (and could be significantly less) than a direct investment in an ETI.

Exposure to an exchange traded instrument, similar market risks to a direct investment in an exchange traded instrument, potential adjustment events or extraordinary events affecting the exchange traded instrument and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Financial Markets SNC, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. L'obiettivo di questo prodotto è di fornire un rendimento collegato all'andamento di un indice (l'"Indice") composto da un universo di titoli azionari, ETF e indici proprietari selezionati da Scouting SIM Spa, che agisce in qualità di Soggetto Responsabile dell'Allocazione nell'Indice.

L'Indice ha come obiettivo quello di replicare un portafoglio ribilanciato discrezionalmente dal Soggetto Responsabile dell'Allocazione nell'Indice. Il Soggetto Responsabile dell'Allocazione nell'Indice ha la facoltà di richiedere modifiche alla composizione dell'Indice (ciascuna componente dell'Indice, un "Sottostante"), tramite l'aggiunta, rimozione, riponderazione o sostituzione con un nuovo Sottostante, potenzialmente su base giornaliera (ciascuna di queste occorrenze, un "Ribilanciamento"). In corrispondenza di ogni Ribilanciamento dell'Indice viene applicato un costo e, a seconda del Sottostante oggetto del Ribilanciamento, possono essere addebitati costi di replica aggiuntivi che incidono sul valore dell'Indice, riducendolo. Il valore dell'Indice incorpora, in aggiunta, (i) una commissione di mantenimento pari allo 1,40% annuo (più IVA) e (ii) una commissione di performance del 15,00% (più IVA) della performance positiva dell'Indice qualora tale performance superi il valore più alto mai raggiunto precedentemente dall'Indice. Tali commissioni riducono il valore dell'Indice e vengono corrisposte al Soggetto Responsabile dell'Allocazione nell'Indice. Gli eventuali dividendi dei Sottostanti sono reinvestiti negli stessi Sottostanti alla data di stacco del dividendo, al netto delle trattenute fiscali applicabili. Potete prendere visione della documentazione completa dell'Indice, che include la modalità di calcolo delle commissioni implicite, al sito internet: investimenti.bnpparibas.it.

Liquidazione Anticipata Facoltativa: l'Emittente ha il diritto di liquidare anticipatamente il prodotto, a propria discrezione, alla Data di Liquidazione Anticipata Facoltativa, concedendo un Periodo di Preavviso tramite comunicazione per iscritto. Alla Data di Liquidazione Anticipata Facoltativa riceverete, per ogni certificate, un importo calcolato in base al valore dell'Indice alla Data di Valutazione della Liquidazione Anticipata Facoltativa, al netto di una commissione di strutturazione pari allo 0,32% annuo. In questo caso potrete incorrere in una perdita parziale o totale del capitale investito.

Quali sono i principali rischi specifici dei titoli?

Fattori di rischio più significativi specifici dei titoli

Esistono anche rischi relativi ai Titoli, compresi:

1. Rischio relativo alla struttura dei Titoli:

Il rendimento dei Titoli dipende dall'andamento dell'Indice Sottostante/i di Riferimento e dall'applicazione delle clausole di Knock-in o Knock-out. I Prodotti di tipo *auto-callable* includono un meccanismo di rimborso anticipato automatico. Sulla base della formula applicabile, in caso si verificasse un evento di rimborso anticipato automatico, gli investitori potrebbero essere esposti a una perdita parziale dell'investimento. Gli investitori possono essere esposti a una perdita parziale o totale dell'investimento.

2. Rischio relativo al Sottostante e a eventi di turbativa e rettifica:

I Titoli legati a Indici sono collegati all'andamento di un indice sottostante (di seguito denominato un "Indice"), che può riferirsi a vari mercati di riferimento quali il mercato azionario, obbligazionario, dei tassi di cambio o del prezzo degli immobili, oppure possono riferirsi a una combinazione di mercati di riferimento. Gli investitori in Titoli legati a Indici affrontano il rischio di una serie più ampia di circostanze: le attività sottostanti all'Indice potrebbero quindi presentare un andamento diverso dal previsto rispetto a un investimento in titoli di debito convenzionali. Di conseguenza, è più probabile che il rendimento di un investimento in titoli indicizzati sia influenzato negativamente rispetto a un investimento in titoli di debito convenzionali.

Eventi di rettifica e di turbativa sul mercato o la mancata apertura del mercato di riferimento potrebbero avere un effetto negativo sul prezzo e la liquidità dei Titoli. Uno strumento negoziato in borsa (*exchange-traded instrument*, di seguito denominato "ETI") può investire utilizzando tecniche sofisticate, quali la leva finanziaria o la vendita allo scoperto, oppure in strumenti finanziari complessi come derivati (*swap*, opzioni, *futures*), operazioni di prestito titoli, pronti contro termine o strumenti di cambio. Se la strategia di investimento dell'ETI non ha l'esito previsto, questo avrà un impatto negativo sul rendimento dell'ETI e, di conseguenza, può avere un impatto negativo sul valore dei Titoli ETI e sul rendimento che gli investitori possono quindi ottenere. I Portatori di Titoli legati a ETI non hanno diritto a partecipare all'ETI, né con il voto, né tramite qualsiasi forma di distribuzione. Di conseguenza, il rendimento che un Portatore di Titoli ETI riceve potrebbe essere inferiore (anche notevolmente inferiore) rispetto a un investimento diretto in un ETI.

L'esposizione a uno strumento negoziato in borsa, rischi di mercato simili a un investimento diretto in uno strumento negoziato in borsa, eventi di rettifica potenziali o eventi straordinari che influenzano lo strumento quotato in borsa ed eventi di turbativa del mercato o la mancata apertura di un mercato di riferimento (borsa) potrebbero avere un effetto negativo sul prezzo e sulla liquidità dei Titoli.

3. Rischi relativi ai mercati di negoziazione dei Titoli:

Il prezzo di negoziazione dei Titoli può essere influenzato da una serie di fattori tra cui, a titolo esemplificativo ma non esaustivo, il prezzo, il valore o il livello dell'i Sottostante/i di Riferimento, il tempo rimanente fino alla data di liquidazione/rimborso dei Titoli, la volatilità implicita o realizzata associata all'i Sottostante/i di Riferimento e al rischio di correlazione dell'i Sottostante/i di Riferimento. La possibilità che il prezzo di negoziazione dei Titoli fluttui (positivamente o negativamente) dipende da una serie di fattori che gli investitori dovranno considerare attentamente prima di acquistare o vendere i Titoli.

4. Rischi legali

Le condizioni dei Titoli conterranno disposizioni per la convocazione di assemblee dei Portatori di tali Titoli per valutare questioni che riguardano i loro interessi. Tali disposizioni consentono a maggioranze predefinite di vincolare tutti i Portatori, inclusi i Portatori che non hanno partecipato o votato all'assemblea in questione e i Portatori che hanno votato in modo contrario rispetto alla maggioranza.
