Any person subsequently offering, selling or recommending the Certificates (a **distributor**) should take into consideration the manufacturer's target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the **UK MiFIR Product Governance Rules**) is responsible for undertaking its own target market assessment in respect of the Certificates (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

2. RATINGS

The Certificates to be issued have not been rated.

3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE/OFFER

Save for fees, if any, payable to the Dealer, and so far as the Issuer is aware, no person involved in the issue of the Certificates has an interest material to the offer.

The Dealer and its affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Certificates and Calculation Agent of the Certificates. Société Générale will also ensure the roles of Collateral Agent and Securities Valuation Agent for the Certificates.

The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Certificateholders on the other hand cannot be excluded.

Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Certificates or possession of non public information in relation with them) and those of the Certificateholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Certificateholders.

4. REASONS FOR THE OFFER AND USE OF PROCEEDS

7. PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT
(i) PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT
(*Structured Certificates only*)

The value of the Certificates, the payment of a coupon amount on a relevant interest payment date to a Certificateholder, the payment of an automatic early redemption amount on a relevant automatic early redemption date and the payment of a Final Exercise Amount to a Certificateholder on the Final Exercise Date will depend on the performance of the underlying asset(s), on the relevant valuation date(s).

The value of the Certificates is linked to the positive or negative performance of one or several underlying instrument(s) within the basket. The amount(s) to be paid is/are determined on the basis of the condition which is satisfied (or not) if the performance of one or several underlying instrument(s) within the basket is higher than or equal to a predefined barrier performance. Performance of one or several underlying instrument(s) within the basket can be averaged.

During the lifetime of the Certificates, the market value of these Certificates may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital. The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.

Key risks that are specific to the guarantor :

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

The investor bears the risk of total or partial loss of the amount invested at redemption of the Certificates on the Final Exercise Date or the event the Certificates is sold by the investor before that date.

Although it is subject to market making agreement, the liquidity of the product may be affected by exceptional circumstances that make it difficult to sell the product or at a price that results in a total or partial loss of the amount invested.

Certificates may be early redeemed automatically when the level of the Underlying(s) reaches a certain level. Investors will not benefit from the performance of the Underlying(s) subsequent to such event.

The market value of the Certificates depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying(s) (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Certificates and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

The investor is exposed to the risk that the proceeds from the liquidation of the collateral assets will not be sufficient to cover the amount due under the Certificates which is equal to their market value (without taking into account the default of the issuer or guarantor). Such shortfall may be due to lack of diversification or liquidity of the collateral assets, miscalibration, change or absence of haircuts applicable to the valuation of the collateral assets, correlation between the value of the collateral assets and the creditworthiness of the issuer or guarantor, collateralisation at par value or subordination to payment of certain providers.

I TITOLI SONO ASSISTITI DA UNA GARANZIA?

Natura e scopo della garanzia

I Certificati sono incondizionatamente e irrevocabilmente garantiti da Société Générale (il **Garante**) ai sensi della garanzia regolata dal diritto francese stipulata in data 31/05/2024 (la **Garanzia**).

Rischi chiave specifici del garante

Considerando che Société Générale è garante e controparte delle operazioni di copertura dell'Emittente, gli investitori sono essenzialmente esposti al rischio di credito di Société Générale e non hanno ricorso nei confronti dell'Emittente in caso di inadempimento dell'Emittente.

QUALI SONO I RISCHI CHIAVE SPECIFICI DEI TITOLI?

L'investitore si assume il rischio di perdita totale o parziale dell'importo investito al momento del rimborso dei Certificati alla data di scadenza o nel caso in cui i Certificati siano venduti dall'investitore prima di tale data.

Benché sia oggetto di impegni di market making, la liquidità del prodotto può essere influenzata dal verificarsi di circostanze eccezionali che potrebbero rendere difficile vendere il prodotto o comunque ad un prezzo che produce la perdita totale o parziale dell'importo investito.

I Certificati possono essere rimborsati anticipatamente automaticamente quando il livello del(i) Sottostante(i) raggiungono un certo livello. Gli Investitori non beneficeranno della performance del(i) Sottostante(i) successivamente a tal evento.

Il valore di mercato dei Certificati dipende dall'evoluzione dei parametri di mercato al momento dell'uscita (livello dei prezzi dei Sottostanti, tassi di interesse, volatilità e credit spreads) e può pertanto comportare un rischio di perdita totale o parziale dell'importo inizialmente investito

Il verificarsi di eventi non legati al Sottostante (quali la modifica di previsioni di legge, inclusa la normativa fiscale, eventi di forza maggiore) possono determinare il rimborso anticipato dei Certificati e quindi la perdita totale o parziale dell'importo investito.

Il verificarsi di eventi relativi al Sottostante ovvero a operazioni di copertura può determinare la necessità di rettifiche, de-indicizzazioni, sostituzione del Sottostante, e di conseguenza a perdite del capitale investito, anche in caso di prodotti a capitale protetto.

Se la valuta di riferimento delle attività principali dell'investitore è diversa da quella del prodotto, l'investitore è esposto al rischio di cambio, in particolare in caso di controlli sul cambio, che potrebbero ridurre l'importo investito.

L'investitore è esposto al rischio che i proventi derivanti dalla liquidazione delle attività collaterali non siano sufficienti a coprire l'importo dovuto ai sensi dei Certificati che è pari al loro valore di mercato (senza tenere conto dell'inadempienza dell'emittente o del garante). Tale deficit può essere dovuto alla mancanza di diversificazione o liquidità delle attività collaterali, errata calibrazione, modifica o assenza di scarti di garanzia applicabili alla valutazione delle attività collaterali, correlazione tra il valore delle attività collaterali e l'affidabilità creditizia dell'emittente o del garante, collateralizzazione al valore nominale o subordinazione al pagamento di determinati fornitori.
