What are the key risks that are specific to the Issuer?

Credit risk in relation to UBS AG as Issuer

Each investor in securities issued by UBS AG as Issuer is exposed to the credit risk of UBS AG. The assessment of UBS AG's creditworthiness may be affected by a number of factors and developments. These include UBS Group AG's acquisition of Credit Suisse Group AG and the integration of the groups, substantial changes in regulation, UBS's reputation, operational risks, risk management and control processes, market conditions and macroeconomic climate, credit risk exposure to clients and counterparties, material legal and regulatory risks, UBS AG's success in executing its strategic plans, and liquidity and funding management.

If UBS experiences financial difficulties, FINMA has the power to open restructuring or liquidation proceedings or impose protective measures in relation to UBS Group AG, UBS AG and UBS Switzerland AG, and such proceedings or measures may have a material adverse effect on UBS AG's creditors. If restructuring or liquidation proceedings are instituted against UBS AG, holders of securities may suffer a substantial or **total loss** on the securities.

Section C – Key Information on the Securities

What are the main features of the Securities?

Type and form of the Securities

The Securities are structured debt securities with no capital protection. The Securities are issued in the form of bearer securities (§ 793 BGB) under German law. The contents (other than the form) of the Securities as well as all rights and duties arising from the Securities are governed by German law.

Objective of the Security is to provide the Securityholder with a specified entitlement according to predefined conditions. The Security has, unless redeemed early, a fixed lifetime and will become due on the Maturity Date.

Redemption at maturity

On the Maturity Date, the Securityholder is entitled to receive the Redemption Amount, which depends on the performance of the Underlying, and whether or not a so-called Barrier Event has occurred, in each case, determined as of the Valuation Date as follows:

The Redemption Amount is at least equal to the capital protected Minimum Amount.

For this purpose, a **"Barrier Event"** shall have occurred, if on any of the Barrier Observation Date the Price of the Underlying is equal to or higher than the Barrier Level.

- (i) If a Barrier Event **has occurred** the Redemption Amount equals (commercially rounded) the product of (i) the Calculation Amount multiplied by (ii) the sum of the Capital Protection Factor and the Rebate Factor.
- (ii) If a Barrier Event **has not occurred** and if the Settlement Price of the Underlying is **lower than or equal to** the Strike Level, the Redemption Amount equals (commercially rounded) the product of the Calculation Amount multiplied by the Capital Protection Factor.
- (iii) If a Barrier Event **has not occurred** and if the Settlement Price of the Underlying is **higher than** the Strike Level the Redemption Amount (commercially rounded) will be calculated as follows: the product of (i) the Calculation Amount multiplied by (ii) the sum of the Capital Protection Factor and the product of (a) the Settlement Price minus Strike Level divided by (y) the Reference Level of the Underlying.

The official price for one unit of Silver (UBS Silver Market Fixing Ltd – LBMA Fixing Price) Bloomberg: SLVRLND / RIC: LDNXAG	36.20 USD	32.58 USD	47.06 USD

The Issuer is entitled to terminate the Securities with immediate effect if an (extraordinary) termination event occurs. Examples of (extraordinary) termination events include the discontinuation of the determination/publication of the price of the Underlying or the occurrence of a change in law. In such case, the payable termination amount payable to Securityholders may be significantly lower than the capital invested by Securityholders for purchasing the Securities (including the transaction costs).

Relative seniority of the Securities in the Issuer's capital structure in the event of insolvency

The Securities constitute direct, unsecured and unsubordinated obligations of the Issuer, ranking *pari passu* among themselves and with all other present and future unsecured and unsubordinated obligations of the Issuer, other than obligations preferred by mandatory provisions of law.

Restrictions on free transferability of the Securities

The Securities are freely transferrable.

Where will the Securities be traded?

It is intended that application for listing of the Securities to trading on EuroTLX will be made.

What are the key risks that are specific to the Securities?

The Securityholders are exposed to the risk of a bail-in. In case FINMA as supervisory authority in respect of the Issuer exercises resolution measures against the Issuer and writes down or converts the Securities into common equity of the Issuer, Securityholders would have no further claim against the Issuer under the Securities.

The Securities are not protected by any statutory or voluntary deposit guarantee scheme. The Issuer's obligations under the Securities are not protected by any statutory or voluntary deposit protection scheme or compensation scheme. Further, no third party guarantees or commitments have been provided in respect of the Issuer's obligations under the Securities. Accordingly, in the event of insolvency of the Issuer, investors may thus experience **a total loss of their investment in the Securities.**

Specific risks related to dependence on the Underlying. The Redemption Amount payable in accordance with the Conditions of the Securities depends on the performance of the Underlying. In case the Settlement Price of the Underlying is equal to or lower than the Strike Level, Securityholders may receive only the capital protected Minimum Amount.

Specific risks related to the application of the capital protection only at the end of the term of the Securities. Potential investors should be aware that the capital protection to the extent of the capital protected Minimum Amount applies only at the end of the term of the Securities, i.e. provided that the Securities have not been terminated and early redeemed by the Issuer or have not been sold by the Securityholder prior to the end of their term. In case of an early termination or sale, the cash amount to be paid may be considerably below the capital protected Minimum Amount. Furthermore, potential investors should recognise that they, nevertheless, are exposed to the Issuer's

credit risk and any potential inability of the Issuer to pay its obligations under the Securities. Therefore, investors may even suffer **a total loss of the invested capital**.

Specific risks related to no further participation in the performance of the Underlying following the termination and early redemption of the Securities. Potential investors should be aware that the Securities may in accordance with the Conditions of the Securities be terminated and redeemed early in a number of circumstances. In case of a termination and early redemption of the Securities prior to the Valuation Date, the Securityholder is entitled to demand the payment of an amount in the Redemption Currency in relation to this termination and early redemption. However, such amount can be considerably below the amount which would be payable at the scheduled end of the term of the Securities and, if it is lower than the invested capital, Securityholders may even suffer **a total loss of the invested capital**.

Specific risks related to reinvestment. The Securityholders bear the risk that the cash amount received by the Securityholder following the termination and early redemption of the Securities (if any) can be reinvested for a term comparable with the scheduled term of the Securities only at market conditions which are less favourable than those prevailing at the time of the acquisition of the Securities. As a result, the yield achieved by this reinvestment may be significantly lower than the return expected by the Securityholder with the purchase of the Securities.

Specific risks related to the "leverage" effect of the Securities. Due to the so-called "leverage" effect of the Securities, potential investors bear the risk that any change in the value of the Underlying may result in a disproportionate change in the value of the Securities. The Securities, consequently, also involve disproportionate loss exposure if the price of the Underlying develops unfavourably.

Specific risks related to currency exchange rates. Potential investors should be aware that the Settlement Price of an Underlying determined on the basis of an Underlying Currency other than the Redemption Currency needs to be converted into the Redemption Currency by using a currency exchange rate fixed at the time of issuance of the Securities (so-called "quanto"-feature). Potential investors should be aware that there may be favourable developments in the value of the Underlying Currency against the Redemption Currency. Therefore, the "quanto"-feature of the Securities may preclude the investors from participating in such favourable developments (i.e., because the fixed currency exchange rate used for the purposes of valuing the Underlying in the Redemption Currency is less favourable than the currency exchange rate prevailing in the market at such time) and, therefore, reduce the value of the Securities.

Specific risks related to the market price of the Securities. Potential investors bear the risk that the market price of the Securities may fluctuate during the term of the Securities, including, without limitation, as a result of any changes in the performance of the Underlying or any changes in the volatility of the Underlying. Moreover, the value of the Securities may fall even in the event that the price of the Underlying remains constant or rises slightly. Conversely, the value of the Securities may remain constant or rise slightly even if the price of the Underlying decreases. Accordingly, Securityholders bear the risk that if they can sell any Securities prior to their due date, the sale proceeds may fall below (including significantly below) the amount of capital initially invested in the Securities and investors would then **lose some or all of the invested capital**.

Specific risks related to the liquidity of the Securities. Potential investors bear the risk that there is no liquid market for trading in the Securities. Due to their structured nature and linkage to the Underlying, the Securities would generally have a more limited secondary market than conventional debt securities. This means that they may not be able to sell the Securities at a time of their own choosing. This could, in turn, result in potential investors receiving a lower sale price than they would have received had a liquid market existed.

Risk of fluctuations in the value of the Underlying. Securityholders are subject to the risks related to the Underlying in respect of the Securities, whose performance is subject to fluctuations. Therefore, Securityholders cannot foresee the value of the Securities on a certain day in the future. Likewise, the historical data on an Underlying does not allow for any conclusions to be drawn about the future performance of an Underlying and the Securities. An Underlying may have only a short operating history or may have been in existence only for a short period of time and may deliver results over the longer term that may be lower than originally expected. When the Securities are redeemed, exercised or otherwise disposed of on a certain day, substantial losses in value might occur in comparison to a disposal at a later or earlier point in time. The more volatile an Underlying is, the less predictable the amount to be received by the Securityholders. If the Securities are terminated and redeemed early or are sold prior to the end of their term, the **amount received by Securityholders may be very low or even be equal to zero**.

Specific risks related to the unwinding of hedging transactions entered into by the Issuer. If the Issuer enters into hedging transactions in connection with the Securities and such hedging transactions are unwound, this could have an impact on the price of the Underlying and, therefore, on any amounts payable to the Securityholders in respect of the Securities. In such cases, Securityholders could even **suffer a partial loss of the invested capital**.

Specific risks related to potential conflicts of interest of the Issuer and its affiliates. The Issuer and its affiliates may have commercial interests that conflict with those of the Securityholders (e.g. as a result of the Issuer's involvement in other transactions or the Issuer's existing business relationship with the issuer of the Underlying) and that may impact the value and/or trading of the Securities. In turn, this could result in Securityholders receiving less when selling any Securities they hold than they would have received but for such conflicts of interest and/or **even suffering a partial loss of the invested capital**.

Specific risks related to hedging transactions entered into by Securityholders. Because of the structured nature of the Securities, potential investors bear the risk that they may not be able to fully hedge the risks arising from the Securities. If any of the risks which potential investors have not been able to fully hedge materialise, potential investors could suffer **a loss of some or all of the invested capital**.

Most material conflicts of interest

The Issuer and affiliated companies may participate in transactions related to the Securities in some way, for their own account or for account of a client. Such transactions may not serve to benefit the Securityholders and may have a positive or negative effect on the value of the Underlying, and consequently on the value of the Securities. Furthermore, companies affiliated with the Issuer may become counterparties in hedging transactions relating to obligations of the Issuer stemming from the Securities. As a result, conflicts of interest can arise between companies affiliated with the Issuer, as well as between these companies and investors, in relation to obligations regarding the calculation of the price of the Securities and other associated determinations.

Within the context of the offering and sale of the Securities, the Issuer or any of its affiliates may directly or indirectly pay fees in varying amounts to third parties, such as distributors or investment advisors, or receive payment of fees in varying amounts, including those levied in association with the distribution of the Securities, from third parties. Potential investors should be aware that the Issuer may retain fees in part or in full.

Quali sono i principali rischi specifici dell'Emittente?				
Rischio di credito in relazione a UBS AG in qualità di Emittente Ciascun investitore in strumenti finanziari emessi da UBS AG in qualità di Emittente è esposto al rischio di credito di UBS AG. La valutazione della solvibilità di UBS AG può essere influenzata da diversi fattori e sviluppi. Tra questi figurano l'acquisizione di Credit Suisse Group AG da parte di UBS Group AG e l'integrazione dei gruppi, cambiamenti sostanziali della regolamentazione, la reputazione, i rischi operativi, la gestione del rischio e i processi di controllo, le condizioni di mercato e il contesto macroeconomico, l'esposizione al rischio di credito di clienti e controparti, rischi legali e normativi rilevanti, il successo di UBS AG nella realizzazione dei suoi piani strategici e la gestione della liquidità e dei finanziamenti. In caso di difficoltà finanziarie di UBS, la FINMA ha facoltà di avviare procedure di ristrutturazione o di liquidazione ovvero di imporre misure protettive in relazione a UBS Group AG, UBS AG e UBS Switzerland AG, e tali procedure o misure potranno avere un effetto negativo sostanziale sui creditori di UBS AG. Se dovessero essere avviate procedure di ristrutturazione o di liquidazione nei confronti di UBS AG, i portatori di strumenti finanziari potrebbero subire una perdita rilevante o la perdita totale degli strumenti finanziari.				
Sezione C – Informazioni fondamentali sugli Strumenti Finanziari				
Quali sono le principali caratteristiche degli Strumenti Finanziari?				
Tipologia e forma degli Strumenti Finanziari Gli Strumenti Finanziari di ciascuna Serie sono titoli di debito strutturati. Gli Strumenti Finanziari saranno emessi sotto forma di titoli al portatore (Art. 793 del codice civile tedesco, BGB) ai sensi della legge tedesca. Il contenuto (diverso dalla forma) dei Titoli, nonché tutti i diritti e gli obblighi derivanti dai Titoli sono regolati dalla legge tedesca. L'obiettivo dello Strumento Finanziario è conferire al Portatore un determinato diritto sulla base di condizioni prestabilite. Lo Strumento Finanziario ha durata fissa e sarà rimborsato alla Data di Scadenza. Rimborso alla scadenza Alla Data di Scadenza, il Titolare del Titolo ha diritto a ricevere l'Importo di Rimborso, che dipende dalla performance del Sottostante e dal fatto che si sia verificato o meno il cosiddetto Evento Barriera, determinato alla Data di Valutazione come segue: L'Importo di Rimborso è almeno pari all'Importo Minimo. A tal proposito, l'Evento Barriera si considera verificatosi se, in almeno una Data di Osservazione della Barriera il Prezzo del Sottostante è pari o superiore al Livello Barriera. Se l'Evento Barriera si è verificato, l'Importo di Regolamento (arrotondato commercialmente) sarà calcolato come segue: il prodotto di (i) l'Importo di Calcolo e (ii) la somma del Fattore di Protezione del Capitale e il Fattore di Retrocessione (i) Se l'Evento Barriera non si è verificato e il Prezzo di Liquidazione è inferiore o uguale al Livello di Strike, l'Importo di Regolamento (arrotondato commercialmente) sarà calcolato come segue: il prodotto di (i) l'Importo di Calcolo e (ii) il Fattore di Protezione del Capitale (ii) Se l'Evento Barriera non si è verificato e il Prezzo di Liquidazione è superiore al Livello di Strike, l'Importo di Regolamento (arrotondato commercialmente) sarà calcolato come segue: il prodotto di (i) l'Importo di Calcolo e (ii) la somma del Fattore di Protezione del Capitale e (a) il Prezzo di Liquidazione meno il Livello di Strike diviso per (y) il Livello di Riferimento del Sottostante.

L'Emittente ha la facoltà di estinguere gli Strumenti Finanziari con effetto immediato al verificarsi di un evento (straordinario) di estinzione. Tra gli esempi di eventi (straordinari) di estinzione si annoverano l'interruzione della determinazione/pubblicazione del prezzo del Sottostante o il verificarsi di una modifica legislativa. In tal caso, l'ammontare dovuto al Portatore degli Strumenti Finanziari alla data di cessazione potrebbe essere nettamente inferiore al capitale investito dal Portatore negli Strumenti Finanziari (comprese le commissioni di negoziazione).

Rango degli Strumenti Finanziari nella struttura del capitale dell'Emittente in caso di insolvenza

Gli Strumenti Finanziari costituiscono obbligazioni dirette, non garantite e non subordinate dell'Emittente, e avranno il medesimo grado di diritti tra di loro e rispetto a tutte le altre obbligazioni attuali e future non garantite e non subordinate dell'Emittente, diverse dalle obbligazioni privilegiate secondo inderogabili disposizioni di legge.

Restrizioni alla libera negoziabilità degli Strumenti Finanziari

Gli Strumenti Finanziari sono liberamente negoziabili.

Dove saranno negoziati gli Strumenti Finanziari?

L'Emittente intende presentare domanda di ammissione alla negoziazione degli Strumenti Finanziari sul sistema EuroTLX.

Quali sono i principali rischi specifici degli Strumenti Finanziari?

I Portatori degli Strumenti Finanziari sono esposti al rischio di bail-in. Qualora la FINMA, nelle sue funzioni di autorità di vigilanza dell'Emittente, dovesse esercitare misure di risoluzione nei confronti di quest'ultimo e procedesse alla svalutazione o alla conversione degli Strumenti Finanziari in azioni ordinarie dell'Emittente, il Portatore degli Strumenti Finanziari non potrebbe più far valere nei confronti dell'Emittente i diritti associati agli Strumenti Finanziari.

Gli Strumenti Finanziari non sono assistiti da alcun sistema di garanzia o tutela dei depositi, obbligatorio o volontario. Le obbligazioni che sorgono in capo all'Emittente in relazione agli Strumenti Finanziari non sono assistite da alcun sistema di tutela dei depositi, obbligatorio o volontario, né da un sistema di indennizzo. Non sono altresì stati forniti impegni o garanzie di terzi in relazione agli obblighi

dell'Emittente riguardanti gli Strumenti Finanziari. Di conseguenza, in caso di insolvenza dell'Emittente, gli investitori sono pertanto esposti al rischio di **perdita totale del loro investimento negli Strumenti Finanziari**.

Rischi specifici relativi alla dipendenza dal Sottostante. L'Importo di Rimborso pagabile in conformità con le Condizioni dei Titoli dipende dalla performance del Sottostante. Nel caso in cui il Prezzo di Liquidazione del Sottostante sia uguale o inferiore al Livello di Strike, i Portatori degli Strumenti Finanziari possono ricevere solo l'Importo Minimo protetto dal capitale.

Rischi Specifici connessi all'applicazione della protezione del capitale soltanto alla fine del termine dei titoli: potenziali investitori devono essere consapevoli del fatto che la protezione del capitale con riferimento all'Importo Minimo si applica soltanto alla fine del termine dei Titoli i.e. questo considerando che i Titoli non sono stati terminati o rimborsati anticipatamente dall'Emittente o non sono stati venduti dai possessori dei titoli prima della fine del termine. In caso di rimborso anticipato o vendita, l'importo da corrispondere potrebbe essere considerabilmente inferiore rispetto all'Importo Minimo di protezione del capitale. Inoltre, i potenziali investitori devono essere consapevoli che, tuttavia, sono esposti al rischio di credito e alla potenziale inabilità dell'Emittente di fare fronte ai propri impegni finanziari relativi ai Titoli. Quindi, i possessori di titoli possono persino subire una perdita totale del capitale investito.

Rischi specifici connessi all'assenza di ulteriore partecipazione alla performance del Sottostante a seguito della cessazione e del rimborso anticipato dei Titoli. I potenziali investitori devono essere consapevoli del fatto che i Titoli possono, in conformità con le Condizioni dei Titoli, essere terminati e rimborsati in anticipo in una serie di circostanze. In caso di risoluzione e rimborso anticipato dei Titoli prima della Data di Valutazione, il Titolare del Titolo ha il diritto di richiedere il pagamento di un importo nella Valuta di Rimborso in relazione a tale risoluzione e rimborso anticipato. Tuttavia, tale importo può essere notevolmente inferiore all'importo che sarebbe pagabile alla fine prevista della durata dei Titoli e, se è inferiore al capitale investito, i possessori di titoli possono persino subire una **perdita totale del capitale investito**.

Rischi specifici relativi al reinvestimento. Il Portatore è esposto al rischio che l'eventuale liquidità incassata in seguito all'estinzione e al rimborso anticipato degli Strumenti Finanziari possa essere reinvestita per un periodo corrispondente alla durata naturale degli Strumenti Finanziari a condizioni di mercato meno favorevoli rispetto a quelle prevalenti al momento dell'acquisto degli Strumenti Finanziari. Di conseguenza, il tasso di rendimento ottenuto con il reinvestimento potrebbe essere decisamente inferiore al rendimento atteso dal Portatore al momento dell'acquisto degli Strumenti Finanziari. Inoltre, la probabilità di perdere gli importi così reinvestiti può essere decisamente più elevata.

Rischi specifici connessi all'effetto "leva" dei Titoli. A causa del cosiddetto effetto "leva" dei Titoli, i potenziali investitori si assumono il rischio che qualsiasi variazione del valore del Sottostante possa comportare una variazione sproporzionata del valore dei Titoli. I Titoli, di conseguenza, comportano anche un'esposizione sproporzionata alle perdite se il prezzo del Sottostante si sviluppa in modo sfavorevole.

Rischi specifici relativi ai tassi di cambio. Si fa presente ai potenziali investitori che il Prezzo di Liquidazione di ciascun Sottostante calcolato sulla base di una Valuta Sottostante diversa dalla Valuta di Rimborso deve essere convertito nella Valuta di Rimborso al tasso di cambio stabilito al momento dell'emissione degli Strumenti Finanziari (la cosiddetta condizione "Quanto"). Si fa presente ai potenziali investitori che il valore della Valuta Sottostante rispetto alla Valuta di Rimborso può variare in modo favorevole. Pertanto, la cosiddetta condizione "Quanto" degli Strumenti Finanziari può impedire all'investitore di partecipare a tali variazioni favorevoli (in quanto il tasso di cambio fisso utilizzato ai fini della valutazione del Sottostante nella Valuta di Rimborso è meno favorevole del tasso di cambio prevalente sul mercato in quel momento) e, di conseguenza, può determinare una riduzione di valore degli Strumenti Finanziari.

Rischi specifici relativi al prezzo di mercato degli Strumenti Finanziari. I potenziali investitori sono esposti al rischio di oscillazioni del prezzo di mercato degli Strumenti Finanziari nel corso della vita degli stessi, ivi incluso, in via non limitativa, a seguito di variazioni nella performance del Sottostante o della volatilità del Sottostante. Inoltre, il valore degli Strumenti Finanziari può diminuire anche qualora il prezzo del Sottostante dovesse rimanere costante o aumentare leggermente. Per contro, il valore degli Strumenti Finanziari può rimanere costante o aumentare leggermente anche qualora il prezzo del Sottostante dovesse diminuire. Di conseguenza, il Portatore è esposto al rischio che, qualora dovesse riuscire a vendere gli Strumenti Finanziari prima della rispettiva scadenza, i proventi della vendita potrebbero essere inferiori (anche in misura significativa) all'ammontare del capitale inizialmente investito negli Strumenti Finanziari, e in tal caso l'investitore potrebbe **perdere il capitale investito in parte o nella sua interezza**.

Rischi specifici relativi alla liquidità degli Strumenti Finanziari. I potenziali investitori sono esposti al rischio che non vi sia un mercato liquido per la negoziazione degli Strumenti Finanziari. A causa della loro natura strutturata e del loro legame con il Sottostante, gli Strumenti Finanziari possono in genere avere un mercato secondario più limitato rispetto ai titoli di debito di tipo convenzionale. Ciò potrebbe comportare l'impossibilità di vendere gli Strumenti Finanziari nel momento prescelto. Questo, a sua volta, potrebbe far sì che i potenziali investitori ottengano un prezzo di vendita inferiore a quanto avrebbero potuto percepire in presenza di un mercato liquido.

Rischio di oscillazioni del valore del Sottostante. Il Portatore degli Strumenti Finanziari è esposto ai rischi relativi al Sottostante in relazione agli Strumenti Finanziari, la cui performance è soggetta a oscillazioni. Pertanto, il Portatore degli Strumenti Finanziari non può prevedere il valore degli Strumenti Finanziari a una certa data futura. Allo stesso modo, i dati storici relativi al Sottostante non consentono di trarre conclusioni sulla futura performance del Sottostante e degli Strumenti Finanziari. Il Sottostante potrebbe avere uno storico operativo limitato o potrebbe esistere solo da un breve periodo di tempo e i suoi risultati nel lungo periodo potrebbero essere inferiori a quanto inizialmente previsto. Al momento del riscatto, dell'esercizio o comunque della cessione degli Strumenti Finanziari a una certa data, potrebbero verificarsi perdite sostanziali di valore rispetto alla cessione effettuata in un momento precedente o successivo. Più il Sottostante è volatile, meno prevedibile sarà l'importo che il Portatore degli Strumenti Finanziari potrà ricevere. In caso di andamento sfavorevole del prezzo del Sottostante, l'importo ricevuto dal Portatore degli Strumenti Finanziari **potrebbe essere molto basso o addirittura azzerarsi**.

Rischi specifici relativi alle operazioni di copertura poste in essere dall'Emittente. A causa della natura strutturata dei Titoli, i potenziali investitori sono esposti al rischio di non essere in grado di coprire appieno i rischi derivanti dai Titoli. Se uno dei rischi che i potenziali investitori non sono stati in grado di coprire completamente si materializza, i potenziali investitori potrebbero **subire una perdita di parte o di tutto il capitale investito**.

Rischi specifici relativi a potenziali conflitti di interesse dell'Emittente e delle sue società collegate. L'Emittente e le sue società collegate potrebbero avere interessi commerciali in conflitto con quelli del Portatore (incluso, a titolo esemplificativo, in conseguenza del coinvolgimento dell'Emittente in altre operazioni o della relazione d'affari in essere tra l'Emittente e l'emittente del Sottostante) che potrebbero avere un impatto sul valore e/o sulla negoziazione degli Strumenti Finanziari. A sua volta, ciò potrebbe far sì che il Portatore ottenga dalla

vendita degli Strumenti Finanziari in suo possesso un importo inferiore a quanto avrebbe potuto percepire in assenza di tali conflitti di interesse e/o che possa addirittura subire una perdita parziale del capitale investito.

Rischi specifici relativi all'estinzione di operazioni di copertura stipulate dall'Emittente. Se l'Emittente stipula operazioni di copertura in relazione agli Strumenti Finanziari, l'eventuale estinzione di tali operazioni di copertura potrebbe avere un impatto sul prezzo del Sottostante e, pertanto, su eventuali importi spettanti al Portatore in relazione agli Strumenti Finanziari. In tale ipotesi, il Portatore degli Strumenti Finanziari potrebbe anche subire una perdita parziale del capitale investito.

Conflitti di interesse più significativi

È possibile che l'Emittente e le società collegate partecipino a operazioni connesse agli Strumenti Finanziari nel proprio interesse o nell'interesse di un cliente. Tali operazioni possono non portare alcun vantaggio ai Portatori degli Strumenti Finanziari e possono avere effetti negativi o positivi sul valore del Sottostante e, di conseguenza, sul valore degli Strumenti Finanziari. Inoltre, l'Emittente potrebbe stipulare contratti di copertura dei rischi derivanti dagli Strumenti Finanziari con controparti costituite da società collegate. In tale situazione, potrebbero sorgere dei conflitti di interesse tra queste controparti e tra le controparti e gli investitori in relazione agli obblighi relativi alla determinazione del prezzo degli Strumenti Finanziari e agli altri calcoli associati.

È possibile che, nell'ambito dell'offerta e della vendita degli Strumenti Finanziari, l'Emittente o una delle sue società collegate versino, direttamente o indirettamente, commissioni di importo variabile a favore di terzi, tra cui distributori o consulenti per gli investimenti, oppure percepiscano da terzi, direttamente o indirettamente, commissioni di importo variabile, incluse quelle applicate alla distribuzione degli Strumenti Finanziari. Si rammenta ai potenziali investitori che l'Emittente può trattenere, in tutto o in parte, le commissioni.
