Market Scenarios

Many factors may affect the performance of this product, among others, the evolution of the underlying, its volatility, the interest rates, the exchange rate or the passing of time. These factors must be analysed jointly and may affect the performance of the product in a short period of time. Furthermore, it is possible that, given the favourable evolution of the underlying, its value or its liquidation on a given date may evolve unfavourably as the consequence of the performance of one of these factors.

By no means does Santander guarantee a specific performance of the underlying, neither gives a recommendation on it. The client must assume the risk of an unfavourable evolution of any of the factors that determine the performance of the transaction.

Risk Factors

This is a summary of the Risk Factors relating to the Certificates. Neither Santander International Products Plc nor Santander SA makes any representation as to the completeness or accuracy of them. Please see the Base Prospectus dated 1 July 2025 for the complete Risk Factors, including the Risk Factors of the Issuer, the Guarantor and the Group

- **The Certificates bear the credit risk of the Issuer and the Guarantor:** Holders of Certificates bear the credit risk of the Issuer and the Guarantor. That is the risk that the Issuer or the Guarantor is not able to meet its obligations under such Certificates, irrespective of how any principal, interest or other payments and/or assets deliverable under such Certificates are to be calculated. In such circumstances Holders may lose some or all of their investment.
- **There is no active trading market for the Certificates:** Certificates issued under the Programme will be new Securities which may not be widely distributed and for which there is currently no active trading market (unless in the case of any particular Tranche, such Tranche is to be consolidated with and form a single series with a Tranche of Certificates which is already issued). If the Certificates are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar Securities, general economic conditions and the financial condition of the Issuer and the Guarantor.
Although application may be made (i) to the regulated market of Euronext Dublin for the Certificates to be admitted to its Official List of Euronext Dublin and trading on its regulated market, (ii) to AIAF for the Certificates to be listed and admitted to trading on AIAF, (iii) to Euronext for the Certificates to be listed and admitted to trading on the regulated market of Euronext Lisbon, (iv) the regulated market of the WSE or (v) to the Vienna Stock Exchange for the Certificates to be listed and admitted to trading on the Vienna MTF, this does not mean that such Certificates will be any more or less liquid than if such Certificates were not listed and there is no assurance that such application will be accepted, that any particular Tranche of Certificates will be so admitted or that an active trading market will develop. Accordingly, a trading market for any particular Tranche of Certificates may not develop or may be illiquid and Holders should be prepared to hold the Certificates to maturity.
- **Hedging activities may affect the market price, liquidity or value of Reference Item Linked Certificates:** In connection with the offering of the Reference Item Linked Certificates, the Issuer, the Guarantor and/or any of its affiliates may enter into one or more hedging transactions with respect to any potential reference item(s) or related derivatives. In connection with such hedging activities or with respect to proprietary or other trading activities by the Issuer and/or any of its affiliates, the Issuer, the Guarantor and/or any of its affiliates may enter into transactions in the reference item(s) or related derivatives which may, but are not intended to, affect the market price, liquidity or value of the Reference Item Linked Certificates and which could be deemed to be adverse to the interest of the relevant Noteholders.
- **Investors have no shareholder rights:** As an owner of Equity Linked Certificates, investors will not have voting rights or rights to receive dividends, interest or other distributions, as applicable, or any other rights with respect to any underlying security or index.
- **Investors are exposed to certain key risks, including a loss of all or a substantial portion of their investment:** Investors should be aware that they may lose all or a substantial portion of their principal or investment, depending on the performance of the Reference Items. In addition, the market price of the Certificates may be very volatile and the timing of changes in the value of the Reference Items may affect the actual yield to investors, even if the average level is consistent with expectations.
- **Market Disruption Events and Disrupted Days may result in adjustments and/or early redemption of Certificates:** The calculation agent may determine that a market disruption event has occurred or exists or a relevant exchange fails to open on a relevant date on which the Reference Items were scheduled to be valued, and any consequential postponement of such date of valuation may have an adverse effect on the value of the Certificates.
