Documentation:	Final Terms to be produced in connection with this Term Sheet should be read together with the Base Prospectus. In the event of inconsistencies between this Term Sheet and the Final Terms, the Final Terms shall prevail. Capitalized terms used in this Term Sheet which are not defined shall have the meanings given to them in the Base Prospectus. The Base Prospectus (including any document incorporated par reference therein) shall be available for viewing on the website of Natixis (https://cib.natixis.com/home/pims/Prospectus#/prospectusPublic). Indicative Valuation:	Under normal market conditions, Natixis may provide a valuation of the Notes every Exchange Business Day until the redemption of the Notes.
Secondary Market:	NATIXIS may provide an indicative price of the Notes to holders who so request. The spread between the purchase price and the sale price will not be greater than 1.00%. Notes may have no established trading market when issued, and one may never develop. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Notes that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Notes generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have an adverse effect on the market value of Notes.
